Contents

Part I
Introduction

1 The challenge of network organizations - An introductory survey 1
2 Philosophy-of-science assumptions 5
3 Nominal definitions, and structure of the thesis 9

Part II
Business Networks - Empirical Evidence and Theoretical Explanations

1 Business networks as a new organizational form 19
1.1 New organizational forms as a response to environmental changes 19
1.11 From production to information society, and the emergence of new organizational forms 19
1.12 Empirical trends in cooperative and networking activities 25
1.2 Networks between markets and hierarchies 39

2 Managing business networks: Requirements for scientific research and managerial practice 64
2.1 Requirements for a theory of business network management 65
2.2 'Scientific' knowledge about the management of business networks 66
2.21 Economic theories 70
2.22 Dependence theories 77
2.23 Environmental adaptation theories 81
2.3 Relevance of 'scientific' knowledge about business networks 94

3 Summary and conclusions of Part II 101

Part III
The Knowledge Base of Business Network Management - From 'Scientific' to 'Subjective' Theories

1 Assumptions about rationality and knowledge 105
1.1. Rationality and its limits 105
1.2 'Bounded rationality' and beyond 110
1.3 Rationality as subjective construction 116

2 Subjective theories as the basis of business network management 130
2.1 Introduction to subjective theories 130
2.11 Definition and a brief history of subjective theories 130
2.12 Status of subjective theories 138
2.13 Functions of subjective theories 141
2.2 The development of subjective theories 145
2.21 Traditional perspectives of individual and organizational learning 145
2.22 Learning in communities of practice 154

3 Summary and conclusions of Part III 158

Part IV
An inquiry into managers' subjective network theories in the multimedia industry

1 Introduction to the empirical study 162
1.1 Industry choice and industry structure 162
1.2 Research questions 171

2 A business network between multimedia companies 173
2.1 Introduction 173
2.2 Design of the study 181
2.21 Methodological considerations, and choice of method(s) 181
2.22 Choice of sample and instrumentation 192
2.23 Data analysis 194

2.3 Managers' subjective network theories 197
2.31 Network categories: How managers define networks, motives, and strategic relevance of cooperative relations 198
2.32 Network management: What managers perceive as important variables of business network management 213
2.321 One network culture, one understanding? — the example of mediaWays 213
2.322 Trust versus contractual relations in business networks — the example of bsmedic 225
2.323 Coordination and information policies in business networks — the example of Pixelpark 239
2.324 Intermediate summary — Managers' SNT on business network management processes 249
2.33. Network knowledge: How network managers (say they) come to know ... 250

3 Summary and conclusion of Part IV 279

Part V
Summary, Discussion, and Implications

1 Summary and methodological evaluation 283
1.1 Summary of the study 283
1.2. Evaluation of the methodological procedure 287

2 Discussion and Implications 291
2.1. The relevance of research into subjective network theories and implications for managerial practice 291
2.2. Implications for researchers 294

List of Figures

Figure I-1: Basic framework of knowledge 12
Figure I-2: Argumentational structure 15

Figure II-1: Scientific network theories 18
Figure II-2: Prototypical virtual company 24
Figure II-3: Multiplicity of co-existing contractual forms within a network 40
Figure II-4: The business network management cycle 43
Figure II-5: Resource-oriented partner selection in business networks 54
Figure II-6: Leadership roles and primary tasks in different network phases 56
Figure II-7: Processes of trust development 61
Figure II-8: Managerial functions and problem areas in business networks 63
Figure II-9: Potentially relevant theories for the explanation of business networks 69
Figure II-10: Prisoner's dilemma 79
Figure II-11: Business networks from a systems theory perspective 82
Figure II-12: Characteristics and forms of knowledge associated with scientific theories 100

Figure III-1: Subjective network theories 104
Figure III-2: The structure of the information processessing approach 115
Figure III-3: Range and functions of managers' theories 134
Figure III-4: Characteristics and major forms of knowledge associated with subjective theories 144
Figure III-5: Perceptual cycle of scheme development 147
Figure III-6: The experiential learning model 148
Figure III-7: Instructional learning versus learning in communities of practice 155
Figure III-8: The development of subjective network theories - An analytical framework 158

Figure IV-1: Major characteristics and applications of multimedia 164
Figure IV-2: Development of multimedia technology (prediction) 165
Figure IV-3: Selected examples of cooperation within the multimedia industry 170
Figure IV-4: Top six media companies of the world, revenue in billion $ 1995/96 174
Figure IV-5: Major activities of Bertelsmann AG 177
Figure IV-6: Bertelsmann's major network relations in the multimedia industry 178
Figure IV-7: Relationship between SNT and SCNT 197
Figure IV-8: Motives for cooperation (multiple responses) 209
Figure IV-9: Subjective network theories about culture - the example of mediaWays 215
Figure IV-10: Cultural differences - Influence on network success and related strategies of cultural 'management' 223

Figure IV-11: Subjective network theories about trust - the example of bsmedic..... 226
Figure IV-12: Levels of trust formation in the course of time..... 231
Figure IV-13: Personal and institutional trust development..... 234
Figure IV-14: The spirals of trust and mistrust..... 235
Figure IV-15: Network relations from the perspective of Pixelpark GmbH..... 239
Figure IV-16: Differences between internal and external coordination..... 244
Figure IV-17: Examples for coordination & information mechanisms in the network..... 246
Figure IV-18: Where managers see the source of network knowledge..... 252
Figure IV-19: Processes of knowledge development..... 254
Figure IV-20: From individual to documented back to individual knowledge - Conditions for successful transfer processes..... 269
Figure IV-21: Barriers to knowledge development and corrective response 278

List of Tables

Table I-1: *Central approaches in social science research* 7

Table II-1: *Studies of selected cooperative* 29
Table II-2: *A comparison of some network aspects for different sectors, 1980-1984 and 1985-1989* 30
Table II-3: *Cross regional comparison of supplier networks* 34
Table II-4: *Some selected approaches in (organizational) culture* 51
Table II-5: *Managerial implications of the institutionalized context* 89
Table II-6: *Major theoretical approaches for the explanation of business networks and their management* 96

Table III-1: *Perfect versus bounded rationality* 111
Table III-2: *Three approaches to psychological research* 127
Table III-3: *Alternative theories of management* 135
Table III-4: *Dimensions along which 'scientific' and 'subjective' theories differ* ... 140

Table IV-1: *Multimedia: Strengths-and weaknesses-profile of different industries* 169
Table IV-2: *A comparison of methods for analyzing subjective theories* 190
Table IV-3: *Network terminology (Word Frequency Counts in absolute numbers)* 200
Table IV-4: *Network terminology perceived as relevant when asked* 200
Table IV-5: *Words implying a negative connotation of 'cooperation' (Word Frequency Counts in absolute numbers)* 203
Table IV-6: *Connotation of 'cooperation' as perceived when asked* 203
Table IV-7: *Duration management of cooperative relations* 206
Table IV-8: *Subjective network theories about major network categories (consolidated)* 212
Table IV-9: *Subjective network theories about culture* 222
Table IV-10: *Trust and related words (Word Frequency Counts in absolute numbers)* 228
Table IV-11: *Scientific versus subjective network theories about trust* 237
Table IV-12: *Elements of trust building measures* 256
Table IV-13: *Network relations, coordination, and information mechanisms* 242
