

Table of contents

List of figures	vi
List of tables	viii
Nomenclature	vii
1 Introduction	1
1.1 Background	1
1.2 Motivation	2
1.3 Literature review	4
1.4 Definition of objectives	6
1.5 Organization of content	6
2 Methodology of modeling	7
2.1 EAF dedusting system process description	7
2.2 Structure of the model	9
2.2.1 Process structure	9
2.2.2 Data structure	10
2.3 Approach of the mathematical modeling	12
2.3.1 Basic equations	12
2.3.2 Gas components	13
2.3.3 Properties calculation	14
2.4 Involved processes	16
2.4.1 Leak-air input	16
2.4.1.1 Bernoulli's equation method	16
2.4.1.2 Nitrogen method	17
2.4.1.3 Factor method	18
2.4.1.4 Forced draft fan method	18
2.4.2 Mixing and post-combustion	19
2.4.2.1 Post-combustion product	19
2.4.2.2 Post-combustion length	21
2.4.3 Cooling	25
2.4.3.1 Water spray	25
2.4.3.2 Cooling coil	26
2.4.4 Heat Transfer	28
2.5 Solving strategy	30
2.5.1 Modular base calculation	30

2.5.2	Solving algorithm.....	31
3	Heat transfer detail.....	33
3.1	Gas side heat transfer coefficient.....	34
3.1.1	Convective heat transfer coefficient	35
3.1.2	Radiative heat transfer coefficient	37
3.1.2.1	Emissivity of dust.....	40
3.1.2.2	Emissivity of gas.....	41
3.1.3	Gas side heat transfer coefficient in the case of post-combustion	44
3.2	Water side heat transfer coefficient	48
3.3	Environment side heat transfer coefficient.....	49
3.3.1	Convective heat transfer coefficient	49
3.3.2	Radiative heat transfer coefficient	52
4	Model implementation	54
4.1	Duct components	54
4.1.1	Water cooled duct	54
4.1.2	Water cooled duct with post-combustion	58
4.1.3	Uncooled duct	62
4.1.4	Water spray duct	64
4.2	Chamber components.....	66
4.2.1	Mixing chamber.....	66
4.2.2	Post-combustion chamber.....	69
5	Model application for heat recovery	73
5.1	Steam generation process description	73
5.2	Steam generation process simulation	74
5.3	Limitation for heat recovery steam application	77
6	Result and discussion	79
6.1	Integrated dedusting system model.....	79
6.1.1	Aim and structure of the integrated model	79
6.1.2	Graphical user interface for integrated dedusting system model	80
6.1.3	Result of the integrated dedusting system model	81
6.2	Sensitivity study on the parameters of the dedusting system model.....	82
6.3	Applications of the dedusting system model.....	85
7	Summary and outlook	87
8	Zusammenfassung und Ausblick.....	90

Reference.....	93
Appendix.....	95
