CHAPTER 1: Environmental Management

OVERVIEW	1 - 1
Environmental Management: An Indispensable Component of the Iron and Steel Industry	
<i>J. Aloisi de Larderel, Director</i>	
<i>United Nations Environment Programme, France</i>	1 - 4
Clean Air Strategy in North Rhine-Westphalia from the Viewpoint of the Largest Steelmaking Region in the Federal Republic of Germany	
<i>Prof. Dr.-Ing. M. Pütz, Ministerialdirigent</i>	
<i>Ministry of the Environment, Germany</i>	1 - 7
Regulations, Technological Strategies, Costs of Pollution Control: Development in the Federal Republic of Germany	
<i>Prof. Dr.-Ing. J.A. Philipp, Leiter Konzernbereich Umweltschutz</i>	
<i>Thyssen Aktiengesellschaft, Germany</i>	1 - 14
Management of Environmental Control in the Japanese Steel Industry	
<i>M. Yoshida, General Manager, Environmental Control & Plant Safety,</i>	
<i>General Administration Division</i>	
<i>Nippon Steel Corporation, Japan</i>	1 - 23
Global Environmental Assurance - A Logical Concept	
<i>J. Voskamp, Director, Environmental Control & Physical Planning</i>	
<i>Hoogovens Groep BV, Netherlands</i>	1 - 54
Human Resource Development for Engineers in Environmental Aspects of the Steel Industry - A Case Study from India	
<i>S. Banerji, Manager - Training, Alloy Steels Plant</i>	
<i>Steel Authority of India Ltd., India</i>	1 - 61
An International Challenge: Environmental and Legal Realities in the Steel Industry	
<i>A. Kanner, Managing Partner</i>	
<i>Kanner & Guttman P.C.,</i>	
<i>D. Poulsen, Manager - Environmental Services, and</i>	
<i>R.J. Stanier, Vice President - Planning/Engineering</i>	
<i>California Steel Industries Inc., United States</i>	1 - 64
Efficient and Environmentally Compatible Utilisation of Energy in the Steel Industry of the Federal Republic of Germany	
<i>Dr. mont. H.M. Aichinger, Abteilungsleiter</i>	
<i>Verein Deutscher Eisenhüttenleute</i>	
<i>Dr.-Ing. G.W. Hoffmann, Betriebsdirektor, Energiewirtschaft und Umweltschutz</i>	
<i>Stahlwerke Peine-Salzgitter AG, and</i>	
<i>Dr.-Ing. M. Seeger, Direktor, Bereichsleiter, Zentralstelle Energie und Umwelt</i>	
<i>Hoesch AG, Germany</i>	1 - 81

	<u>Page</u>
The Carajas Mine Environmental Programme	
<i>E. Porto, General Manager, Environmental Control Division</i>	
<i>Companhia Vale do Rio Doce, Brazil</i>	1 - 98
Organisation and Management of Environmental Policies and Strategies for the Iron and Steel Industry in Turkey	
<i>S. Onur, Environmental Engineer</i>	
<i>Prime Ministry Undersecretariat for Environment, Turkey</i>	1 - 103
Pollution Control in the Iron and Steel Industry of China	
<i>Y. Liu, Environmental Information Dept.</i>	
<i>Central Research Institute of Building and Construction, and</i>	
<i>Q. Zhu, Safety and Environmental Protection Dept.</i>	
<i>Ministry of the Metallurgical Industry, China</i>	1 - 115
The Stocksbridge Steel Valley Project	
<i>P.R. Thompson, Personnel Director</i>	
<i>R. Moss, Senior Project Engineer, and</i>	
<i>T.J. Lodge, Gazette Editor</i>	
<i>Stocksbridge Engineering Steels, United Kingdom</i>	1 - 120
Improving the Physical and Visual Amenity of an Integrated Steelworks	
<i>D.A. Hodges, Environment Manager</i>	
<i>BHP Steel, Australia</i>	1 - 129
Importance of the Steel Industry in the Conservation of Resources	
<i>Secretariat of the United Nations/Economic Commission for Europe,</i>	
<i>Switzerland</i>	1 - 137
Communications Between the Public and the Steel Industry	
<i>Ing. J. Sigmund, Environmental Affairs Dept.</i>	
<i>VOEST-ALPINE STAHL AG, Austria</i>	1 - 148

CHAPTER 2: Waste Management

OVERVIEW	2 - 1
Management and Treatment of Wastes for Recycling	
<i>T.H. Weidner, Supervisor, Waste Management</i>	
<i>Bethlehem Steel Corporation, United States</i>	2 - 8
Soil Rejuvenation on Industrial Sites in the Iron and Steel Industry	
<i>Prof. Dr.-Ing. H.P. Johann, Hauptabteilungsleiter</i>	
<i>Mannesmann AG, Germany</i>	2 - 14
In Situ Neutralisation of Iron and Steel Industry Waste by a Specific Technique of Disposal	
<i>O. Dechelette, Research Manager</i>	
<i>LECES, France</i>	2 - 29

	<u>Page</u>
A Total Management System for Steelworks Waste	
<i>A. Shimizu, Manager, Environmental Control & Plant Safety Section Kobe Steel Ltd., Japan</i>	2 - 39
Waste Recycling System for Stainless Steel Production	
<i>Y. Fujiwaki, General Manager, Environmental Control & Plant Safety Office, and K. Oki, Assistant Manager Nisshin Steel Company Limited, Japan</i>	2 - 48
Utilisation of By-products of the Steel Industry in the Federal Republic of Germany	
<i>Dr.-Ing. M. Kühn, Head of Department, and Dr.-Ing. J. Geiseler, Geschäftsführer Forschungsgemeinschaft Eisenhüttenschlacken Forschungsinstitut, Germany</i>	2 - 56

CHAPTER 3: Air Pollution Control

OVERVIEW	3 - 1
Air Pollution and Noise Control in Electric Steel Plants	
<i>Dr.-Ing. K. Polthier, Hauptabteilungsleiter, Umwelttechnik Dipl.-Ing. D. Marchand, Lüftung und Planung, and Ing. H-U. Haering, Abteilungsleiter, Hauptabteilung Umweltschutz BFI Betriebstechnik GmbH, Germany</i>	3 - 4
Environmental Protection: A Challenge for Modern Innovative Cokemaking Technology	
<i>Dr.-Ing. W. Stewen, Projektleitung Neubau Kokerei Kaiserstuhl III, and Dr. rer. H. Bertling, Werksdirektor Ruhrkohle Niederrhein AG, Germany</i>	3 - 16
Low Nitrogen Oxide Combustion Techniques in Gas and Oil Fired Equipment	
<i>Dr. A. Milani, Senior Investigator Centro Sviluppo Materiali, Italy</i>	3 - 33
Desulphurisation of Sinter Waste Gas at NKK	
<i>Y. Matsunaga, Assistant Manager, Technical Dept., Ironmaking Division R. Nakajima, General Manager, Environmental Control Dept. S. Kurosawa, Superintendent, Sintering and Ore Treatment plant, and Y. Natori, Manager, Ironmaking Technical Dept. NKK Corporation, Japan</i>	3 - 45
Energy Efficient Particulate Emissions Control	
<i>R.F. Scott, Investigator, Environmental Services Dept. G.D. Hall, Senior Investigator, Environmental Services Dept. G. Moy, Investigator, Environmental Services Dept., and D. Taylor, Principal Engineer, Environmental Services Dept. British Steel plc, United Kingdom</i>	3 - 56

Measurement and Monitoring System for Air Pollutants at Mizushima Works, Kawasaki Steel Corporation	
<i>N. Tsuboi, Manager, Environmental Control & Energy Dept. Kawasaki Steel Corporation, Japan</i>	3 - 71
Odour Characterisation and Control of Volatile Odoriferous Compounds in Coke and Steel Industries	
<i>Prof. J. Hermia, Professor Université Catholique de Louvain, S. Vigneron, Research Engineer, and C. Slingeneijer, Research Engineer Société Belge de Filtration, Belgium</i>	3 - 84
New Methods to Improve Noise Abatement and Control in Iron and Steel Plants	
<i>P. Le Louer, Ingénieur, Service Acoustique G. Engler, Technicien Supérieur LECES, France J. Nemerlin, Ingénieur Chef de Laboratoire, and P. Delatte, Ingénieur de Recherches CEDIA, Belgium</i>	3 - 105
The Application of an Air Dispersion Model to Predict Air Quality Around a Steel Complex	
<i>S.W. Ham, H.D. Chun, Energy Planning Dept., and Dr. J.O. Choi, Executive Counsellor, Energy Planning Sect., Energy Planning Dept. Research Institute of Industrial Science and Technology, Korea</i>	3 - 118
Experience from Nitrogen Oxide Removal and Acid Recovery in Stainless Steel Pickling	
<i>S-E. Lunner, Manager of Process Chemistry, Research & Development Avesta AB, I. Dahlin, Technical and Marketing Manager, and T. Berglind, Technical Service Engineer Eka Nobel AB, Sweden</i>	3 - 124
Environmental Improvements for Minimills: Recent Developments and Future Trends	
<i>L.L. Teoh, Associate Professor, School of Mechanical and Production Engineering Nanyang Technological Institute, Singapore</i>	3 - 131

CHAPTER 4: Water Pollution Control

OVERVIEW	4 - 1
Waste Water Control in the Japanese Iron and Steel Industry	
<i>T. Nagasawa, General Manager, Environmental Pollution Control, and T. Kawaura, Staff Manager, Environmental Control Section Sumitomo Metal Industries Ltd., Japan</i>	4 - 5

	<u>Page</u>
Recent Developments in the Treatment of Coke Oven Waste Water <i>B.E. Prater, Manager - Environmental Services, and</i> <i>R. Fisher, Environmental Services Dept.</i> <i>British Steel plc, United Kingdom</i>	4 - 18
New Findings on the Way to a Waste Water Free Operation of a Coke Oven Plant <i>Dr.-Ing. W. Eisenhut, Director, Institute for Cokemaking and Coal Chemistry, and</i> <i>Dr.rer.nat. F. Orywal, Manager Gas Cleaning and By-product Recovery</i> <i>Deutsche Montan Technologie, and</i> <i>Dr.-Ing. G. Pollert, Manager, Gas Cleaning and By-product Recovery</i> <i>Still Otto GmbH, Germany</i>	4 - 37
The Steel Industry and Hamilton Harbour - A Remedial Action Plan <i>T.E. McGuire, Environmental Coordinator Water Management</i> <i>M.S. Greenfield, Director Environmental Control, and</i> <i>J.N. Lockington, Manager Quality and Technology</i> <i>Dofasco Steel, Canada</i>	4 - 42
Establishment of Activated Sludge Treatment of Ammonia Liquor from a Coke Plant <i>Dr. M. Fujii, Senior Researcher, R&D Laboratories</i> <i>Nippon Steel Corporation, Japan</i>	4 - 62

CHAPTER 5: Occupational Health and Safety

OVERVIEW	5 - 1
The Management of Safety and Emergency Situations <i>D.J. Evans, Head of Health and Safety</i> <i>British Steel plc, United Kingdom</i>	5 - 4
Developments in Hygiene Management in a Japanese Steelworks <i>T. Isayama, Senior Manager, Safety & Environment, Labor Relations Div.</i> <i>H. Shiki, Assistant Manager, Safety & Environment, Labor Relations Div.</i> <i>K. Inoue Assistant Manager, Safety & Environment, Labor Relations Div., and</i> <i>H. Miura, Assistant Manager, Safety & Environment, Labor Relations Div.</i> <i>Nippon Steel Corporation, Japan</i>	5 - 15
Control Systems for the Introduction of Chemical Substances into the Works <i>H.H. Eisler, General Environmental Control Manager, and</i> <i>A. Sebestyen, Industrial Hygienist</i> <i>Stelco Inc., Canada</i>	5 - 59
Workplace Monitoring and Data Analysis in the Steel Industry <i>Dr. F.M. Toca, Director - Industrial Hygiene & Compliance, and</i> <i>D.E. Burry, Health Systems Administrator</i> <i>USX, United States</i>	5 - 70

The Processing of Materials Containing Nickel: Industrial Hygiene Aspects	
<i>Dr. med. H. Groß, Company Medical Officer</i>	
<i>Motoren- und Turbinen-Union GmbH, Germany</i>	5 - 79
Dofasco's Approach to Managing Occupational Health and Safety	
<i>D.C.F. Wilson, Director of Safety</i>	
<i>A.A. Kerr, Director Occupational Hygiene, and</i>	
<i>J.N. Lockington, Manager Quality and Technology</i>	
<i>Dofasco Steel, Canada</i>	5 - 90
Comparative Study of Workers' Morbidity in some Sectors of the Steel Industry	
- Preliminary Results	
<i>L.C. de P. Schumacher, Civil and Safety Engineer</i>	
<i>Companhia Siderúrgica Paulista, Brazil</i>	5 - 109
Biological Monitoring in the Steel Industry	
<i>Dr. R.W. Hart, Director, Occupational Health and Safety</i>	
<i>BHP Steel, Australia</i>	5 - 125

CHAPTER 6: Carbon Dioxide as a Global Issue
--

OVERVIEW	6 - 1
Technologies to Contend with Global Environmental Issues	
<i>Prof. J. Ando, Dean, Post Graduate School, Faculty of Science and Engineering</i>	
<i>Chuo University, Japan</i>	6 - 3
Steel Industry Measures to Reduce Carbon Dioxide Emissions	
<i>Y. Shinohara, General Manager, Environmental Control & Energy Dept.</i>	
<i>Kawasaki Steel Corporation, and</i>	
<i>M. Yoshida, General Manager, Environmental Control & Plant Safety,</i>	
<i>General Administration Division</i>	
<i>Nippon Steel Corporation, Japan</i>	6 - 15
