 CONFERENCE HIGHLIGHTS: A DRAFT AGENDA FOR THE FUTURE	 1
 PLENARY SESSION 1: OPENING AND KEYNOTE SPEECHES	 11
Opening Address: <i>Hon. A. Griffiths, MP, Minister for Resources, Australia</i>	13
Coal Outlook and the Role of the International Energy Agency: <i>H. Steeg, Executive Director, International Energy Agency</i>	19
Developing Energy Industry and Protecting the Global Environment: <i>Hu Fuguo, Vice-Minister, Ministry of Energy, China</i>	25
New Coal Policy with Consideration Toward Global Environmental Problems: <i>Y. Doi, Director General, Coal Department, Agency of Natural Resources and Energy, Ministry of International Trade and Industry, Japan</i>	29
Coal's Contribution to Future Energy Needs: <i>R. Annerberg, Director General, Swedish Environmental Protection Agency, Sweden</i>	33
Coal, The Environment and Development: The Role of the Asian Development Bank: <i>A.D. Burrell, Manager, Power Division West, Asian Development Bank, The Philippines</i>	39
Energy, Environment and Development: A Challenge to All Nations: <i>M. Taniguchi, Deputy Secretary-General, Organisation for Economic Co-operation and Development</i>	43

PLENARY SESSION 2: INTRODUCTORY AND OVERVIEW PAPERS 49

INTRODUCTORY PAPERS

The Status of the Science of Global Climate Change: 51
J.W. Zillman, Commonwealth Bureau of Meteorology and World Meteorological Association, Australia

Policy-Making under Conditions of Uncertainty: 87
S. W. Gouse, MITRE Corporation, United States

Coal's Future in the Energy Mix: 101
I. Fujiwara, Electric Power Development Company, Japan

OVERVIEW PAPERS

109
Coal's Proportional Contribution to the Greenhouse Effect:
I.M. Smith, IEA Coal Research, United Kingdom

Coal's Role in Meeting Future Energy Demand: 123
I.R. McCauley, Australian Coal Association, Australia

The Greenhouse Gas Performance of Power Sector Coal Utilisation Technologies: 131
I.M. Torrens, Electric Power Research Institute, United States

The Greenhouse Gas Performance of Advanced Steelmaking Technologies: 149
R.J. Batterham and D.S. Conochie, CRA Limited, Australia

Technology Co-operation for Energy Development: 163
S. Schweitzer, Agency for International Development, United States

Benefits and Barriers to Deployment of Clean Coal Technologies: 177
J.S. Siegel, G. Rudins, J. Temchin and B. McKee, Department of Energy, United States

	<u>Page</u>
WORKSHOP 1: COAL'S CONTRIBUTION TO GREENHOUSE GAS EMISSIONS AND FUTURE ROLE IN MEETING ENERGY DEMAND	189
 GREENHOUSE GAS EMISSIONS/EFFECTS AND ISSUES	
Issues and Approaches for Comparative Full Fuel Cycle Analysis: <i>R.W.A. Legassie, Technology and Management Services, United States</i>	191
Greenhouse Gas Emissions from Coal Combustion: A Global Perspective: <i>R.L. Kane, Department of Energy; W.B. Ashton, and B.R. Kinzey, Battelle Pacific Northwest Laboratory, United States</i>	197
Global Model Simulations of Energy Requirements and CO₂ Emissions: <i>A. Onishi, Soka University Institute for Systems Science, Japan</i>	215
Structure of Energy Consumption and Trends of Emission of Atmospheric Species Related to the Global Change in Asia: <i>N. Kato, National Institute of Science and Technology Policy, Japan</i>	225
Coal Consumption Status and Strategy of Energy Development in China: <i>Yu Yongnian, Central Coal Mining Research Institute, China</i>	235
Fossil Fuel Resources and CO₂ Concentration: <i>M. Suma, Idemitsu Kosan Co., Japan</i>	243
Methane Gas Emission from Coal Mining in Australia: Estimates and Control Strategies: <i>R.D. Lama, Kembla Coal and Coke Pty., Australia</i>	255
Contribution of Clean Coal to Reducing Greenhouse and Associated Gas Emissions: <i>G.B. Smith, Australian Coal Industry Research Laboratories, Australia</i>	267
 COAL'S ROLE IN MEETING ENERGY DEMAND	
Future Demand for Steam Coal in North-East and South-East Asian Countries: <i>T. Kimura, Institute of Energy Economics, Japan</i>	279
Australia: Outlook for Coal Demand and Supply: <i>T. Haraldson, New South Wales Coal Association and Coal and Allied Industries, Australia</i>	287
Coal's Future Role in Meeting Energy Demand in India: <i>K.K. Misra, Government of India, Ministry of Coal, India</i>	297
The Current and Future Role of Coal in Meeting the Energy Demand for Power in Indonesia: <i>A. Andoyo, Department of Mines and Energy, Indonesia</i>	303
Is the Future of Coal in Korea Promising or Dismal?: <i>H. Lee and J. Park, Korea Energy Economics Institute, Republic of Korea</i>	313

Coal in Malaysia: Prospect for Future Demand:	325
<i>M. Annas H.J. Mohd Nor, Department of Electricity Supply, Malaysia</i>	
Coal, Answer to Pakistan's Power Needs:	329
<i>G.M. Ilias, Ministry of Water and Power, Pakistan</i>	
Taiwan's Current and Projected Coal Demand:	337
<i>R.C.T. Hsu, Taiwan Power Company, Taiwan</i>	
Thailand: EGAT's Current and Projected Lignite and Coal Demand:	345
<i>T. Sopondisya, Electricity Generating Authority of Thailand, Thailand</i>	
RAPPORTEURS' REPORT	357
<i>D. Cain, Pacific Coal Pty., Australia</i>	
<i>C.J. Johnson, East-West Centre, United States</i>	
WORKSHOP 2: TECHNOLOGY ASSESSMENTS AND TRENDS	361
ELECTRIC POWER TECHNOLOGIES: AVAILABLE "BEST PRACTICE"	
Overview of Efficient and Clean Coal Use:	363
<i>E. Yugeta, Center for Coal Utilisation, Japan</i>	
Topping Gas Turbines, Concepts for New Plants and for Repowering:	373
<i>U. Häuser, ABB Kraftwerke AG, Germany</i>	
An Australian Electricity Industry View of Advanced Coal Technologies for Power Generation:	383
<i>J.A. Hart, State Electricity Commission of Victoria and P.V. Smith, Electricity Commission of New South Wales, Australia</i>	
Best Practice Technology for Low Rank Coals:	393
<i>T.R. Johnson, State Electricity Commission of Victoria, Australia</i>	
ELECTRIC POWER TECHNOLOGIES: ADVANCED SYSTEMS	
Status and Development Potential for PFBC Plants:	405
<i>S.A. Jansson, ABB Carbon AB, Sweden</i>	
Advanced Coal Burning Systems for Power Generation:	411
<i>S.G. Dawes, P.J. Cross, A.J. Minchener and J.M. Topper, British Coal Corporation, Coal Research Establishment, United Kingdom</i>	
The Shell Coal Gasification Process: Clean Coal Technology for Power Generation with High Efficiency:	421
<i>J.-B. Wijffels, Shell International Petroleum, The Netherlands</i>	

Combined Cycle (IGCC) with Prenflo and Its Contribution to Reducing Greenhouse Gas Emissions: <i>W. Schellberg, Krupp Koppers, Germany</i>	427
From Research to Reality, The "Kobra" IGCC Project: <i>W. Adlhoch, Rheinbraun AG; H. Bergmann, RWE Energie; L. Plass, Lurgi, Germany and C. Hamilton, Lurgi (Aust) Pty., Australia</i>	437
Molten Carbonate Fuel Cell Power Generation System Combined with Coal Gasification: <i>Y. Hishinuma, Hitachi Ltd., and T. Abe, Central Research Institute of Electric Power Industry, Japan</i>	447
Magneto Hydrodynamic Electrical Power Generation: <i>H.K. Messerle, University of Sydney, Australia</i>	455
Next Generation Coal-used Electricity Generating System: <i>M. Sato, H. Ishikawa and T. Hamamatsu, Central Research Institute of Electric Power Industry, Japan</i>	463
Comparative Assessment of Best Practice and Advanced Power Generation Technologies from an Utility Perspective: <i>Y. Nakabayashi, Electric Power Development Company, Japan</i>	473
The Costs and Benefits for Australia of Adopting New Coal Burning Technologies: <i>B. Jones, Peng Zhaoyang and B. Naughten, Australian Bureau of Agricultural and Resource Economics, Australia</i>	485
Coal Based Combined Heat and Power Production: <i>J.H. Ricken, IFV Power Company, Denmark</i>	499
Coal Refining Carbonization in Total Hydrocarbon Processing System: <i>I. Mochida, Institute of Advanced Material Study, Kyushu University, Japan</i>	509
The Direct Iron Ore Smelting Reduction (DIOS) Process of Japan Iron and Steel Federation: <i>K. Kanamori, Japan Iron and Steel Federation, Japan</i>	517
CO₂ Removal and Disposal: <i>A.R. Jack, IEA Greenhouse Gas R&D Programme, United Kingdom</i>	527
RAPPORTEURS' REPORT	539
<i>J. Sligar, Electricity Commission of New South Wales, Australia</i> <i>A.R. Jack, IEA Greenhouse Gas R&D Programme, United Kingdom</i> <i>K. Thambimuthu, IEA Coal Research, United Kingdom</i>	

WORKSHOP 3: INDUSTRIALISING COUNTRY NEEDS, OPTIONS AND ECONOMIC DEVELOPMENT: TECHNOLOGY TRANSFER AND UPGRADING	543
TECHNOLOGY NEEDS AND OPPORTUNITIES: OVERVIEWS	
Coal, The Environment and Development: Technologies to Reduce Greenhouse Gas Emissions: <i>A.D. Burrell, Asian Development Bank, The Philippines</i>	545
Advanced Coal Technologies: Issues Relating to Sustainable Industrial Growth in Developing Countries: <i>J.W. Byam Jr., United Nations Industrial Development Organisation, Austria</i>	569
Opportunity for Integrated Coal Utilization Systems in Developing Countries and Evaluation for Coal Energy and Chemical Complexes: <i>M. Ishiguro, Nomura Research Institute Ltd., Japan</i>	579
TECHNOLOGY NEEDS AND OPPORTUNITIES: COUNTRY CASE STUDIES	
Urban Air Pollution From Coal Combustion and Its Countermeasures: <i>Zhang Yutian, Chinese Research Academy of Environmental Sciences, China</i>	587
Coal Use for Power Generation in India: Needs and Options: <i>K. Sridhar and A. Terway, National Thermal Power Corporation, India</i>	593
Innovative Technology Needs and Options for Power Generation in India: <i>R.K. Iyengar, Council of Scientific and Industrial Research, India</i>	603
Coal Industry Development in Meeting Energy Demand in Indonesia: <i>A. Mangunwidjaya, PT Tambang Batubara Bukit Asam, Indonesia</i>	615
The Effect of Gas Emissions from Coal Fired Power Generations and Cement Industries on the Environment in Indonesia, Case Histories from Jawa Island: <i>U.W. Soelistijo, D. Muljadihardja and S. Suprpto, Ministry of Mines and Energy, Indonesia</i>	625
Clean Coal Technology - An Option for Malaysian Power Generation Industry: <i>A.H. Shamsuddin and K. Sopian, University of Kebangsaan; S. Sairan and H. Hashim, Tenaga Nasional Berhad, Malaysia</i>	641
Introducing More Efficient/Low Emission Energy Technologies in the Philippines: <i>R.B. Bomasang, Office of the President of the Philippines, The Philippines</i>	651
Lignite Briquette Development in Thailand: <i>P. Sutabutr, National Energy Administration, Thailand</i>	661
Coal's Use and Its Effects on the Environment in Vietnam: <i>Ngoc Anh Vien, Power Company Number 1, Vietnam</i>	677

TECHNOLOGY TRANSFER

Co-Research and Co-Development for Practical Use of Semi Dry Type SO₂ Removal System with Developing Country and its Expected Results. An Example with Indonesia: <i>K. Fujii, Corporate Marketing and Business Development Group, Japan</i>	681
Feasibility Assessment of Integrated Gasification Combined Cycle (IGCC) Power Technology - A Case Study of Collaborative Clean Coal Technology Application: <i>R.K. Iyengar, Council of Scientific and Industrial Research, India, and F.V. Karlson, Bechtel Corporation, United States</i>	693
Demonstration of Advanced Coal-Based Electricity Generating Plant for Australia and the Pacific Rim: <i>O. Tassicker, State Electricity Commission of Victoria, Australia</i>	709
UNDP Training Programme: <i>J.M. Wilcox, Joint Coal Board, Australia</i>	723
Financing of Energy Projects in Developing Countries - Requirements and Options: <i>A.K. Malhotra, World Bank, United States</i>	729
Technology Options and Policies for Thermal Power in India in the Context of Climate Change: <i>P. Ghosh, Tata Energy Research Institute, India</i>	745
RAPPORTEURS' REPORT <i>A. Kinoshita, Electric Power Development Company, Japan</i> <i>A.K. Malhotra, World Bank, United States</i>	761
WORKSHOP 4: MARKET BARRIERS AND APPROPRIATE TECHNOLOGY STRATEGIES	767
EFFECTS OF MARKET BARRIERS AND NON-TECHNOLOGY STRATEGIES	
Evaluation of Market Barriers to Technology Deployment: <i>I.R. Maitland, Merz Australia Pty., Australia</i>	769
The Role of Markets and Pricing Policy in the Development of Clean Coal Technologies: <i>B. Bowen, G. Anthony and F. Freeman, Australian Bureau of Agricultural and Resource Economics, Australia</i>	777
Privatisation, Regulation and Technology Innovation in England and Wales: <i>P.F. Chester, National Power Plc., United Kingdom</i>	785
Macro-Economic Effects of Policy Measures on Global Climate Change: <i>K. Yamaji, University of Tokyo, Japan</i>	791
Coal, the Environment and Development: Legal Issues: <i>F.M. Hooke and D. Craig, Baker and McKenzie, Solicitors, Sydney, Australia</i>	801

	<u>Page</u>
NATIONAL AND INTERNATIONAL R&D PROGRAMMES	809
Government Support for Technology R&D and Deployment: <i>J. Madden and R. Johnston, University of Wollongong, Australia</i>	
The International Coal R&D Co-operation Programme of the International Energy Agency: <i>R. Stuart, International Energy Agency</i>	819
COUNTRY CASE STUDIES	
The Zhaotong Lignite Integrated Mine and Power Station Project, A Case Study for Coal Technology Deployment and Transfer: <i>R. McD. Touzel, State Electricity Commission of Victoria, Australia</i>	823
Market Barriers and Appropriate Technology Strategies for Coal Use Technology Development: <i>Xianhong Bai, State Science and Technology Commission and Jian Ping Wen, Research Centre for Eco-environmental Science, China</i>	835
Market Barriers and Appropriate Technology Strategies: <i>R. Annerberg, Swedish Environmental Protection Agency, Sweden</i>	843
The Way Forward for Long-Term Coal Research, Development and Demonstration in the UK?: A Proposed New Strategy to Develop Technologies to Reduce Greenhouse Gas Emissions: <i>A. Heyes, Department of Energy, United Kingdom</i>	845
RAPPORTEURS' REPORT	851
<i>S. Hearn, Department of Primary Industries and Energy, Australia</i> <i>R. Stuart, International Energy Agency</i>	
OCCASIONAL SPEECHES	855
Greenhouse: Political Posturing or Sensible Solutions?: <i>J.T. Ralph, CRA Ltd., Australia</i>	857
Perspectives on Sustainability and Global Climate Change: <i>K.E. Yeager, Electric Power Research Institute, United States</i>	865
CLOSING REMARKS <i>S. Garribba, Director, Energy Technology and R&D, International Energy Agency</i>	869
CONFERENCE CHAIRMEN, RAPPORTEURS AND PANELLISTS	875
CONFERENCE STEERING AND PROGRAMME COMMITTEES	881
CONFERENCE PARTICIPANTS	887
