|--|--------|
| List of Figures .....  | xiii   |
| List of Tables.....  | xv     |
| About the Editors.....   | xvii   |
| Contributors .....   | xix    |
| Preface: About This Book.....  | xxi    |
| A Dialog, over Coffee, about Life Cycle Costing .....  | xxiii  |
| Executive Summary.....   | xxvii  |
| 0.1 Three Categories of Life Cycle Costing.....  | xxvii  |
| 0.2 System Boundaries in Environmental Life Cycle Costing .....  | xxviii |
| 0.3 Example Calculations in Environmental Life Cycle Costing.....  | xxx    |
| <b>Chapter 1</b> Introduction: History of Life Cycle Costing, Its Categorization, and Its Basic Framework .....  | 1      |
| <i>Kerstin Lichtenvort, Gerald Rebitzer, Gjalt Huppes, Andreas Ciroth, Stefan Seuring, Wulf-Peter Schmidt, Edeltraud Günther, Holger Hoppe, Thomas Swarr, and David Hunkeler</i> |        |
| 1.1 History and Development of Conventional LCC .....  | 1      |
| 1.2 Types of LCC .....   | 4      |
| 1.2.1 Conventional Life Cycle Costing .....  | 6      |
| 1.2.2 Environmental Life Cycle Costing .....   | 7      |
| 1.2.3 Societal Life Cycle Costing .....  | 8      |
| 1.3 Two Key Limitations of LCC to Be Tackled by Environmental LCC .....  | 9      |
| 1.3.1 Need for Different Perspectives.....   | 9      |
| 1.3.2 Life Cycle Costing Planning versus Life Cycle Costing Analysis ....  | 11     |
| 1.4 The Requirement and General Framework for Environmental Life Cycle Costing .....   | 12     |
| 1.4.1 Goal and Scope Definition.....   | 12     |
| 1.4.2 Information Gathering .....  | 13     |
| 1.4.3 Interpretation and Identification of Hotspots .....  | 15     |
| 1.4.4 Sensitivity Analysis and Discussion .....  | 16     |
| <b>Chapter 2</b> Modelling for Life Cycle Costing .....  | 17     |
| <i>Gjalt Huppes, Andreas Ciroth, Kerstin Lichtenvort, Gerald Rebitzer, Wulf-Peter Schmidt, and Stefan Seuring</i>  |        |
| 2.1 Introduction .....   | 17     |

|  |   |           |
|--|---|-----------|
| 2.2  | Cost Models.....  | 18        |
| 2.3  | Cost Categories .....   | 19        |
| 2.3.1  | Cost, Revenue, and Benefits.....  | 19        |
| 2.3.2  | Market Prices and Value Added .....   | 20        |
| 2.3.3  | Four Levels of Cost Categories.....   | 21        |
| 2.3.4  | Cost Estimation.....  | 24        |
| 2.4  | Cost Bearers .....  | 25        |
| 2.5  | Uncertainties and Inconsistencies in Cost Data.....                                   | 28        |
| 2.5.1  | Definitions of Cost Collection Methods .....  | 28        |
| 2.5.2  | Geographical Differences and Exchange Rates.....                                      | 29        |
| 2.5.3  | Confidential Information .....  | 29        |
| 2.6  | Cost Aggregation.....   | 29        |
| 2.6.1  | Discounting.....  | 30        |
| 2.6.1.1  | Long-Term Discounting of Costs and Environmental Impacts in Societal LCC .....        | 31        |
| <b>Chapter 3</b>                               | <b>Environmental Life Cycle Costing.....</b>  | <b>35</b> |
| <i>Gerald Rebitzer and Shinichiro Nakamura</i> |   |           |
| 3.1  | Objectives of Environmental LCC.....  | 35        |
| 3.2  | System Boundaries and Scope .....   | 36        |
| 3.2.1  | Market Structure, Environmental Taxes, and Subsidies.....                             | 36        |
| 3.2.2  | Product Life Cycle from Economic and Environmental Perspectives.....                  | 37        |
| 3.2.3  | Scope of Environmental LCC.....   | 39        |
| 3.2.4  | What Environmental LCC Is Not .....   | 40        |
| 3.3  | Calculating Life Cycle Costs Based on the Process LCI of LCA.....                     | 41        |
| 3.3.1  | General Procedure .....   | 41        |
| 3.3.2  | Specific Methodological Issues: Similarities and Differences between LCA and LCC..... | 42        |
| 3.3.2.1  | Definition of Functional Unit and Reference Flows.....                                | 42        |
| 3.3.2.2  | Definition of Unit Processes, Data Aggregation, and Data Availability.....            | 42        |
| 3.3.2.3  | Allocation in Environmental LCC .....   | 43        |
| 3.3.3  | Use of Discounted Cash Flow.....  | 44        |
| 3.3.4  | Data Compilation and Aggregation .....  | 44        |
| 3.3.5  | Interpretation of Environmental LCC Results.....                                      | 48        |
| 3.4  | Environmental LCC in Relation to Conventional and Societal LCC .....                  | 49        |
| 3.5  | Calculating Life Cycle Costs Based on Hybrid LCA .....                                | 51        |
| 3.5.1  | Input–Output Methodology .....  | 51        |
| 3.5.1.1  | Costs and Prices in Input–Output Analysis .....                                       | 51        |
| 3.5.1.2  | Introducing the Use Cost.....   | 52        |
| 3.5.1.3  | Introducing the End-of-Life Cost .....  | 52        |
| 3.5.1.4  | Internalizing External Costs .....  | 53        |

|                  |   |    |
|------------------|---|----|
| 3.5.2            | Numerical Example of I-O-Based LCC for the Washing Machine ..   | 54 |
| 3.5.2.1          | I-O Data for the Washing Machine Case .....   | 54 |
| 3.5.2.2          | I-O Results for the Washing Machine Case .....  | 54 |
| <b>Chapter 4</b> | Integrating External Effects into Life Cycle Costing.....   | 59 |
|                  | <i>Bengt Steen, Holger Hoppe, David Hunkeler,<br/>Kerstin Lichtenvort, Wulf-Peter Schmidt, and Ernst Spindler</i> |    |
| 4.1              | Introduction .....  | 59 |
| 4.2              | Definition, Identification, and Categorization of Externalities .....   | 60 |
| 4.2.1            | Selection of External Cost Categories for Inclusion .....   | 60 |
| 4.2.2            | Categorization of Externalities .....   | 61 |
| 4.2.3            | Consideration of 3rd Parties and Possible Sanctions .....   | 62 |
| 4.2.4            | History and Ethics .....  | 62 |
| 4.2.5            | Environmental Impacts.....  | 63 |
| 4.2.6            | Social Impacts.....   | 63 |
| 4.2.7            | External Economic Impacts.....  | 64 |
| 4.3              | Monetization .....  | 64 |
| 4.3.1            | Some Quantitative Examples of Monetized Impacts.....  | 66 |
| 4.3.1.1          | Damage Cost .....   | 66 |
| 4.3.1.2          | Prevention Cost .....   | 67 |
| 4.3.2            | Monetization of Social Impacts .....  | 68 |
| 4.4              | Internalizing Externalities .....   | 69 |
| 4.4.1            | Sustainability's Potential Impact on Profitability and<br>Shareholder Value .....                                 | 73 |
| 4.4.2            | Revenue .....   | 75 |
| 4.4.3            | Operational Efficiency .....  | 75 |
| 4.4.4            | Access to Capital.....  | 76 |
| <b>Chapter 5</b> | Life Cycle Costing in Life Cycle Management.....  | 77 |
|                  | <i>Thomas Swarr and David Hunkeler</i>  |    |
| 5.1              | Corporate Perspective .....   | 77 |
| 5.2              | Integrating LCC into Management .....   | 78 |
| 5.2.1            | Long-Term Costs.....  | 78 |
| 5.2.2            | Indicators and Their Normalization .....  | 80 |
| 5.2.3            | Indicator Validation and Supply Chain Issues.....   | 81 |
| 5.2.4            | Presentation of LCC Results.....  | 82 |
| 5.2.5            | Interfaces to Sustainable Development, IPP, and Social Aspects.....   | 82 |
| 5.2.6            | Environment and SMEs .....  | 84 |
| 5.3              | Continuous Product Improvement .....  | 85 |
| 5.3.1            | LCC and LCIA in EcoDesign.....  | 85 |
| 5.3.2            | Evaluation Techniques, Complementary Tools, and Trade-Offs.....   | 87 |
| 5.3.3            | Discussion of the Case Studies from a Corporate Perspective .....   | 90 |

|  |   |     |
|--|---|-----|
| <b>Chapter 6</b>   | A Survey of Current Life Cycle Costing Studies .....  | 91  |
| <i>Andreas Ciroth, Karli Verghese, and Christian Trescher</i>  |   |     |
| 6.1  | Intention .....   | 91  |
| 6.2  | Relation of This Chapter to the Other Chapters .....  | 92  |
| 6.3  | Parameters and Settings of LCC Studies in Practice .....                                    | 92  |
| 6.4  | Sampling Procedure of Studies for the Survey .....  | 94  |
| 6.5  | Summary of Results .....  | 94  |
| 6.5.1  | Overview of the Statistics .....  | 95  |
| 6.5.2  | Costs Considered, and Not Considered, in the Case Studies .....                             | 98  |
| 6.5.3  | Data Sources and Calculation Method Used .....  | 100 |
| 6.5.4  | Uncertainty and Discount Rate .....   | 100 |
| 6.5.5  | Selected Goal and Scope, Approaches, and Result Patterns<br>from the Survey .....           | 102 |
| 6.5.5.1  | Use Cases per LCC/LCA Method .....  | 102 |
| 6.5.5.2  | Total Life Cycle Costs, and the Method of Cost<br>Estimation, per Type of LC Approach ..... | 104 |
| 6.5.5.3  | Duration of Life Cycle Considered and Duration of<br>Study, by the Type of LCC .....        | 105 |
| 6.5.5.4  | Life Cycle Duration and LCC Discount Rate .....   | 106 |
| 6.5.5.5  | Addressees of the Studies per Type of Application .....                                     | 107 |
| 6.5.5.6  | Source of the Approach per Type of Study .....  | 107 |
| 6.6  | Outlook: Toward an LCC Case Study Library .....   | 108 |
| 6.7  | Analysis of the Survey's Results .....  | 108 |
| 6.8  | Conclusions and Questions .....   | 109 |
| 6.8.1  | Time-Related Questions .....  | 109 |
| 6.8.2  | Result-Related Questions .....  | 109 |
| 6.8.3  | Functional Unit-Related Questions .....   | 110 |
| 6.8.4  | Tentative Answers .....   | 110 |
| <b>Chapter 7</b>   | Life Cycle Costing Case Studies .....   | 113 |
| <i>Andreas Ciroth, Carl-Otto Gensch, Edeltraud Günther,<br/>Holger Hoppe, David Hunkeler, Gjalt Huppes, Kerstin Lichtenvort,<br/>Kjerstin Ludvig, Bruno Notarnicola, Andrea Pelzeter, Martina Prox,<br/>Gerald Rebitzer, Ina Rüdenauer, and Karli Verghese</i> |   |     |
| 7.1  | Introduction .....  | 113 |
| 7.2  | Organic versus Conventional Extra-Virgin Olive Oil .....                                    | 118 |
| 7.2.1  | Summary .....   | 118 |
| 7.2.2  | Definition of the Case Study .....  | 118 |
| 7.2.3  | Entry Gate and Drivers .....  | 118 |
| 7.2.4  | Implementation .....  | 118 |
| 7.2.5  | Overview of Tools Used .....  | 120 |
| 7.3  | Wastewater Treatment .....  | 121 |
| 7.3.1  | Summary .....   | 121 |
| 7.3.2  | Definition of the Case Study .....  | 121 |

|   |   |            |
|---|---|------------|
| 7.3.3   | Entry Gate and Drivers .....  | 124        |
| 7.3.4   | Implementation .....  | 125        |
| 7.3.5   | Overview of Tools Used.....   | 126        |
| 7.4   | A Comparison of Energy Saving and Incandescent Light Bulbs.....                       | 126        |
| 7.4.1   | Summary.....  | 126        |
| 7.4.2   | Definition of the Case Study .....  | 126        |
| 7.4.3   | Entry Gate and Drivers .....  | 127        |
| 7.4.4   | Implementation .....  | 127        |
| 7.4.5   | Overview of the Tools Used.....   | 128        |
| 7.5   | Double-Deck Carriage Floor (BAHNKREIS Project) .....                                  | 129        |
| 7.5.1   | Summary.....  | 129        |
| 7.5.2   | Definition of the Case Study .....  | 129        |
| 7.5.3   | Entry Gate and Drivers .....  | 130        |
| 7.5.4   | Implementation .....  | 131        |
| 7.5.5   | Overview of the Tools Used.....   | 132        |
| 7.6   | Washing Machine.....  | 132        |
| 7.6.1   | Summary.....  | 132        |
| 7.6.2   | Definition of the Case Study .....  | 134        |
| 7.6.3   | Entry Gate and Drivers .....  | 136        |
| 7.6.4   | Implementation .....  | 138        |
| 7.6.5   | Overview of Tools Used.....   | 139        |
| 7.7   | Hypothetical Case: A High-Capacity Glass Cable Network for Data<br>Transmission ..... | 139        |
| 7.7.1   | Summary.....  | 139        |
| 7.7.2   | Definition of the Case Study .....  | 139        |
| 7.7.3   | Entry Gates and Drivers .....   | 140        |
| 7.7.4   | Implementation .....  | 142        |
| 7.7.5   | Overview of the Tools Used.....   | 143        |
| 7.8   | Passenger Car .....   | 143        |
| 7.8.1   | Summary.....  | 143        |
| 7.8.2   | Definition of the Case Study .....  | 143        |
| 7.8.3   | Entry Gate and Drivers .....  | 147        |
| 7.8.4   | Implementation .....  | 148        |
| 7.8.5   | Overview of Tools Used.....   | 148        |
| 7.9   | Life Cycle Costs of Real Estate.....  | 148        |
| 7.9.1   | Summary.....  | 148        |
| 7.9.2   | Definition of the Case Study .....  | 148        |
| 7.9.3   | Entry Gate and Drivers .....  | 151        |
| 7.9.4   | Implementation .....  | 151        |
| 7.9.5   | Overview of Tools Used.....   | 151        |
| <b>Chapter 8</b>  | <b>Conclusions .....</b>  | <b>153</b> |
| <i>David Hunkeler, Kerstin Lichtenvort, and Gerald Rebitzer</i> |   |            |
| 8.1   | Three Types of Life Cycle Costing .....   | 153        |
| 8.1.1   | Conventional LCC .....  | 153        |

|   |            |
|---|------------|
| 8.1.2 Environmental LCC .....   | 154        |
| 8.1.3 Societal LCC.....   | 154        |
| 8.2 Temporal Aspects and Discounting of LCC Results .....   | 155        |
| 8.3 Learnings from Applied LCC Carried Out to Date.....   | 155        |
| 8.4 State of the Art and Rules of Thumb in Carrying Out Life Cycle<br>Costing .....                                       | 156        |
| <b>Chapter 9 Outlook: Role of Environmental Life Cycle Costing<br/>in Sustainability Assessment.....</b>                  | <b>157</b> |
| <i>Walter Klöpffer</i>  |            |
| 9.1 Sustainability.....   | 157        |
| 9.2 Status of Development .....   | 158        |
| 9.2.1 Life Cycle Assessment (LCA) .....   | 158        |
| 9.2.2 Life Cycle Costing (LCC).....   | 160        |
| 9.2.3 Societal Life Cycle Assessment (SLCA).....  | 160        |
| 9.3 Discussion .....  | 161        |
| <b>Appendices.....</b>  | <b>163</b> |
| Appendix to Case Study Boxes: Washing Machines and Private Laundry<br>in Europe, North American, and Asia and Japan ..... | 163        |
| Appendix to Chapter 4: Social Impacts .....   | 165        |
| Appendix to Chapter 6: Survey Form: For the Investigation of LCC Parameters ...   | 168        |
| <b>Glossary .....</b>   | <b>173</b> |
| <b>References .....</b>   | <b>175</b> |
| <b>Index.....</b>   | <b>185</b> |

# List of Tables

|           |   |       |
|-----------|---|-------|
| Table 0.1 | Results of conventional, environmental, and societal life cycle costing for an idealized washing machine case .....   | xxxii |
| Table 1.1 | Coverage of the 3 LCC types .....   | 5     |
| Table 2.1 | Overview of cost categories .....   | 21    |
| Table 2.2 | Overview of cost bearers and relevant costs covered.....  | 26    |
| Table 2.3 | Summary of recommended discounting of the life cycle costing results .....  | 34    |
| Table 3.1 | Connection of LCA elements with costs in LCC .....  | 39    |
| Table 3.2 | Comparison of cost management and financial accounting.....   | 40    |
| Table 3.3 | Extended I-O coefficients matrix with waste and waste treatment in the form of WIO.....   | 53    |
| Table 3.4 | Data for the washing machine example (1 euro $\approx$ 142 yen).....  | 54    |
| Table 3.5 | Background data on Japanese washing machine .....   | 57    |
| Table 4.1 | General economic impacts and material well being and their relevance for LCC .....  | 65    |
| Table 4.2 | Economic impacts from product features and their implications to LCC .....  | 65    |
| Table 4.3 | Damage cost from emissions resulting from different studies.....  | 67    |
| Table 4.4 | Bandwidth of cost to reduce CO <sub>2</sub> emissions in the year 2040 according to different reduction targets .....   | 68    |
| Table 4.5 | Prevention cost for substances in air or water .....  | 69    |
| Table 4.6 | Examples of the contribution (%) of monetized ecological impacts to the estimated societal life cycle costs (sum of currently monetized and nonmonetized aspects) ..... | 71    |
| Table 4.7 | Weighted global emissions and resource depletions for 1990 as determined by the EPS default method .....  | 72    |
| Table 4.8 | Increase of profit in a fictive company due to applied sustainable development.....   | 73    |
| Table 4.9 | Comparing environmental cost and benefit issues raised by the world business council for sustainable development (WBCSD) .....  | 74    |
| Table 5.1 | Inventory of product development decisions.....   | 88    |
| Table 6.1 | Listing of possible parameters and settings for LCC case studies .....  | 93    |
| Table 6.2 | Industrial sectors in the case studies .....  | 97    |
| Table 6.3 | Objects analyzed in the case studies .....  | 97    |
| Table 6.4 | Examples of functional units in the case studies .....  | 98    |
| Table 6.5 | Examples of costs considered, or explicitly not considered. in the case studies.....  | 98    |
| Table 7.1 | Characterization of the life cycle costing case studies evaluated.....  | 114   |
| Table 7.2 | Summary of life cycle costing case studies.....   | 116   |
| Table 7.3 | Internal costs of organic and conventional extra-virgin olive oil production per functional unit (€) .....  | 119   |

|            |   |     |
|------------|---|-----|
| Table 7.4  | External costs of organic and conventional extra-virgin olive oil production per functional unit (€) .....  | 119 |
| Table 7.5  | Studied wastewater treatment scenarios and assumptions for the treatment of typical municipal wastewater in Switzerland .....   | 123 |
| Table 7.6  | Life cycle costing data for 3 alternative bulbs.....  | 126 |
| Table 7.7  | Break-even calculation for the type 1 (energy saving) versus type 2 (incandescent) lamp.....  | 128 |
| Table 7.8  | Overview of all washing machine case study boxes: real case study and hypothetical extension .....  | 133 |
| Table 7.9  | Overview of the costs considered in the washing machine case study .....  | 135 |
| Table 7.10 | CED and LCC of the production or acquisition and use of a washing machine. Rüdenauer, I, Gensch, C-O, Quack, D. Eco-efficiency analysis of washing machines — life cycle assessment and determination of optimal life span. Revised version. Öko-Institut, Freiburg, 2005 .....                   | 136 |
| Table 7.11 | Cumulated CED for the use of an old or new washing machine. Rüdenauer, I, Gensch, C-O. 2005a. Eco-efficiency analysis of washing machines, refinement of task 4: further use versus substitution of washing machines in stock. Öko-Institut, Freiburg, 2005 .....                                 | 137 |
| Table 7.12 | Cumulated life cycle costs for the use of an old or new washing machine (with discounting). Rüdenauer, I, Gensch, C-O. 2005a. Eco-efficiency analysis of washing machines, refinement of task 4: further use versus substitution of washing machines in stock. Öko-Institut, Freiburg, 2005 ..... | 138 |
| Table 7.13 | Life cycle costs of a high-capacity glass cable network .....   | 140 |
| Table 7.14 | Overview of net costs for some (groups of) cost bearers (no discounting).....   | 141 |
| Table 7.15 | Nominal (= 0%) and discounted costs for the system builder.....   | 142 |
| Table 7.16 | Assumptions and annual costs with regard to the acquisition .....   | 144 |
| Table 7.17 | Annual fixed costs during use phase .....   | 145 |
| Table 7.18 | Assumptions and data with regard to operating costs.....  | 145 |
| Table 7.19 | Assumptions and data with regard to maintenance costs .....   | 145 |
| Table 7.20 | Annual life cycle costs of the regarded passenger cars.....   | 146 |
