Introduction: The <i>In Vitro</i> Conceptus and Justice	1
1 A Basic Ethic for Man's Well-being:	
Conscience and the New Scientific Possibilities	16
I Conscience and science	16
II The new IVF technology: a brief history	20
III The Hippocratic perspective and the human conceptus	25
IV Can there be a 'simple case' of IVF?	29
V Conclusion: three general moral principles	35
2 IVF: Ethical Issues and Social Implications	36
I Setting the scene: central questions and problems	36
II Fundamental truths to be recognised: of moral order, of biological order	40
III Aims and means of IVF: what is permissible, what is desirable:	47
(i) Embryology for its own sake?	47
(ii) Generation of 'spare embryos'?	48
(iii) Grave risk of harm or death for those conceived by IVF?	50
(1) The well-being of the child	53
(2) Truth and social responsibility	54
3 IVF: The Basic Issue	57
I Major issues	57

II	The moral evaluation	59
III	The nature of the human embryo: development <i>into</i> a person or development of a person?	62
IV	What is morally desirable	68
4	The Human Being and the Right Not to be Killed	72
I	A controversial distinction: 'human beings' and 'human persons'	72
II	Human desires and human rights	75
III	Human nature and human rights	77
IV	The right not to be killed	80
V	Civil authority and human rights	83
5	What Kind of Being is the Human Embryo?	85
I	The concept of the human embryo	85
II	The Warnock Report's question: How is it right to treat the human embryo?	88
III	Two false theoretical frameworks: mechanistic Darwinism and Cartesian dualism	92
IV	The wholeness of the living being; twinning and recombination	97
V	Philosophy and the truths of Christian faith	101
6	Death and the Beginning of Life	110
I	The controversy concerning criteria for 'being dead' and for 'being alive'	110
II	'Brain death' as the basic criterion for death: physiological facts	116
III	Philosophical considerations:	121
	(i) 'The organism as a whole'	121
	(ii) Death: an irreversible state	124
	(iii) The irreversible loss of function and capacity	127
	(iv) A definition of death	129
IV	Death and conception compared	132
V	Three concluding remarks	137

7	European Legislation on Questions concerning Artificial Insemination: A Report made to the European Parliament	139
PART ONE		
I	The essential significance of 'artificial insemination':	140
	(i) The child newly conceived	140
	(ii) Human parenting	141
II	Human conception following technical interventions	142
PART TWO		
III	Moral questions	147
IV	Moral criteria	148
V	The current trend: a fundamental principle of justice is being abandoned	150
PART THREE		
VI	Criteria for determining 'full humanness'	153
VII	Conclusions and recommendations	157
	Notes	160
