## List of Tables and Figures

vii

|  |     |
|--|-----|
| Introduction: America's Children—Are We Doing Right by Them? <i>David E. Rogers</i>  | 1   |
| 1 Overview, <i>Eli Ginzberg</i>  | 6   |
| 2 Infant Mortality, <i>Nigel Paneth</i>  | 11  |
| 3 Prenatal Care: Who Gets It and Who Does Not? <i>Luella Klein</i>   | 27  |
| 4 Neonatology: Where Are We and What More Could We Do? <i>Marie C. McCormick</i>   | 33  |
| 5 The Status of Neonatology in New York City: The View from Harlem, <i>David Bateman</i>   | 45  |
| 6 Neurodevelopmental Dysfunction During Childhood: The High Impacts and Policy Implications of Insidious Handicaps, <i>Melvin D. Levine</i>          | 54  |
| 7 Improving Access to Care for Expectant Mothers and Young Children, <i>Paul W. Newacheck</i>  | 63  |
| 8 Can Home Visitation Improve the Health of Women and Children at Environmental Risk? <i>David L. Olds</i>   | 79  |
| 9 Identifying the Vulnerable Young Child, <i>Jeanne Brooks-Gunn</i>  | 104 |
| 10 Promoting Healthy Development in Young Children: What Educational Interventions Work? <i>Jeanne Brooks-Gunn</i>                                   | 125 |
| 11 A Multisite Randomized Intervention Trial for Premature, Low Birthweight Infants: The Infant Health and Development Program, <i>Ruth T. Gross</i> | 146 |

|                               |   |     |
|-------------------------------|---|-----|
| 12                            | Focusing on Effective Measures for Saving Children<br>at Risk, <i>Stephen C. Joseph</i> | 162 |
| 13                            | Summary, <i>David E. Rogers</i>   | 168 |
| <i>About the Contributors</i> |   |     |
|                               | <i>Cornell University Medical College</i>   | 173 |
|                               | <i>Sixth Conference on Health Policy</i>  | 175 |
|                               | <i>Index</i>  | 179 |

# Tables and Figures

## Tables

|      |   |     |
|------|---|-----|
| 2.1  | Comparison of mortality rates and potential years of life lost for three causes of death, 1985                                    | 12  |
| 2.2  | Causes of infant mortality as recorded on death certificates in the United States, 1980   | 15  |
| 2.3  | Prevalence of perinatal risk factors, relative risks, and population attributable risks for infant mortality, New York City, 1980 | 17  |
| 2.4  | Infant mortality in 1986 in several industrialized nations  | 19  |
| 7.1  | Public and public-private approaches to universal health coverage   | 74  |
| 8.1  | Randomized trials of prenatal home visitation   | 81  |
| 8.2  | Randomized trials of postnatal home visitation on child development and maternal teaching outcomes                                | 83  |
| 8.3  | Randomized trials of postnatal home visitation on child abuse and neglect and psychosocial outcomes                               | 86  |
| 11.1 | Significant primary outcome measures by study group   | 154 |

## Figures

|     |  |    |
|-----|--|----|
| I.1 | Housing status of children in New York City  | 3  |
| I.2 | Number of homeless families in New York City, 1960-1990  | 4  |
| 2.1 | Annual neonatal mortality rates, low birthweight rates, and very low birthweight rates per 1,000 live births in the United States, 1950-1987 | 21 |
| 2.2 | Proportion of live births born before 37 completed weeks of gestation by race in the United States, 1968-1987                                | 23 |

|      |  |     |
|------|--|-----|
| 6.1  | Cumulative effects, developmental functions,<br>and functional middle-childhood outcomes           | 55  |
| 11.1 | Reasons for infant exclusion   | 149 |
| 11.2 | Maternal race/ethnicity by site  | 150 |
| 11.3 | Maternal education by site   | 150 |
| 11.4 | Cumulative distributions of Stanford-Binet IQ scores<br>at 36 months                               | 155 |
| 11.5 | Percent in three birthweight groups with Stanford-Binet<br>IQ scores less than 70 and less than 85 | 155 |
| 11.6 | Cumulative distributions of the Child Behavior<br>Checklist scores at 36 months                    | 156 |
| 11.7 | Cumulative distributions of Mother's Report:<br>Morbidity Index, years 1 through 3                 | 157 |
