PREFACE

xvii

Part I

The Elements of Air Pollution

1 *The History of Air Pollution*

I. Before the Industrial Revolution	3
II. The Industrial Revolution	4
III. The Twentieth Century	8
IV. The 1980s	14
V. The 1990s	15
VI. The Future	16
References	16
Suggested Reading	18
Questions	18

2 *The Natural versus Polluted Atmosphere*

I. The Atmosphere	19
II. Unpolluted Air	20
III. Particulate Matter	22
IV. Concepts	29

IV. Personnel	436
V. Advisory Groups	440
Suggested Reading	443
Questions	443

Part VI

The Engineering Control of Air Pollution

28	<i>Engineering Control Concepts</i>	
	I. Introduction	447
	II. Process Change	449
	III. Fuel Change	450
	IV. Pollution Removal	451
	V. Disposal of Pollutants	453
	VI. Pollution Prevention	455
	References	458
	Suggested Reading	458
	Questions	459
29	<i>Control Devices and Systems</i>	
	I. Introduction	460
	II. Removal of Dry Particulate Matter	462
	III. Removal of Liquid Droplets and Mists	474
	IV. Removal of Gaseous Pollutants	477
	V. Removal of Odors	485
	References	487
	Suggested Reading	487
	Questions	487
30	<i>Control of Stationary Sources</i>	
	I. Introduction	489
	II. Energy, Power, and Incineration	490
	III. Chemical and Metallurgical Industries	497
	IV. Agriculture and Forest Products Industries	509
	V. Other Industrial Processes	515
	References	521
	Suggested Reading	522
	Questions	522

31 *Control of Mobile Sources*

I. Introduction	523
II. Gasoline-Powered Vehicles	523
III. Diesel-Powered Vehicles	526
IV. Gas Turbines and Jet Engines	526
V. Alternatives to Existing Mobile Sources	527
References	530
Suggested Reading	530
Questions	530

32 *Source Sampling and Monitoring*

I. Introduction	532
II. Source Sampling	532
III. Statistics of Sampling	534
IV. The Source Test	536
V. Source Monitoring	547
References	552
Suggested Reading	552
Questions	552

INDEX

	References	33
	Suggested Reading	33
	Questions	33
3	<i>Scales of the Air Pollution Problem</i>	
	I. Local	35
	II. Urban	36
	III. Regional	37
	IV. Continental	38
	V. Global	38
	Suggested Reading	39
	Questions	39
4	<i>Air Quality</i>	
	I. Averaging Time	41
	II. Cycles	43
	III. Primary and Secondary Pollutants	44
	IV. Measurement Systems	47
	V. Air Quality Levels	48
	Reference	59
	Suggested Reading	59
	Questions	59
5	<i>The Philosophy of Air Pollution Control</i>	
	I. Strategy and Tactics—The Air Pollution System	61
	II. Episode Control	62
	III. Air Quality Management Control Strategy	66
	IV. Alternative Control Strategies	68
	V. Economic Considerations	70
	Reference	71
	Suggested Reading	71
	Questions	71
6	<i>Sources of Air Pollution</i>	
	I. General	72
	II. Combustion	78
	III. Stationary Sources	81
	IV. Mobile Sources	91
	V. Emission Inventory	92
	References	95
	Suggested Reading	96
	Questions	96

Part II

The Effects of Air Pollution

7	<i>Effects on Human Health and Welfare</i>	
	I. Air–Water–Soil Interactions	99
	II. Total Body Burden	101
	III. The Human Respiratory System	103
	IV. Impact of Air Pollution on Humans	106
	V. Impact of Odor on Humans	108
	References	108
	Suggested Reading	109
	Questions	109
8	<i>Effects on Vegetation and Animals</i>	
	I. Injury versus Damage	110
	II. Effects on Vegetation and Crops	112
	III. Effects on Forests	116
	IV. Effects on Animals	121
	References	124
	Suggested Reading	125
	Questions	125
9	<i>Effects on Materials and Structures</i>	
	I. Effects on Metals	126
	II. Effects on Stone	129
	III. Effects on Fabrics and Dyes	130
	IV. Effects on Leather, Paper, Paint, and Glass	132
	V. Effects on Rubber	133
	References	134
	Suggested Reading	135
	Questions	135
10	<i>Effects on the Atmosphere, Soil, and Water Bodies</i>	
	I. The Physics of Visibility	136
	II. Formation of Atmospheric Haze	144
	III. Effects of Atmospheric Haze	146
	IV. Visibility	148
	V. Acidic Deposition	149
	VI. Effects of Acidic Deposition	152
	References	153
	Suggested Reading	154
	Questions	155

11	<i>Long-Term Effects on the Planet</i>	
	I. Global Warming	156
	II. Ozone Holes	159
	References	161
	Suggested Reading	162
	Questions	162

Part III

Measurement and Monitoring of Air Pollution

12	<i>Atmospheric Chemistry</i>	
	I. Types of Atmospheric Chemical Transformations	165
	II. Role of Solar Radiation in Atmospheric Chemistry	167
	III. Gas-Phase Chemical Reaction Pathways	168
	IV. Heterogeneous Reactions	176
	V. Scavenging and Removal from the Atmosphere	176
	References	177
	Suggested Reading	177
	Questions	177
13	<i>Ambient Air Sampling</i>	
	I. Elements of a Sampling System	179
	II. Sampling Systems for Gaseous Pollutants	181
	III. Sampling Systems for Particulate Pollutants and PM ₁₀	186
	IV. Static Sampling Systems	189
	V. Sampler Siting Requirements	191
	VI. Sampling for Air Toxics	192
	References	193
	Suggested Reading	193
	Questions	193
14	<i>Ambient Air Pollutants: Analysis and Measurement</i>	
	I. Analysis and Measurement of Gaseous Pollutants	195
	II. Analysis and Measurement of Particulate Pollutants	203
	III. Analysis and Measurement of Odors	206
	IV. Analysis and Measurement of Visibility	208
	V. Analysis and Measurement of Acidic Deposition	209
	References	213
	Suggested Reading	214
	Questions	214

15	<i>Air Pollution Monitoring and Surveillance</i>	
	I. Stationary Monitoring Networks	216
	II. Mobile Monitoring and Surveillance	218
	III. Remote Sensing	221
	IV. Quality Assurance	222
	V. Data Analysis and Display	226
	References	227
	Suggested Reading	228
	Questions	228
16	<i>Air Pathways from Hazardous Waste Sites</i>	
	I. Introduction	229
	II. Multimedia Transport	230
	III. Contaminant Fate Analysis	230
	IV. Modeling	237
	References	240
	Suggested Reading	240
	Questions	240

Part IV

The Meteorology of Air Pollution

17	<i>The Physics of the Atmosphere</i>	
	I. Sun, Atmosphere System, and Heat Balance	243
	II. Stability and Instability	250
	III. Laws of Motion	257
	IV. Local Wind Systems	262
	V. General Circulation	268
	References	272
	Suggested Reading	273
	Questions	273
18	<i>The Meteorological Bases of Atmospheric Pollution</i>	
	I. Ventilation	275
	II. Stagnation	277
	III. Meteorological Conditions during Historic Pollution Episodes	278
	IV. Effects of Pollution on the Atmosphere	284
	V. Removal Mechanisms	286
	References	288
	Suggested Reading	289
	Questions	289

19	<i>Transport and Dispersion of Air Pollutants</i>	
	I. Wind Velocity	291
	II. Turbulence	293
	III. Estimating Concentrations from Point Sources	296
	IV. Dispersion Instrumentation	306
	V. Atmospheric Tracers	312
	VI. Concentration Variation with Averaging Time	315
	References	317
	Suggested Reading	318
	Questions	318
20	<i>Air Pollution Modeling and Prediction</i>	
	I. Plume Rise	321
	II. Modeling Techniques	324
	III. Modeling Nonreactive Pollutants	327
	IV. Modeling Pollutant Transformations	330
	V. Model Performance, Accuracy, and Utilization	332
	References	340
	Suggested Reading	343
	Questions	343
21	<i>Air Pollution Climatology</i>	
	I. Sources of Data	345
	II. Representativeness	349
	III. Frequency of Atmospheric Stagnations	352
	IV. Ventilation Climatology	354
	V. Wind and Pollution Roses	357
	References	362
	Suggested Reading	362
	Questions	362

Part V

The Regulatory Control of Air Pollution

22	<i>Air Quality Criteria and Standards</i>	
	I. Air Quality Criteria	367
	II. Conversion of Effects Data and Criteria to Standards	368
	III. Conversion of Physical Data and Criteria to Standards	373
	IV. Conversion of Biological Data and Criteria to Standards	376
	V. Air Quality Standards	377
	Suggested Reading	381
	Questions	381

23	<i>Indoor Air Quality</i>	
	I. Changing Times	382
	II. Factors Influencing Indoor Air Quality	384
	III. Indoor Air Pollutants	385
	IV. Effects of Indoor Air Pollutants	388
	V. Control of Indoor Pollutants	389
	References	394
	Suggested Readings	394
	Questions	394
24	<i>The U.S. Clean Air Act Amendments of 1990</i>	
	I. Introduction	395
	II. Titles	397
	References	406
	Suggested Reading	406
	Questions	407
25	<i>Emission Standards</i>	
	I. Subjective Standards	408
	II. Objective Standards	410
	III. Types of Emission Standards	411
	IV. Variant Forms of Emission Standards	411
	V. Means for Implementing Emission Standards	415
	References	418
	Suggested Reading	419
	Questions	419
26	<i>The Elements of Regulatory Control</i>	
	I. Control of New Stationary Sources	421
	II. Control of Existing Stationary Sources	422
	III. Control of Mobile Sources	423
	IV. Air Quality Control Regions	424
	V. Tall Stacks and Intermittent and Supplementary	
	Control Systems	425
	References	426
	Suggested Reading	426
	Questions	426
27	<i>Organizations for Air Pollution Control</i>	
	I. Functions	428
	II. Organization	431
	III. Finance	434
