Preface	v
1 Introduction	1
1.1 What Is Logistics Management?	1
1.2 Examples	3
1.3 Modeling Logistics Problems	6
1.4 Logistics in Practice	7
1.5 Evaluation of Solution Techniques	8
1.6 Additional Topics	9
1.7 Book Overview	10
I Performance Analysis Techniques	13
2 Worst-Case Analysis	15
2.1 Introduction	15
2.2 The Bin-Packing Problem	16
2.2.1 First-Fit and Best-Fit	18
2.2.2 First-Fit Decreasing and Best-Fit Decreasing	21
2.3 The Traveling Salesman Problem	22
2.3.1 A Minimum Spanning Tree Based Heuristic	23
2.3.2 The Nearest Insertion Heuristic	24
2.3.3 Christofides' Heuristic	28

2.3.4	Local Search Heuristics	29
2.4	Exercises	32
3	Average-Case Analysis	37
3.1	Introduction	37
3.2	The Bin-Packing Problem	38
3.3	The Traveling Salesman Problem	43
3.4	Exercises	48
4	Mathematical Programming Based Bounds	51
4.1	Introduction	51
4.2	An Asymptotically Tight Linear Program	52
4.3	Lagrangian Relaxation	55
4.4	Lagrangian Relaxation and the Traveling Salesman Problem	57
4.4.1	The 1-Tree Lower Bound	57
4.4.2	The 1-Tree Lower Bound and Lagrangian Relaxation	59
4.5	The Worst-Case Effectiveness of the 1-tree Lower Bound	60
4.6	Exercises	64
II	Vehicle Routing Models	67
5	The Capacitated VRP with Equal Demands	69
5.1	Introduction	69
5.2	Worst-Case Analysis of Heuristics	70
5.3	The Asymptotic Optimal Solution Value	75
5.4	Asymptotically Optimal Heuristics	76
5.5	Exercises	80
6	The Capacitated VRP with Unequal Demands	81
6.1	Introduction	81
6.2	Heuristics for the CVRP	81
6.3	Worst-Case Analysis of Heuristics	85
6.4	The Asymptotic Optimal Solution Value	88
6.4.1	A Lower Bound	89
6.4.2	An Upper Bound	92
6.5	Probabilistic Analysis of Classical Heuristics	94
6.5.1	A Lower Bound	96
6.5.2	The UOP(α) Heuristic	97
6.6	The Uniform Model	99
6.7	The Location-Based Heuristic	102
6.8	Rate of Convergence to the Asymptotic Value	105
6.9	Exercises	105
7	The VRP with Time Window Constraints	107
7.1	Introduction	107

7.2	The Model	107
7.3	The Asymptotic Optimal Solution Value	109
7.4	An Asymptotically Optimal Heuristic	114
7.4.1	The Location-Based Heuristic	115
7.4.2	A Solution Method for CVLPTW	117
7.4.3	Implementation	118
7.4.4	Numerical Study	119
7.5	Exercises	122
8	Solving the VRP Using a Column Generation Approach	125
8.1	Introduction	125
8.2	Solving a Relaxation of the Set-Partitioning Formulation	126
8.3	Solving the Set-Partitioning Problem	130
8.3.1	Identifying Violated Clique Constraints	132
8.3.2	Identifying Violated Odd Hole Constraints	132
8.4	The Effectiveness of the Set-Partitioning Formulation	133
8.4.1	Motivation	133
8.4.2	Proof of Theorem 8.4.1	135
8.5	Exercises	138
III	Inventory Models	143
9	Economic Lot Size Models with Constant Demands	145
9.1	Introduction	145
9.1.1	The Economic Lot Size Model	145
9.1.2	The Finite Horizon Model	147
9.1.3	Power of Two Policies	149
9.2	Multi-Item Inventory Models	151
9.2.1	Introduction	151
9.2.2	Notation and Assumptions	153
9.2.3	Worst-Case Analyses	153
9.3	A Single Warehouse Multi-Retailer Model	158
9.3.1	Introduction	158
9.3.2	Notation and Assumptions	158
9.4	Exercises	163
10	Economic Lot Size Models with Varying Demands	165
10.1	The Wagner-Whitin Model	165
10.2	Models with Capacity Constraints	171
10.3	Multi-Item Inventory Models	175
10.4	Exercises	177
11	Stochastic Inventory Models	179
11.1	Introduction	179

11.2	Single Period Models	180
11.3	Finite Horizon Models	181
11.4	Quasiconvex Loss Functions	188
11.5	Infinite Horizon Models	192
11.6	Multi-Echelon Systems	195
11.7	Exercises	197
IV	Hierarchical Models	201
12	Facility Location Models	203
12.1	Introduction	203
12.2	An Algorithm for the p -Median Problem	204
12.3	An Algorithm for the Single-Source Capacitated Facility Location Problem	208
12.4	A Distribution System Design Problem	211
12.5	The Structure of the Asymptotic Optimal Solution	215
12.6	Exercises	216
13	Integrated Logistics Models	219
13.1	Introduction	219
13.2	Single Warehouse Models	221
13.3	Worst-Case Analysis of Direct Shipping Strategies	222
13.3.1	A Lower Bound	223
13.3.2	The Effectiveness of Direct Shipping	224
13.4	Asymptotic Analysis of ZIO Policies	225
13.4.1	A Lower Bound on the Cost of Any Policy	227
13.4.2	An Efficient Fixed Partition Policy	228
13.5	Asymptotic Analysis of Cross-Docking Strategies	232
13.6	An Algorithm for Multi-Echelon Distribution Systems	234
13.7	Exercises	235
V	Logistics Algorithms in Practice	237
14	A Case Study: School Bus Routing	239
14.1	Introduction	239
14.2	The Setting	240
14.3	Literature Review	242
14.4	The Problem in New York City	243
14.5	Distance and Time Estimation	245
14.6	The Routing Algorithm	247
14.7	Additional Constraints and Features	251
14.8	The Interactive Mode	253
14.9	Data, Implementation and Results	254

15 A Decision Support System for Network Configuration	255
15.1 Introduction	255
15.2 Data Collection	257
15.3 The Baseline Feature	262
15.4 Flexibility and Robustness	263
15.5 Exercises	264
References	265
Index	277
