

CONTENTS

Preface	xi
Symbols	xiii
Constants / xvi	
Defined Quantities / xvi	
Conversions / xvi	
SI Units / xvii	
Periodic Table of the Elements	xviii
1 Chemical Distribution in Soil Environments	1
1.1 The Soil Environment / 1	
1.2 Soil as a Chemically Reacting System / 2	
1.3 Soil Solution as a Hub Predictor of Soil Processes / 4	
1.4 Soil Solution Definitions / 4	
2 The Soil Solution	6
2.1 Historical Perspective / 7	
2.2 Concepts of Soil Solution / 13	
3 Chemical Statics and Dynamics Applied to Soil Solution	22
3.1 Limitations to Equilibrium and Kinetic Approaches / 22	
3.2 Chemical Equilibrium and Kinetic Models Compared / 24	
3.3 Statics in Review / 27	
3.4 Dynamics in Review / 47	

4	Master Variables	74
4.1	Soil pH / 74	
4.2	Ionic Strength / 85	
4.3	Electrical Potential / 86	
4.4	Suspended Colloidal Materials / 92	
5	Obtaining Soil Solution: Laboratory Methods	95
5.1	Operational Needs and Practical Constraints / 95	
5.2	Centrifugation / 104	
5.3	Column Displacement / 109	
5.4	Pressure Membrane Extraction / 114	
5.5	Saturation Extracts / 116	
5.6	Water Extracts of Soils / 118	
5.7	Complexation and Exchange Techniques / 118	
5.8	Summary / 120	
6	Obtaining Soil Solution: Field Methods	121
6.1	Common Attributes of Lysimetric Methods / 122	
6.2	Monolith Lysimeters / 126	
6.3	Filled-In Lysimeters / 129	
6.4	Tension Lysimeters / 130	
6.5	Ebermayer Lysimeters / 135	
6.6	Watershed and Field-Scale Sampling of Soil Solution / 139	
6.7	Summary / 141	
7	Soil Solution Composition	144
7.1	Total Ion Composition of Soil Solutions / 144	
7.2	Ion Speciation in Soil Solution / 153	
7.3	Computational Modeling of Soil Solution Composition / 165	
8	Quantity-Intensity Relationships	169
8.1	Ratio Law / 170	
8.2	Ion Exchange / 172	
8.3	Chemisorption / 174	
9	Mineral Stability and Pedogenesis	181
9.1	Ion Activity Products / 182	
9.2	Stability Diagrams / 186	
9.3	Rates of Mineral Weathering / 202	

10	Chemical Availability	209
10.1	Bioavailability / 209	
10.2	Geochemical Availability / 217	
10.3	Biogeochemical Availability / 218	
11	Soil Solution Aluminum	220
11.1	Aluminum Distribution in Soil Solution / 221	
11.2	Measurement of Solution Aluminum / 224	
11.3	Partitioning Soil Solution Aluminum / 225	
11.4	Aluminum Bioavailability / 227	
11.5	Aluminum Geochemistry / 236	
12	Trace Metals in Soil Solution	246
12.1	Soil Biogeochemistry of Trace Elements / 246	
12.2	Speciation of Trace Metals Arising from Waste Disposal / 247	
12.3	Complexation Reactions of Trace Elements / 250	
12.4	Cadmium / 255	
12.5	Micronutrient Cations / 261	
12.6	Trace Inorganic Ligands / 268	
12.7	Technetium / 271	
13	Dissolved and Colloidal Organics	275
13.1	Reactive Natural Organic Chemicals in Soil Solution / 275	
13.2	Metal–Humic Matter Interactions / 281	
13.3	Quantifying Dissolved Organic Carbon Effects on Soil Solution Composition / 285	
13.4	Dissolved and Colloidal Organic Carbon Effects on Bioavailability and Transport / 289	
14	Xenobiotics in Soil Solution	293
14.1	Speciation and Complexation in Soil Solution / 294	
14.2	Sampling and Analytical Approaches / 295	
14.3	Availability / 303	
14.4	Environmental Chemistry / 306	
14.5	Summary / 309	
	References	311
	Index	339
