PART ONE

Introduction and Basic Issues in Program Evaluation 1

Chapter One • *The Program and Policy Evaluation Field: History, Types of Evaluation, Leading Controversies, and Some Agreed-upon Practice Wisdom* 1

A Brief History of Social Policy and Program Evaluation in the United States 2

Early Roots: Two Enduring Lessons from the First and Second Generations of the Practice of Program/Policy Evaluation 2

The Golden Age: The Third Generation of Program/Policy Evaluation 3 After the Boom Comes the Bust: The Years Since 1980 6

Bright Prospects for the Future: Fourth Generation Program and Policy Evaluation 6

Types of Social Policy and Social Program Evaluation 8

Principle: Choices Among Evaluation Types Should Be Based on the Questions One Wishes to Answer 9 Principle: Types of Evaluation are Specific to Organizational Self-Interest 10

Principle: Program and Policy Evaluations are Always Political in Nature 11 Quantitative and Qualitative Types of Program Evaluation 12

Major Problems and Controversies in the Field of Social Program and Policy Evaluation 16

The Paradigm Problem 17 The Measurement Problem 19

The Implementation Problem 21 The Utilization Problem 24

Chapter Two • *Ethics, Legal Issues, and Professional Standards in the Evaluation of Social Programs* 29

Introduction 29

Ethics in Conducting Evaluation Research 33

Important Concepts and Distinctions Relevant to Ethical
Issues 33

Types of Moral Principles 35

Ethical Premises in the Protection of Human Subjects Document 36

*Ethical Issues in the Program and Policy Evaluation Enterprise as Different
from Laboratory, Biomedical, and Behavioral Research* 37

Ethical Dilemmas 38

Ethical Issues in Protecting Individual Research Subjects 39

Informed Consent 40

**Chapter Three • Legal Issues and Professional Standards in Evaluation
Research** 46

Professional Standards 46

Basic Assumptions Underlying the ERS Standards 48

Standards for the Formulation Phase of an Evaluation Project 50

Standards for the Design and Structure of an Evaluation Project 50

Standards for Data Collection and Preparation 51

Standards for Analysis and Interpretation of Evaluation Data 51

Standards for Communication and Disclosure 51

Standards for the Use of Evaluation Results 52

A Critique of the Standards 52

Legal issues in Evaluation 62

Contract Performance 63 *Malpractice and*

Confidentiality 64 *Defamation of Character* 65

PART TWO

Evaluation in Initial Stages of Program Development 68

Chapter Four • Needs Studies 68

Conceptual Dimensions of Need 68

Assessment of Need 70

Identifying Needs 70

Need Technology 71

Methodology in Need Studies 73

Qualitative Approaches	74	Quantitative Approaches	86
Needs Assessment Survey	93	Multiattribute Utility	
Analysis	99		

<i>Controversies About Needs Studies</i>	101
--	-----

Chapter Five • Describing the Policy or Program Theory Base for Evaluation Purposes 107

<i>Introduction</i>	107
<i>The Importance of Program Theory</i>	107
<i>Differentiating Program Theory from the Theory of a Social Problem</i>	111
<i>Making Program Theory Explicit</i>	115

Chapter Six • The Assessment of Social Program Evaluability 119

<i>Information Needs</i>	121
Clarifying the Purpose of Program Evaluation	121
Reality Information	121
Information on Technical Feasibility	122
<i>Methodology in Evaluability Assessment</i>	125
Assessment of Purpose	125
Program Assessment	126
Feasibility Assessment	135
Human and Political Feasibility	138
<i>Evaluability Analysis and Decision Making</i>	139
Recommend Against Evaluation	142
Recommend Program Changes	142
Recommend Qualitative Evaluation	142
Recommend Partial Evaluation	143
<i>Controversies About EA</i>	143

Chapter Seven • Monitoring Social Policy and Program Implementation, Part I: Program Participants' Characteristics, Utilization, Selection Bias, and Discontinuance/Drop-Out Rates 147

<i>The Importance of Implementation Monitoring to Program Evaluation</i>	147
<i>The Status of Implementation Monitoring in Evaluation</i>	153
<i>Some Important Distinctions and Some Basic Terminology for Monitoring</i>	155
<i>Monitoring for Program Utilization, Selection Bias, and Program Discontinuance/Dropout</i>	156

Monitoring for Selection Bias	157	Monitoring to Determine the Extent of Program Utilization	161
-------------------------------	-----	---	-----

Summary	169
---------	-----

Chapter Eight • *Monitoring Social Policy and Program Implementation, Part II: Program Activities* 172

Introduction	172
--------------	-----

Three Implementation Errors	173
-----------------------------	-----

Constructing Program Specifications	179
-------------------------------------	-----

Observing Implementation	185
--------------------------	-----

Introduction	185	Choosing an Observational Strategy	186
--------------	-----	------------------------------------	-----

PART THREE

Quantitative Approaches to Program Evaluation 189

Chapter Nine • *Measurement Strategies in Program Evaluation* 189

By James A. Rosenthal and Kenneth R. Wedel

<i>Distinguishing Between Reliability and Validity</i>	189
--	-----

<i>Reliability: The Consistency of Measurements</i>	191
---	-----

Methods for Assessing Reliability	191	Reliability of Judgments and Observations	192	The Importance of Reliability	193
-----------------------------------	-----	---	-----	-------------------------------	-----

<i>Validity: Measuring What Is Intended</i>	194
---	-----

Definitions	194	Factors Influencing Validity	195
-------------	-----	------------------------------	-----

Reliability versus Validity	198	Multiple Measures	199
-----------------------------	-----	-------------------	-----

Measurement Tools	201	Developing Questions and Measures	203
-------------------	-----	-----------------------------------	-----

Conclusion	208
------------	-----

Chapter Ten • *Designing Research for Evaluating Outcomes* 212

Introduction	212
--------------	-----

Necessary Preliminaries to the Design of Research Evaluating of Program Outcomes	212
--	-----

<i>Drawing Conclusions About "Causal Relationships" in Evaluating Program Outcomes</i>	217
--	-----

Types of Validity	219
-------------------	-----

<i>Methods and Issues in Protecting the Validity of Findings</i>	220
--	-----

Introduction	220	Further Complications in Protecting the Validity of Findings	228	Paired Treatment—Withdrawal Designs	231	Generalizing Findings Across Places, Times, and People: External Validity	234
--------------	-----	---	-----	--	-----	--	-----

Chapter Eleven • *Cost-Effectiveness and Cost-Benefit Studies* 238

<i>Definition of Terms</i>	238
<i>Cost-Effectiveness Defined</i>	238
<i>Cost-Benefit Defined</i>	239
<i>Rudimentary Concepts in Cost-Effectiveness and Cost-Benefit Studies</i>	239
<i>Determination of Costs</i>	239
<i>Valuing Costs</i>	241
<i>Sensitivity Analysis</i>	243
<i>Cost Per Unit of Service</i>	243
<i>Applying Cost-Effective Analysis</i>	250
<i>An Example of Cost-Effectiveness Analysis</i>	250
<i>Applying Cost-Benefit Analysis</i>	255
<i>Identifying and Valuing Program Benefits</i>	255
<i>Discounting to Present Value</i>	257
<i>Comparing Costs and Benefits</i>	258
<i>An Example of Cost-Benefit Analysis</i>	260
<i>Controversies in Cost-Effectiveness and Cost-Benefit Analysis</i>	266

PART FOUR

***Alternative Approaches to Social Program Evaluation* 272**

Chapter Twelve • *A Critique of the Quantitative Approach to Program Evaluation* 272

<i>A Brief History of Evaluation from a Non-Quantitative Perspective</i>	272
<i>The First Critique: The Quantitative Approach Hasn't "Worked"</i>	275
<i>The Second Critique: The Quantitative Approach Can't Work Because Its Premises are Wrong</i>	277
<i>Arguments Regarding the Nature of Reality</i>	279
<i>Arguments Regarding the Nature of Research</i>	281
<i>Conclusions</i>	284

Chapter Thirteen • *Qualitative Research Methods and the Constructivist Paradigm in the Evaluation of Social Programs and Policies* 288

<i>Introduction</i>	288
<i>Supremacy</i>	289
<i>Synthesis</i>	290
<i>Contingency</i>	290
<i>Dialectic</i>	290
<i>Anything Goes</i>	291

<i>Evaluation Research Implications Based on a Paradigm Choice</i>	293
<i>Methodologic Consequences of the Constructivist Paradigm</i>	294
Natural Setting	294
Emergent Design	295
Human Instrument	296
Tacit Knowledge	296
Qualitative Methods	297
Grounded Theory	298
Purposive Sampling	299
Inductive Data Analysis	300
Problem-Determined Boundaries	300
Idiographic Interpretations	301
Tentative Application	302
Negotiated Results	302
Case Study Reporting Mode	303
Trustworthiness	304
<i>Principles of Constructivist Evaluation Practice</i>	304
<i>Methods of Constructivist Evaluation</i>	306
Research Design: Emergent Design, Problem-Determined Boundaries, Purposive Sampling	308
Data Collection and Recording: Qualitative Methods, Human Instrument, Tacit Knowledge	311
Data Analysis: Grounded Theory, Inductive Data Analytic Procedures	318
Reporting: Case Study Reporting Mode, Idiographic Interpretations, Tentative Application	321
Rigor: Trustworthiness, Negotiated Outcomes, Authenticity	322
<i>Distinctive Features of the Constructivist Evaluation and the Constructivist Evaluator</i>	328

Index	333
