

# Table of Contents

I	SUMMARY .....	6
II	INTRODUCTION .....	8
2.1	<i>C. ELEGANS</i> AS A MODEL ORGANISM FOR STUDIES ON DNA REPAIR .....	9
2.2	DOUBLE STRAND BREAK REPAIR.....	13
2.2.1	<i>Homologous Recombination Repair</i> .....	15
2.2.2	<i>Non-Homologous End Joining</i> .....	17
2.3	INTERSTRAND CROSSLINK REPAIR .....	18
2.4	NUCLEOTIDE EXCISION REPAIR.....	18
2.5	TRANSLATION SYNTHESIS.....	21
III	BRC-1/BRD-1 INACTIVATION SUPPRESSES GENOME INSTABILITY DURING REPLICATION BLOCKAGE IN <i>SMC-5</i> MUTANTS .....	23
3.1	INTRODUCTION.....	23
3.1.1	<i>Discovery of a novel radiation-sensitive gene</i> .....	23
3.1.2	<i>The Smc family</i> .....	23
3.1.3	<i>The subunits of the Smc5/6 complex</i> .....	24
3.1.4	<i>Characteristics of the Smc5/6 complex</i> .....	25
3.2	RESULTS .....	27
3.2.1	<i>Screening for UV-sensitive alleles in L1 larvae</i> .....	27
3.2.2	<i>Identification of a novel xpg-1 allele is a proof of concept for the screening method</i> .....	30
3.2.3	<i>smc-5 is required for resistance to UV-induced DNA lesions in the C. elegans germline</i> .....	31
3.2.4	<i>smc-5 is dispensable for the repair of UV-induced lesions</i> .....	36
3.2.5	<i>SMC-5 functions in parallel to POLH-1-mediated TLS</i> .....	38
3.2.6	<i>SMC-5 is required when replication fork progression is impaired</i> .....	42
3.2.7	<i>BRC-1/BRD-1 mutations suppress defects in smc-5 activity</i> .....	44
3.2.8	<i>Rescue of defects of the smc-5 mutant by suppression of BRC-1/BRD-1 complex is partially mediated by POLH-1</i> .....	45
3.3	DISCUSSION .....	49
3.3.1	<i>Landscape of EMS-induced mutations</i> .....	49
3.3.2	<i>The ATPase domain of SMC-5 is essential for UV-resistance</i> .....	49
3.3.3	<i>The mutagenicity of DNA repair pathways</i> .....	50
3.3.4	<i>Restoring replication stress resistance in the absence of SMC-5/6 complex</i> .....	53
IV	ROLE OF MICRORNAS IN THE UV-RESPONSE OF YOUNG <i>C. ELEGANS</i> LARVAE .....	57

4.1	INTRODUCTION .....	57
4.1.1	miRNA synthesis.....	58
4.1.2	miRNA maturation.....	58
4.1.3	Posttranscriptional gene silencing .....	60
4.1.4	miRNA classification .....	61
4.1.5	Studying miRNAs.....	62
4.1.6	Aim of the study.....	65
4.2	RESULTS .....	66
4.2.1	Establishment of a deep sequencing approach to analyze the miRNA profile upon UV irradiation .....	66
4.2.2	Sequencing reveals regulation of small RNAs after irradiation with UV light. ....	68
4.2.3	Investigation of UV-dose-dependency and timing of the miRNA regulation. ....	72
4.2.4	let-7 and lin-4, mediators of larval transitions, are differentially expressed after UV irradiation. ....	74
4.2.5	mRNA target prediction of miRNAs with altered expression after UV irradiation. ....	81
4.3	DISCUSSION .....	84
4.3.1	Establishment of sequencing-based screening for UV-regulated miRNAs.....	84
4.3.2	lin-4 expression is repressed upon UV irradiation independently from DAF-16.....	84
4.3.3	miRNAs associated with L1 diapause state are induced upon UV-treatment. ....	85
4.3.4	Small RNA sequencing indicates UV-dependent regulation of a set of miRNAs .....	87
4.3.5	let-7 is downregulated in response to UV irradiation .....	88
4.3.6	UV-responsive miRNAs are predicted to fine-tune growth, development and MAPK signaling .....	90
V	MATERIAL & METHODS .....	92
5.1	C. ELEGANS CULTURE MAINTENANCE .....	92
5.2	SYNCHRONIZING WORMS .....	93
5.3	GENOTYPING OF WORM STRAINS.....	93
5.4	QPCR EXPRESSION ANALYSIS .....	95
5.4.1	RNA preparation .....	95
5.4.2	Quantitative real-time PCR .....	95
5.5	ISOLATION OF GENOMIC DNA .....	100
5.6	GFP REPORTER STRAIN ANALYSIS.....	101
5.7	IMMUNOSTAINING AND MICROSCOPY.....	101
5.8	DEVELOPMENTAL STAGING ASSAY.....	101
5.9	SCREENING FOR NOVEL UV-SENSITIVE C. ELEGANS STRAINS .....	102
5.9.1	EMS mutagenesis.....	102
5.9.2	Screening and selection of worms .....	102
5.9.3	SNP mapping of novel UV-sensitive alleles (Davis et al. 2005) .....	102

5.9.4	Whole genome sequencing.....	104
5.10	EGG-LAYING AND HATCHING RATE .....	104
5.11	GERMLINE DEVELOPMENT ASSAY .....	104
5.12	HU TREATMENT.....	104
5.13	RNAI-MEDIATED GENE KNOCKDOWN .....	105
5.14	GENERATION OF MALES FOR CROSSING .....	105
5.15	SMALL RNA SEQUENCING AND BIOINFORMATICAL ANALYSIS .....	106
5.15.1	small RNA sequencing .....	106
5.15.2	Data analysis .....	106
5.16	CPD REPAIR ASSAY USING SLOTBLOT .....	106
5.17	ANTIBODIES USED .....	107
5.18	GROWTH MEDIA & SOLUTIONS .....	107
5.18.1	Single worm lysis buffer.....	107
5.18.2	M9 buffer.....	107
5.18.3	NGM plates.....	108
5.18.4	RNAi plates .....	108
5.18.5	2x Freezing buffer .....	108
5.18.6	2x Bleaching solution.....	108
5.18.7	LB.....	109
5.18.8	LB-agar plates.....	109
5.18.9	PBS.....	109
5.18.10	50x TAE .....	109
5.18.11	TE buffer .....	109
5.18.12	0.5M EDTA.....	110
VI	LIST OF ABBREVIATIONS.....	110
VII	ACKNOWLEDGEMENTS .....	113
VIII	REFERENCES .....	113
