# CONTENTS

<b>Preface</b>	<b>xi</b>
<b>Chapter 1 The Product Design Process</b>	<b>1</b>
Overview	1
Objectives	1
Stages of the product design process	1
Case study 1.1	5
Complex design process models	7
The product life-cycle	13
Recap	17
<b>Chapter 2 Interfaces with Design</b>	<b>18</b>
Overview	18
Objectives	18
Marketing and design	18
Manufacturing and design	24
Purchasing and design	28
Other sources of design information	29
Information processing methods	30
Recap	34
<b>Chapter 3 Organisation and Teamwork</b>	<b>36</b>
Overview	36
Objectives	36
Organisational structures	37
Company organisation	37
Total quality management	42
Simultaneous engineering	45
Teams	47
Focus teams	49
Recap	52

<b>Chapter 4 Market Research Methods</b>	<b>53</b>
Overview	53
Objectives	53
The marketing function	53
Market segmentation	54
Collecting segmentation information	58
Case study 4.1	60
Assessing competitor products	62
Case study 4.2	63
Targeting the market	66
Market positioning	68
Case study 4.3	69
Marketing information	70
Marketing information systems	73
Recap	74
Assignments	75
<b>Chapter 5 Requirement Trees</b>	<b>77</b>
Overview	77
Objectives	77
Setting requirements	77
Case study 5.1	79
Communication and documentation	86
Recap	87
Assignments	88
Specifying importance	88
Communication and documentation	96
Recap	97
Assignments	97
<b>Chapter 6 Product Design Specifications</b>	<b>99</b>
Overview	99
Objectives	100
Alternatives, types, and features	100
Objectives and constraints	102
Case study 6.1	102
Reasons why a PDS is a dynamic document	107
Demands and wishes	109
Communication and documentation	110
Recap	112
Assignment	112
<b>Chapter 7 Creativity Methods</b>	<b>113</b>
Overview	113
Objectives	113
Factors predisposing to creativity	113
Brainstorming	116

Mindmapping	121
The gallery method	122
Problem decomposition	125
Case study 7.1	126
Case study 7.2	129
Morphology	130
Recap	133
Assignments	133
<b>Chapter 8 Evaluation and Selection</b>	<b>136</b>
Overview	136
Objectives	136
The need for evaluation	136
Ordering and ranking	138
Case study 8.1	139
Weighted evaluation	144
The effect of uncertainty	147
Case study 8.2	147
Communication and documentation	150
Other applications	152
Case study 8.3	152
Case study 8.4	153
Recap	156
Assignment	158
<b>Chapter 9 Market and Technology Risk</b>	<b>159</b>
Overview	159
Objectives	159
A risky business	159
Identifying and evaluating risk	163
Case study 9.1	166
Risk assessment	170
Controlling risk	171
Recap	171
Assignment	172
<b>Chapter 10 Value Analysis and Engineering</b>	<b>174</b>
Overview	174
Objectives	174
Value and the customer	174
Case study 10.1	175
Assignment 10.1	177
The component/function relationship	177
Attributing cost	178
The value analysis matrix	178
Case study 10.2	179
Value engineering or value analysis?	189

Limitations to the value method	190
Recap	190
Assignment 10.2	191
<b>Chapter 11 Failure Modes and Fault Trees</b>	<b>193</b>
Overview	193
Objectives	193
Consequences of failure	193
Fault trees	195
Assignments	199
Case study 11.1	200
Case study 11.2	200
Qualitative fault tree analysis	201
Case study 11.3	203
Identifying minimum cut sets using Boolean algebra	203
Assignment 11.3	206
Failure mode and effect analysis	207
Case study 11.4	212
Assignments	213
Failure mode, effects and criticality analysis	214
Case study 11.5	216
Case study 11.6	216
Recap	220
Assignments	220
<b>Chapter 12 Quality Function Deployment</b>	<b>221</b>
Overview	221
Objectives	221
Linking customer needs to product characteristics	222
Case study 12.1	225
Multiple QFD charts	228
Benefits and problems of using QFD	231
Communication and documentation	232
Recap	233
Assignments	234
<b>Appendices</b>	<b>235</b>
<b>References</b>	<b>279</b>
<b>Index</b>	<b>282</b>
