

Contents

List of contributors	ix
List of abbreviations, constants and nomenclature	x
Preface	xiii
1 The climate of the Earth	1
<i>John Lockwood</i>	
1.1 Basic climatology	1
1.2 General atmospheric circulation	3
1.3 Palaeoclimates	5
1.4 Polar climates	10
1.5 Temperate latitude climates	14
1.6 Tropical climates	17
References	24
Further reading	25
Questions	25
2 Chemical evolution of the atmosphere	26
<i>Richard Wayne</i>	
2.1 Creation of the planets and their earliest atmospheres	27
2.2 Earth's atmosphere before life began	30
2.3 Comparison of Venus, Earth and Mars	31
2.4 Life and Earth's atmosphere	34
2.5 Carbon dioxide in Earth's atmosphere	38
2.6 The rise of oxygen concentrations	40
2.7 Protection of life from ultraviolet radiation	48
2.8 Summary	51
References	52
Further reading	53
Questions	53
3 Atmospheric energy and the structure of the atmosphere	54
<i>Hugh Coe</i>	
3.1 The vertical structure of Earth's atmosphere	54
3.2 Solar and terrestrial radiation	56
3.3 Solar radiation, ozone and the stratospheric temperature profile	59
3.4 Trapping of longwave radiation	61
3.5 A simple model of radiation transfer	61

3.6	Light scattering	64
3.7	Conduction, convection and sensible and latent heat	69
3.8	The energy budget for the Earth's atmosphere	74
3.9	Changes in climate and the concept of radiative forcing	76
3.10	Solar radiation and the biosphere	79
3.11	Summary	80
	References	81
	Further reading	82
	Questions	82
4	Biogeochemical cycles	83
	<i>Dudley Shallcross</i>	
4.1	Sources	86
4.2	Sinks	86
4.3	Carbon	89
4.4	Nitrogen	95
4.5	Sulphur	97
4.6	Halogens	102
4.7	Hydrogen	107
4.8	Summary	108
	References	108
	Further reading	110
	Questions	110
	Answers	112
5	Tropospheric chemistry and air pollution	114
	<i>Paul Monks and Roland Leigh</i>	
5.1	Sources of trace gases in the atmosphere	114
5.2	Key processes in tropospheric chemistry	117
5.3	Initiation of photochemistry by light	119
5.4	Tropospheric oxidation chemistry	120
5.5	Night-time oxidation chemistry	128
5.6	Halogen chemistry	130
5.7	Air pollution and urban chemistry	134
5.8	Summary	140
	References	142
	Further reading	143
	Questions	144
6	Cloud formation and chemistry	146
	<i>Peter Brimblecombe</i>	
6.1	Clouds	146
6.2	Cloud formation	147
6.3	Particle size and water content	149
6.4	Dissolved solids in cloud water and rainfall	151
6.5	Dissolution of gases	152
6.6	Reactions and photochemistry	158
6.7	Radical and photochemical reactions	162

6.8 Summary	164
References	165
Further reading	167
Questions	167
7 Particulate matter in the atmosphere	168
<i>Paul I. Williams and Urs Baltensperger</i>	
7.1 Aerosol properties	170
7.2 Aerosol sources	178
7.3 The role of atmospheric particles	185
7.4 Aerosol measurements	192
7.5 Summary	195
References	195
Questions	197
8 Stratospheric chemistry and ozone depletion	198
<i>Rob MacKenzie</i>	
8.1 Ozone column amounts	198
8.2 The physical structure of the stratosphere	201
8.3 Gas-phase chemistry of the stratosphere	206
8.4 Aerosols and clouds in the stratosphere	210
8.5 Heterogeneous chemistry of the stratosphere	212
8.6 Future perturbations to the stratosphere	214
8.7 Summary	216
References	216
Questions	217
9 Boundary layer meteorology and atmospheric dispersion	218
<i>Janet Barlow</i>	
9.1 The atmospheric boundary layer	218
9.2 Flow over vegetation	224
9.3 Urban boundary layers	229
9.4 Dispersion of pollutants	233
9.5 Summary	240
References	241
Further reading	242
Questions	242
Hints and answers	242
10 Urban air pollution	243
<i>Jes Fenger</i>	
10.1 Air pollution through the ages	243
10.2 Pollutants and sources	245
10.3 From emission intensity to pollution levels	249
10.4 Urban-scale impacts	252
10.5 Means of mitigation	256
10.6 Case studies	259

10.7 Summary	265
References	266
Further reading	267
Questions	267
11 Global warming and climate change science	268
<i>Atul Jain</i>	
11.1 Historical evidence of the impact of human activities on climate	269
11.2 Future outlook of climate change	278
11.3 Potential impacts of climate change	285
11.4 Pathways to policy considerations	287
11.5 Summary	289
References	290
Questions	292
Appendix: List of websites	293
Index	295
