

Summary of contents

<i>List of figures</i>	page xix
<i>List of tables</i>	xxi
<i>Preface</i>	xxvii
<i>Acknowledgments</i>	xxxiv
1 Class analysis	1
Part I The class structure of capitalism and its transformations	
2 Class structure in comparative perspective	45
3 The transformation of the American class structure, 1960–1990	91
4 The fall and rise of the American petty bourgeoisie	114
Part II The permeability of class boundaries	
5 Class-boundary permeability: conceptual and methodological issues	149
6 Permeability of class boundaries to intergenerational mobility	169
7 Cross-class friendships	203
8 Cross-class families	223
Part III Class and gender	
9 Conceptualizing the interaction of class and gender	239
10 Individuals, families and class analysis	249
11 The noneffects of class on the gendered division of labor in the home	281

12	The gender gap in workplace authority	318
----	---------------------------------------	-----

Part IV Class structure and class consciousness

13	A general framework for studying class consciousness and class formation	373
14	Class consciousness and class formation in Sweden, the United States and Japan	407
15	Class, state employment and consciousness	459
16	Temporality, class structure and class consciousness	492

Part V Conclusion

17	Confirmations, surprises and theoretical reconstructions	519
----	--	-----

	<i>References</i>	547

Contents

<i>List of figures</i>	page xix
<i>List of tables</i>	xxi
<i>Preface</i>	xxvii
<i>Acknowledgments</i>	xxxiv
1 Class analysis	1
1.1 The parable of the shmoo	4
1.2 The concept of exploitation	9
1.3 A note on exploitation as the appropriation of surplus	14
1.4 Class and exploitation	17
1.5 The problem of the "middle class" among employees	19
<i>Authority</i>	20
<i>Skills and expertise</i>	22
<i>A map of middle-class class locations</i>	23
1.6 People not in the paid labor force	26
1.7 Marxist versus Weberian class analysis	29
1.8 The empirical agenda of the book	37
<i>Class structure</i>	37
<i>Class and gender</i>	39
<i>Class structure and class consciousness</i>	41
Part I The class structure of capitalism and its transformations	
2 Class structure in comparative perspective	45
2.1 The basic contours of the class structure	46
<i>The property dimension</i>	46
<i>Employees</i>	52
	xi

2.2	Class and gender	58
2.3	Class and race	67
2.4	Type of employing organization	69
2.5	Summing up	73
	Methodological appendix	74
	<i>The samples</i>	74
	<i>Operationalization of class structure variable</i>	74
	<i>Reliability of estimates of distributions compared to official statistics</i>	75
	<i>Cross-national comparability of measurements</i>	79
	<i>The problem of operational arbitrariness</i>	80
	<i>How to measure class structure with relatively few questionnaire items</i>	87
3	The transformation of the American class structure, 1960–1990	91
3.1	Contrasting expectations of post-industrial and Marxist theory	93
3.2	Methodological strategy	95
3.3	Results	97
	<i>The 1960s</i>	101
	<i>The 1970s</i>	101
	<i>The 1980s</i>	102
	<i>Could these results be spurious?</i>	102
	<i>Refined sectoral analysis</i>	104
3.4	Interpretations and implications	108
	Methodological appendix	111
	<i>Operationalization of economic sector variable</i>	111
	<i>Measuring class structure</i>	112
4	The fall and rise of the American petty bourgeoisie	114
4.1	The theoretical status of self-employment	120
4.2	Time series analysis of self-employment in the United States	127
	<i>Basic time series results</i>	127
	<i>The effects of unemployment</i>	129
4.3	Sectoral decomposition of changes in self-employment	130
4.4	Conclusions and unresolved issues	139
	Methodological appendix	142
	<i>Annual time series analysis of self-employment for the United States</i>	142
	<i>Shift-share decomposition of changes in self-employment</i>	144
Part II The permeability of class boundaries		
5	Class-boundary permeability: conceptual and methodological issues	149
5.1	Theoretical issues	149
	<i>Permeability in the Marxist and Weberian traditions</i>	149

	<i>Static and dynamic permeability</i>	151
5.2	Class structure variables	152
	<i>Operationalizing class structure</i>	152
	<i>The permeability-event matrix</i>	154
5.3	Permeability variables	157
	<i>Alternative approaches to analyzing permeability</i>	157
	<i>The dimensional-permeability variables: PROPERTY, AUTHORITY and SKILL</i>	158
	<i>The locational-permeability variable: WORKER</i>	161
	<i>The diagonal cells: quasi-independence matrix</i>	162
	<i>The problem of symmetry</i>	163
5.4	Models	163
	Methodological appendix: a brief introduction to loglinear models	165
6	The permeability of class boundaries to intergenerational mobility	169
6.1	Theoretical expectations	171
	<i>Relative permeability of class boundaries</i>	171
	<i>Cross-national variations</i>	173
	<i>Hypotheses</i>	175
	<i>Gender and class-boundary permeability to intergenerational mobility</i>	176
6.2	Relationship to prior mobility research	178
	<i>Analytical strategies</i>	179
	<i>Conceptualizations of class structure</i>	182
	<i>The comparative design</i>	182
6.3	Results	183
	<i>The relative permeability of class boundaries among men</i>	183
	<i>Mobility across the working-class boundary among men</i>	184
	<i>Cross-national variations among men</i>	186
	<i>The problem of farmers</i>	190
	<i>Gender and class-boundary permeability</i>	192
6.4	Implications of the results for mobility research	195
6.5	Conclusions	199
	Methodological appendix	201
	<i>Variables</i>	201
	<i>Measurement problems</i>	201
7	Cross-class friendships	203
7.1	Orienting hypotheses	203
	<i>Class interests (Marxian variant)</i>	204
	<i>Class interests (Dahrendorf variant)</i>	205
	<i>Class habitus (Bourdieu)</i>	206
	<i>Interaction opportunity</i>	206

	<i>The Weberian tradition</i>	207
	<i>Relation to previous research</i>	207
7.2	Results	208
	<i>The relative permeability of the three class boundaries</i>	208
	<i>The relative permeability of boundaries between working-class and nonworking-class locations</i>	210
	<i>Country interactions</i>	213
7.3	Conclusions	216
	Methodological appendix	218
	<i>The friendship-ties matrix</i>	218
	<i>Objections to the structure of the data</i>	218
	<i>The problem of asymmetric friendships</i>	220
	<i>The problem of sample size</i>	221
	<i>Distinguishing supervisors from managers for friends' class locations</i>	221
8	Cross-class families	223
8.1	Theoretical issues	223
8.2	Results	225
	<i>Patterns of cross-class families</i>	225
	<i>The relative permeability of the three class boundaries</i>	227
	<i>The relative permeability of boundaries between working-class and nonworking-class locations</i>	228
	<i>Country interactions</i>	229
8.3	Comparing the three forms of class-boundary permeability	230
	Methodological appendix	235
	<i>The family-class composition matrix</i>	235
	<i>Housewives</i>	235
 Part III Class and gender		
9	Conceptualizing the interaction of class and gender	239
9.1	The debate over class primacy	239
9.2	Forms of interconnection of class and gender	242
	<i>Gender as a form of class relations</i>	243
	<i>Gender relations and class relations as reciprocally affecting each other</i>	243
	<i>Gender as a sorting mechanism into class locations</i>	245
	<i>Gender as mediated linkage to class locations</i>	246
	<i>Gender as a causal interaction with class in determining outcomes</i>	247
10	Individuals, families and class analysis	249
10.1	The debate on women and class	251

10.2	An alternative approach: direct and mediated class locations	257
10.3	A strategy for studying the effects of direct and mediated class locations	260
	<i>Hypotheses</i>	261
10.4	Results	263
	<i>The effect of class composition on class identity</i>	264
	<i>Multivariate results</i>	268
10.5	Implications	269
10.6	Conclusions	275
	Methodological appendix	277
	<i>Variables</i>	277
	<i>Assumptions underlying the empirical strategy</i>	278
11	The noneffects of class on the gendered division of labor in the home	281
11.1	Theoretical expectations	283
	<i>Proletarianization and gender equality</i>	284
	<i>Sexism and class culture</i>	285
	<i>Class and power within the family</i>	286
	<i>Autonomy of gender relations</i>	287
11.2	Results	287
	<i>Overall distributions</i>	288
	<i>Variations in husbands' housework across class locations</i>	291
	<i>Multivariate equations</i>	296
11.3	Implications	300
	Methodological appendix	304
	<i>Variables</i>	304
	<i>Data, methods and analytical strategy</i>	312
	<i>Analytical strategy</i>	314
12	The gender gap in workplace authority	318
12.1	Analytical strategy for studying the 'gender gap'	320
12.2	Empirical agenda	323
	<i>The extent and cross-national patterning of the gender authority gap</i>	323
	<i>Explaining the gender gap in having authority within countries</i>	324
	<i>The gender gap in the amount of authority</i>	327
	<i>Explaining cross-national variations</i>	332
12.3	Results	335
	<i>Gross gender differences in having authority</i>	336
	<i>Net gender differences in authority with compositional controls</i>	341
	<i>Self-selection models</i>	345
	<i>The gender gap in the amount of authority</i>	347

<i>Explaining cross-national variations</i>	351
12.4 Conclusions	359
Methodological appendix	361
<i>Variables used in logit models</i>	361
<i>The problem of cross-national comparability of authority measures</i>	368
<i>Sample restrictions</i>	369
<i>Method of analysis for the amount-of-authority scale</i>	369
 Part IV Class structure and class consciousness	
 13 A general framework for studying class consciousness and class formation	373
13.1 Micro and macro-levels of analysis	374
13.2 Basic concepts	378
<i>Class structure and class location</i>	379
<i>Class formation</i>	379
<i>Class practices</i>	381
<i>Class struggle</i>	382
<i>Class consciousness</i>	382
<i>Limitation, selection and transformation</i>	387
13.3 The micro-model	388
13.4 The macro-model	394
13.5 Putting the micro and macro-models together	401
13.6 Using the models in empirical research	405
 14 Class consciousness and class formation in Sweden, the United States and Japan	407
14.1 Measuring class consciousness	407
14.2 The empirical agenda	411
<i>Class locations and class consciousness</i>	411
<i>Class formation</i>	413
<i>Class consciousness</i>	416
14.3 Results: overall relationship between locations in the class structure and class consciousness	417
14.4 Results: the macro-analysis of class formation	419
<i>Sweden</i>	423
<i>The United States</i>	424
<i>Japan</i>	425
<i>Summary of the comparisons of the three countries</i>	428
14.5 Explaining the differences in class formations	429
<i>State employment</i>	430

<i>Unionization</i>	433
<i>Japan</i>	439
14.6 The micro-analysis of class consciousness	440
<i>Additive country effects</i>	441
<i>Cross-national comparisons of micro-equations</i>	444
14.7 A brief note on class, race, gender and consciousness	446
14.8 Conclusions	449
Methodological appendix	450
1 <i>Methodological issues in constructing the class-consciousness scale</i>	450
2 <i>Strategy for measuring ideological class formations</i>	453
3 <i>Variables used in multivariate models</i>	456
4 <i>Generating single coefficients for groups of variables</i>	458
15 Class, state employment and consciousness	459
15.1 Conceptualizing state employment	461
15.2 Orienting hypotheses	464
15.3 Results	470
<i>Class differences within sectors</i>	475
<i>Sector differences within classes</i>	478
<i>Sector differences within classes controlling for attributes of individuals</i>	480
15.4 Implications	484
Methodological appendix	487
1 <i>Dependent variables: prostatism and anticapitalism</i>	487
2 <i>Independent variables</i>	489
3 <i>Statistical tests</i>	490
16 Temporality, class structure and class consciousness	492
16.1 Structural and processual approaches to class and consciousness	493
16.2 A model of trajectory, structure and consciousness	496
16.3 Conceptualizing and measuring class trajectory	499
16.4 Results	505
<i>Class interest consciousness</i>	507
<i>Class identity</i>	507
<i>Class identity effects on class interests</i>	510
<i>Comparing Sweden and the United States</i>	512
<i>Class and gender in national differences in consciousness</i>	513
16.5 Conclusions	515

Part V Conclusion

17 Confirmations, surprises and theoretical reconstructions	519
17.1 Conceptualizing "locations" in the class structure	522
<i>Traditional understanding</i>	522
<i>Initial reconstructions</i>	523
<i>Empirical confirmations</i>	524
<i>Surprises</i>	526
<i>Further possible reconstructions?</i>	527
17.2 Class structure and its variations in advanced capitalist societies	528
<i>Traditional understanding</i>	528
<i>Confirmations</i>	529
<i>Surprises</i>	530
<i>Reconstructions</i>	531
17.3 Individual lives and the class structure	532
<i>Traditional understanding</i>	532
<i>Confirmations</i>	533
<i>Surprises</i>	533
<i>Reconstructions</i>	534
17.4 Effects of class structure: class consciousness and class formation	536
<i>Traditional understanding</i>	536
<i>Confirmations</i>	537
<i>Surprises: direct and mediated class locations</i>	538
<i>Surprises: class consciousness and class formation</i>	538
<i>Reconstructions: direct and mediated class locations</i>	539
<i>Reconstructions: class consciousness and class formation</i>	540
17.5 Class and other forms of oppression: class and gender	541
<i>Traditional understanding</i>	541
<i>Confirmations</i>	543
<i>Surprises</i>	544
<i>Reconstructions</i>	544

Figures

1.1	How shmoos of different capacities affect the interests of workers and capitalists	page 6
1.2	Basic class typology	24
1.3	Elaborated class typology	25
1.4	Leisure vs. consumption trade-offs faced by people in different economic classes	32
1.5	Three models of class analysis	34
2.1	Class distributions in six countries	47
2.2	Modified class distributions among employees in six countries	54
A2.1	Alternative operationalizations of managerial authority	83
A2.2	Class distributions in the United States and Sweden using different operationalizations	85
A2.3	Operationalization of authority dimension using only three items	88
3.1	Class categories used in the analysis of transformations of the class structure	98
3.2	Class-shift components of decade rates of change in class distributions for selected class locations	99
4.1	Time series for rate of self-employment in the United States, 1948–1992	119
4.2	Decomposition of decennial rates of change of self-employment, 1940–1990	133
5.1	Class categories used in the analysis of permeability of class boundaries	155
5.2	Permeability event matrix	156
5.3	Design matrices for class-boundary-crossing variables	159
A5.1	Mobility matrix used in loglinear analysis	167
8.1	Class composition of dual-earner families	226
8.2	The odds of class-boundary permeability to mobility, friendships and cross-class families in the United States, Canada, Norway and Sweden	234
10.1	A general model of the effects of direct and mediated class locations on class identity	262
10.2	Percentage of women who say they are “working class” in dual-earner families with different class compositions	266
		xix

12.1	The gender gap in authority in seven countries	340
13.1	Simple core model of class analysis	374
13.2	Micro, meso and macro-units of analysis	377
13.3	The dialectic of structure and practice	388
13.4	Forms of determination: limits, selects, transforms	389
13.5	Micro-model of class location, class consciousness and class practice	390
13.6	Macro-model of class structure, class formation and class struggle	395
13.7	Formable and unformable class formations	398
13.8	Macro-micro linkage in class analysis	402
14.1	Class structure and class consciousness in Sweden, the United States and Japan	418
14.2	Class and the ideological spectrum in Sweden, the United States and Japan	420
14.3	Patterns of ideological class formation	421
14.4	Three-dimensional representation of patterns of ideological class formation	422
14.5	Race and gender differences in class consciousness in the United States	448
A14.1	Example illustrating method for constructing map of ideological class coalition	454
16.1	Basic causal model of class identity and subjective interests	499

Tables

1.1	Rank ordering of preferences for the fate of the schmoo by class location	<i>page 8</i>
2.1	Percentage of employers and petty bourgeoisie in different sectors	50
2.2	Distribution of supervisory authority within occupational categories	56
2.3	Class distributions of men and women in the United States and Sweden using individual job-class and family-class criteria	59
2.4	Class-by-gender distributions	62
2.5	Distribution of self-employed people into different household class situations	65
2.6	Class by race by gender distributions in the United States	68
2.7	Distribution of type of employing organizations within employee class locations	70
A2.1	Properties of the sample	75
A2.2	Operationalization of class structure	76
A2.3	Comparison of self-employment estimates from the Comparative Project and from published data	77
A2.4	Alternative operationalizations of skill dimension	82
A2.5	Distributions of respondents according to different criteria	84
A2.6	Comparisons of simple and complex operationalizations of authority	89
3.1	Hypotheses for transformations of the American class structure	90
3.2	Class distribution in the United States, 1960–1990	99
3.3	Decomposition of rates of change in class structure, 1960–1970, 1970–1980, 1980–1990	100
3.4	Disaggregation by sector of class-shift and sector-shift components of changes in United States class distribution, 1960–1990	105
A3.1	Economic sector classifications	112
4.1	Ties to the petty bourgeoisie by current class location	116
4.2	Theoretical criteria for self-employment	121
4.3	Long-term trends in self-employment in United States, France and Germany	124

4.4	Trends in self-employment in Western Europe, 1970–1982	126
4.5	Time series regressions for self-employment	128
4.6	Time series regressions for effects of unemployment on self-employment	130
4.7	Proportion of the employed labor force self-employed, 1940–1990	132
4.8	Decomposition of rates of change of self-employment	132
4.9	Decomposition of sectoral and class effects on self-employment	134
4.10	Rank ordering of total contribution of different sectors to changes in proportions self-employed, 1970–1980 and 1980–1990	136
4.11	Contributions of post-industrial sectors to expansion of self-employment	138
A4.1	Sector classification categories for shift-share analysis	146
5.1	Operationalization of class structure for permeability analyses	154
6.1	Parameter estimates for permeability of class boundaries to mobility: men in the labor force in the United States, Canada, Sweden and Norway	184
6.2	Interactions with mobility across the working-class boundary: men in the labor force in the United States, Canada, Sweden and Norway	186
6.3	Rank ordering of boundary impermeability for mobility across the working-class boundary: men in the labor force in the United States, Canada, Sweden and Norway	187
6.4	Cross-national interactions in mobility permeability of class boundaries: men in the labor force in the United States, Canada, Sweden and Norway	188
6.5	Parameter estimates for permeability of class boundaries to mobility, excluding farmers and people with farmer origins	191
6.6	Parameter estimates for permeability of class boundaries to mobility: women compared to men in the labor force in the United States, Canada, Sweden and Norway	193
6.7	Interactions with mobility across the working-class boundary: women compared to men in the labor force in the United States, Canada, Sweden and Norway	195
6.8	Cross-national interactions in mobility permeability of class boundaries: women compared to men in the labor force in the United States, Canada, Sweden and Norway	196
7.1	Rank orderings of relative impermeability of class boundaries to friendship ties in different theoretical perspectives	205
7.2	Coefficients for permeability of the three exploitation boundaries: adults in the labor force in four countries	209
7.3	Coefficients for worker/nonworker boundary permeability: adults in the labor force in four countries	212
7.4	Rank ordering of boundary impermeability for friendship ties between workers and other class locations	214
7.5	Cross-national interactions in permeability of class boundaries to friendship	215

8.1 Permeability of class boundaries to cross-class families in dual-earner households	228
8.2 Permeability of class boundaries within dual-earner families which cross the working-class boundary	229
8.3 Rank ordering of boundary impermeability for the working-class boundary in dual-earner families	231
8.4 Cross-national interactions in permeability of class boundaries to cross-class families	232
10.1 Percentage of people who say they are in the working class in families with different class compositions (dual-earner households only)	265
10.2 The effects of household class composition on class identity (logistic regression)	267
10.3 The effects of household class composition on class identity with various controls (logistic regression)	270
11.1 Family-class composition matrix	284
11.2 Distribution of husband's contribution to housework in the United States and Sweden	290
11.3 Mean levels of husband's percentage contribution to total housework by family-class compositions (dual-earner households only)	294
11.4 Tobit regressions for family-class compositions on husband's housework	296
11.5 Tobit regressions for family-class composition and selected other variables on husband's housework	297
11.6 Tobit regression coefficients for education on husband's housework, controlling for various other variables (Swedish women only)	299
11.7 Wives' labor force participation rates and husband's contribution to housework by husband's class	302
A11.1 Constructing the family-gender attitude variable and the authority-gender attitude variable	311
A11.2 Constructing the gender ideology scale	312
A11.3 Mean levels of husband's percentage contribution to total housework for dual-earner families with different family-class compositions: male respondents only	315
A11.4 Tobit regressions for family-class compositions on husband's housework: male respondents only	316
A11.5 Tobit regressions for family-class composition and selected other variables on husband's housework: male respondents only	317
12.1 How there can be very few women top managers and gender discrimination without a "glass ceiling"	330
12.2 Distributions of authority within gender categories: seven countries	337
12.3 Gender coefficients from logistic regression analyses of the odds of women having work authority relative to men in seven countries: model with no controls	338

12.4	Logistic regression analyses of the odds of women having work authority relative to men in seven countries: model with controls	342
12.5	Testing the "self-selection" hypothesis: analysis of the odds of women having authority relative to men in model which includes interactions with marital status and husband's housework	346
12.6	Testing the glass ceiling hypothesis: logistic regression analyses of the odds of women having different kinds of work authority relative to men in seven countries (sample restricted to people in the formal hierarchy)	349
12.7	Rank ordering of countries from more to less egalitarian by the gender gap in authority and other relevant variables	352
12.8	Rank ordering of countries' political culture and institutions from liberal/commodified to socialist/decommodified	358
A12.1	Variables used in the analysis	362
A12.2	Relationship between formal position in authority hierarchy and ability to impose sanctions and participate in decision-making for men and women in seven countries	365
13.1	Logic of micro and macro-levels of social analysis	376
14.1	Values on the anti-capitalism scale for class categories within state and private sectors	432
14.2	Values on the anti-capitalism scale for union members and nonmembers within class categories	435
14.3	Decomposition of ideological difference between United States and Swedish working-class coalitions	438
14.4	Class determinants of class consciousness: three countries combined	442
14.5	Class location and class consciousness in Sweden, the United States and Japan	445
15.1	Social structure locations used in analysis of class and state	465
15.2	Orienting hypotheses of relationship between class, state and ideology	468
15.3	Ideological orientation within class-by-sector categories in the United States and Sweden	472
15.4	Tests of differences between classes within sectors and between sectors within classes	474
15.5	Tests of differences between the United States and Sweden in contrasts across class-sector categories	476
15.6	Percentage of women within class-by-sector categories	481
15.7	Tests for significance of sectoral differences within classes controlling for age, sex, education and income	483
15.8	Rank orderings of ideological orientation within class-by-sector categories in the United States and Sweden	485
16.1	Alternative general approaches to class analysis	494
16.2	Possible biographical trajectories in a class mobility matrix	502
16.3	Examples of aggregations of full biographical trajectory typology	503
16.4	Explained variances (adjusted R^2) of the trajectory models predicting class-interest consciousness	508

16.5	Percentage of males and females with working-class identification by class origin and current class location in the United States and Sweden	509
16.6	Explained variances (adjusted R^2) of the trajectory models predicting working-class identity	510
16.7	The effects of class location and class identity on class-interest consciousness (unstandardized regression coefficients)	511
16.8	Summary of gender contrasts across countries: explained variances (R^2) in equations predicting interests and identity	513
