 Making Connections: Introduction <i>Edward J. Malecki and Päivi Oinas</i>	 1
 <b>Part I Connections and Competitiveness</b>	
 1      Spatial Innovation Systems <i>Päivi Oinas and Edward J. Malecki</i>	 7
 2      Globalisation and Industrial Competitiveness: The Process and Consequences of Ubiquitification <i>Peter Maskell</i>	 35
 3      Innovation and the City <i>Olivier Crevoisier</i>	 61
 4      Local Product Development Trajectories: Engineering Establishments in Three Contrasting Regions <i>Neil Alderman</i>	 79
 5      Innovation and Local Development: The Neglected Role of Large Firms <i>Jerry Patchell, Roger Hayter and Kevin Rees</i>	 109

## **Part II Becoming Connected**

6	Local Learning and Interactive Innovation Networks in a Global Economy <i>Bjørn T. Asheim and Philip Cooke</i>	145
7	Technological Competitiveness in a Transition Economy: Foreign and Domestic Companies in Hungarian Industry <i>Györgyi Barta</i>	179
8	In Search of Innovativeness: The Case of Zhong'guancun <i>Jici Wang</i>	205
9	Bangalore: A Network Model for Innovation-Oriented Regional Development in NICs? <i>Martina Fromhold-Eisebith</i>	231
10	On Technology and Development <i>Edward J. Malecki, Päivi Oinas and Sam Ock Park</i>	261
	<i>Index</i>	277

# List of Figures

Figure 3.1	The interactions between urban and innovative dynamics through ILSs	69
Figure 5.1	Strategic connections of large firms	117
Figure 5.2	Learning within and among firms and local spin-offs	128
Figure 8.1	Growth of high-tech and new-tech firms in the BEZ (1988-1996)	212
Figure 8.2	Hierarchy model in the Chinese context	214
Figure 8.3	Weak local innovation network model in the Chinese context	214
Figure 8.4	Strong local innovation network model in the Chinese context	214
Figure 8.5	Number of registered and deregistered firms in the BEZ (1988-1996)	221
Figure 9.1	Factors influencing internal linkage formation in technology regions of NICs	236
Figure 9.2	Support systems in the technology region of Bangalore	248

# List of Tables

Table 2.1	Foreign trade as a percentage of production in OECD countries, 1970-1992	38
Table 4.1	Classification of trajectories	88
Table 4.2	Product design status	88
Table 4.3	Strategic focus	89
Table 4.4	Product development trajectories amongst the matched establishments	91
Table 4.5	Static versus non-static trajectories	92
Table 5.1	Types of intra-firm and inter-firm learning	116
Table 5.2	Business segmentation, industry and product type for selected LFs	122
Table 5.3	Giants and loyal opposition: the Japanese robot industry	131
Table 5.4	Hirata's Kyushu-based production system	138
Table 6.1	Characteristics of regions with strong and weak systemic innovation potential	160
Table 7.1	Characteristics of industrial processes	182
Table 7.2	Enterprises with FDI by economic sector in 1995	185
Table 7.3	Distribution of production inputs by area of origin in 1997 (percent)	192
Table 7.4	Regional tendencies in the distribution of output in 1997 (percent)	193
Table 7.5	Distribution of iron and steel exports among destination countries between 1992 and 1995 (percent)	195
Table 7.6	Sectoral changes in subcontracted manufactured exports	197
Table 7.7	The R&D system in state-planned economies and market economies	199
Table 8.1	Foreign direct investment in BEZ firms	211

<b>Table 8.2</b>	<b>Characteristics of the large ('old style') hierarchical state organizations and the ideal new private network organizations in the context of Chinese innovation</b>	<b>213</b>
