Preface	vii
Notation	xiii

PART I. INTRODUCTION AND MODELS OF MANUFACTURING SYSTEMS

1

1. Concepts of hierarchical decision making	3
1.1 Introduction	3
1.2 A brief review of the literature	4
1.3 Our approach to hierarchical decision making	9
1.4 Plan of the book	10
2. Models of manufacturing systems	17
2.1 Introduction	17
2.2 A parallel-machine, single product model	18
2.3 A parallel-machine, multi-product model	21
2.4 A single product dynamic flowshop	22
2.5 A dynamic jobshop	24
2.6 Setup costs and setup times	26
2.7 Interaction with other functional areas	27

PART II. OPTIMAL CONTROL OF MANUFACTURING SYSTEMS: EXISTENCE AND CHARACTERIZATION

29

3. Optimal control of parallel machine systems	31
3.1 Introduction	31
3.2 Problem formulation	33
3.3 Properties of the value function	37
3.4 Turnpike sets with constant demand	42
3.5 Turnpike sets with reliable machines	50
3.6 Miscellaneous results	57
3.7 Notes	61
4. Optimal control of dynamic flowshops	63
4.1 Introduction	63
4.2 Problem formulation	65
4.3 Properties of the value function	67

4.4	An equivalent deterministic problem	71
4.5	HJBDD equations and boundary conditions	77
4.6	Extension of results to dynamic jobshops	80
4.7	Notes	80
PART III: ASYMPTOTIC OPTIMAL CONTROLS		83
5.	Hierarchical controls in systems with parallel machines	85
5.1	Introduction	85
5.2	Formulation of the single product case	87
5.3	Properties of the value function	90
5.4	The limiting control problem	91
5.5	Convergence of the value function	94
5.6	Asymptotic optimal feedback controls	98
5.7	A simple example	106
5.8	Capacity dependent on production rate	110
5.9	Machine states with weak and strong interactions	124
5.10	The multi-product case	128
5.11	Concluding remarks	128
5.12	Notes	129
6.	Hierarchical controls in dynamic flowshops	131
6.1	Introduction	131
6.2	Formulation of the m -machine flowshop	132
6.3	A special case: The two-machine flowshop	135
6.4	Construction of candidate open-loop controls	137
6.5	Preliminary results	141
6.6	Proof of asymptotic optimality	150
6.7	Concluding remarks	154
6.8	Notes	154
7.	Hierarchical controls in dynamic jobshops	157
7.1	Introduction	157
7.2	A graph-theoretic framework	159
7.3	The optimization problem	169
7.4	Lipschitz continuity	171
7.5	Asymptotic optimal open-loop controls	176
7.6	Concluding remarks	185
7.7	Notes	186

8. Hierarchical production and setup scheduling in a single machine system	187
8.1 Introduction	187
8.2 Problem formulation	188
8.3 HJB equations	195
8.4 The limiting decision problem	201
8.5 Asymptotic optimal open-loop decisions	207
8.6 Asymptotic optimal feedback decisions	211
8.7 A simple example	214
8.8 Concluding remarks	216
8.9 Notes	217
9. Hierarchical feedback controls in two-machine flowshops	219
9.1 Introduction	219
9.2 Original and limiting problems	220
9.3 An explicit solution of the limiting problem	223
9.4 An asymptotic optimal feedback control	228
9.5 Relationship to the Kanban control	244
9.6 Concluding remarks	246
9.7 Notes	247
PART IV: MULTILEVEL HIERARCHICAL DECISIONS	249
10. A production and capacity expansion model	251
10.1 Introduction	251
10.2 Problem formulation	254
10.3 Viscosity solutions of HJB equations	258
10.4 The limiting control problem	259
10.5 Verification theorems	265
10.6 Asymptotic optimal feedback decisions	267
10.7 Concluding remarks	274
10.8 Notes	275
11. Production-marketing systems	277
11.1 Introduction	277
11.2 Problem formulation and possible hierarchies	280
11.3 Analysis of the value functions	289
11.4 Asymptotic optimal feedback controls	293
11.5 Concluding remarks	301

11.6 Notes	302
PART V: COMPUTATIONS AND CONCLUSIONS	303
12. Computations and evaluation of hierarchical controls .	305
12.1 Introduction	305
12.2 Problems and policies under consideration	307
12.3 Computational issues	314
12.4 Comparison of HC with other policies	318
12.5 Concluding remarks	321
12.6 Notes	324
13. Further extensions and open research problems	327
13.1 Introduction	327
13.2 Asymptotic optimal feedback controls	328
13.3 Error bounds for feedback controls	331
13.4 Average costs and robust controls	331
13.5 General systems	332
13.6 Final thoughts	333
PART VI: APPENDICES	335
A. Finite state Markov chains	337
B. Martingale problems, tightness, and Skorohod representation	341
C. Rate of convergence of Markov chains	345
D. Control-dependent Markov chains	357
E. Convergence of Markov chains with two parameters ...	363
F. Convex functions	369
G. Viscosity solutions of HJB equations	371
H. Value functions and optimal controls	379
I. A review of relevant graph theory	385
J. Miscellany	387
Bibliography	393
Author index	411
Subject index	414
Copyright permissions	418
