

Table of Contents

Chapter 1. General Introduction	1
1.1 Hydrophobic organic compounds (HOC) in soil.....	2
1.2 In-situ bioremediation of soil contaminated by HOCs.....	3
1.3 HOC-bioavailability in soil.....	5
1.4 Electrokinetics.....	6
1.5 Electro-bioremediation.....	8
1.6 Outline of the thesis.....	9
Figure Legend.....	12
Figures.....	14
Tables.....	18
References.....	20
 Chapter 2. Electro-bioremediation Tetrahedron	24
Electro-bioremediation of hydrophobic organic soil-contaminants: a review of fundamental interactions.....	25
 Chapter 3. Influence of DC-electric field on microorganism-compound interaction	33
3.1 Limits of propidium iodide (PI) as a cell viability indicator for environmental bacteria.....	34
3.2 Activity and viability of PAH-degrading <i>Sphingomonas</i> sp. LB126 in a DC- electric field typical for electro-bioremediation measures.....	41
 Chapter 4. Influence of DC-electric field on soil-microorganism interaction	50
4.1 Effect of electrokinetic transport on the vulnerability of PAH-degrading bacteria in a model aquifer.....	51
4.2 Factors influencing the electrokinetic dispersion of PAH-degrading bacteria in a laboratory model aquifer.....	57
 Chapter 5. Influence of DC-electric field on soil-compound interaction	80
Electroosmotic flow stimulates the release of alginate-bound phenanthrene.....	81
 Chapter 6. Summary and Concluding Remarks	86
6.1 Summary.....	87
6.1.1 Influence of DC-electric field on microorganism-compound interaction.....	87
6.1.2 Influence of DC-electric field on soil-microorganism interaction.....	89
6.1.3 Influence of DC-electric field on soil-compound interaction.....	91
6.1.4 Relevance for electro-bioremediation.....	92
6.2 Concluding remarks.....	94
6.2.1 Personal retrospect.....	94
6.2.2 My opinion on electro-bioremediation.....	95
References.....	96
