

TABLE OF CONTENTS

EXECUTIVE SUMMARY	9
CHAPTER I INTRODUCTION	13
I.1. Background	13
I.2. Study objectives	14
I.3. Scope	15
I.4. Short-term strategies and techniques for pavement strengthening	15
I.5. Structure of the report	16
CHAPTER II CURRENT SITUATION IN CENTRAL AND EASTERN EUROPEAN COUNTRIES	19
II.1. Data and issues: answers to an enquiry	19
II.2. Some conclusions	30
CHAPTER III INVESTIGATION AND ASSESSMENT OF PAVEMENT CONDITION .	33
III.1. Systematic approach	33
III.1.1. First phase: survey at network level	33
III.1.2. Second phase: assessment at project level	35
III.1.3. Third phase: setting priorities for the network	35
III.2. Basic data needs	35
III.3. Survey of pavement condition and condition rating -- network level	36
III.3.1. Road condition survey	36
III.3.2. Measurement of bearing capacity	39
III.3.3. Measurement of longitudinal evenness (roughness)	41
III.3.4. Measurement of rut depth	42
III.3.5. Measurement of skid resistance	47
III.3.6. Practical applications	47
III.4. Assessment of pavement condition and condition rating -- project level	49
III.4.1. Aim and steps of assessment	49
III.4.2. Purpose and types of investigations	49
III.4.3. Principal measuring methods and equipment	51
III.4.4. Detailed testing and in-depth examinations	52
III.5. Priority setting	54

CHAPTER IV	DIAGNOSIS AND STRENGTHENING DESIGN	57
IV.1.	Selection of appropriate strategy	57
IV.2.	Overlay categories	58
IV.3.	Assessment of structural condition by deflection criteria	58
IV.4.	Methods for overlay design	60
IV.5.	Asphalt overlays on flexible pavements	61
IV.5.1.	Asphalt Institute Method (Modified)	61
IV.5.2.	Method of effective thickness	62
IV.5.3.	Conversion factors	63
IV.6.	Overlay design for rigid pavements	65
IV.7.	Loading and geometric considerations	66
IV.8.	Frost effects	66
IV.9.	Alternative solutions	67
IV.10.	Functional improvement	67
CHAPTER V	STRENGTHENING MEASURES AND TECHNIQUES	69
V.1.	Strengthening asphalt pavements	69
V.1.1.	Overlays	69
V.1.2.	Recycling	70
V.2.	Strengthening cement concrete pavements	74
V.2.1.	Asphalt overlays	75
V.2.2.	Cement concrete overlays	77
V.2.3.	Cement concrete pavement recycling	78
V.3.	Shoulder strengthening	79
V.4.	Drainage improvements	81
V.5.	Quality control	83
CHAPTER VI	RAPID STRENGTHENING STRATEGIES	85
VI.1.	Strategy setting and components	85
VI.2.	Needs analysis	86
VI.2.1.	Principles of needs survey	86
VI.2.2.	Evaluation of bearing capacity	86
VI.2.3.	Evaluation of traffic flow	87
VI.3.	Optional strategy approaches	87
VI.3.1.	Some policy alternatives	87
VI.3.2.	Some planning and design alternatives	88
VI.4.	Strategy implementation and work prioritisation	89
VI.5.	The West European experience	90
CHAPTER VII	ORGANISATION AND IMPLEMENTATION OF STRENGTHENING OPERATIONS	93
VII.1.	Institutional component	93
VII.2.	Development of strengthening scheme	93

VII.2.1.	Policy context	93
VII.2.2.	Network factors affecting the scheme	94
VII.2.3.	Choice of a management policy	98
VII.2.4.	Planning of the scheme	103
VII.3.	Implementation of the strengthening scheme	106
VII.3.1.	Management system	106
VII.3.2.	The works	109
VII.3.3.	Training	109
VII.3.4.	A co-ordinating structure?	109
CHAPTER VIII	SUMMARY AND RECOMMENDATIONS FOR FUTURE CO-OPERATION	111
VIII.1.	Policy focus	111
VIII.2.	Network assessment	111
VIII.3.	Strategies	112
VIII.4.	How to proceed	113
VIII.5.	Recommendations for future co-operation	114
VIII.6.	Perspective	115
REFERENCES		117
ANNEX A	QUESTIONNAIRE FOR CEEC REPORTS	123
ANNEX B	OVERLAY DESIGN	125
ANNEX C	STRATEGIES FOR THE IMPLEMENTATION OF TRUCK LOAD RESTRICTIONS DURING SPRING THAW BASED ON FRENCH EXPERIENCE	135
ANNEX D	EXAMPLE OF TERMS OF REFERENCE FOR THE INSTITUTIONAL FRAMEWORK OF A STRENGTHENING SCHEME	141
ANNEX E	SELECTION OF RELEVANT NATIONAL GUIDELINES, STANDARD PRACTICE OR TECHNICAL PAPERS FROM OECD COUNTRIES	145
LIST OF PARTICIPANTS		149
