Invited Speakers

OPENING ADDRESS

The Resurgence of UK Manufacturing : A Synopsis <i>Dr John White CBE</i>	3
---	---

MANUFACTURING PROCESSES

Why computerised numerical control (CNC) Electro discharge machining (EDM)? <i>M Bayramoglu and A W Duffill</i>	7
Damage free lapping of silicon wafers <i>M J H Nevison, C J Morrison and A Kapoor</i>	12
Improving tooling performance in aluminium extrusion <i>A Oosterkamp, G E Doyle, A N Bramley, F H Osman</i>	17
Prospects for the application of neural networks to the control of metal forming operations <i>C M Choy and R Balendra</i>	22
Flexible processing of powder production within the Pharmaceutical Industries <i>L B Newnes, J N Staniforth, S A MacGregor, G R Kay</i>	27
An analytical and experimental investigation of cutting forces in high speed milling <i>Mr Israel Dagiloke, Dr Andrew Kaldos and Prof. Ben Mills</i>	32
Parameter selection in rotary forging <i>Dr Andrzej Rosocowski and Dr Lech Olejnik</i>	37
Simulation of temperature effect on nett-forming of turbine blade <i>Dr X Lu and Dr R Balendra</i>	42
The role of wire resistivity in semiautomatic welding quality: Part I <i>C S Kirk, A R Mileham, R B G Yeo</i>	47
HIPPODAMUS: The orthodopaedics information & engineering systems package <i>Philimon Skittides, Rodney Marsh, Jos Vander Sloten and Stefan Stathopoulos</i>	52
Setting load requirements and fastening strength in the self-piece riveting process <i>Richard P King, Dr James M O'Sullivan, Prof. Derek Spurgeon and Peter Bentley</i>	57
Technical evaluation of pressure-assisted injection forging of thick-walled tubes <i>Yi Qin and Raj Balendra</i>	62
The use of experimental design to determine the optimum conditions for assembling piston rings <i>Ian R McAndrew, Dr James O'Sullivan and Dr George Harland</i>	67

Developments in laser scanners for defect detection in cutting tools <i>D Aitchison, G Dalglish and Dr R James</i>	72
Proposed design and manufacturing techniques of polymeric based composite pedal box system <i>S M Sapuan, H S Abdalla and R J Nash</i>	77
Simulation of preform design for injection forging of tubes <i>R Balendra, Davide Colla and S B Peterson</i>	82
Improved model to determine tool life and optimum cutting speed for minimum machining cost <i>Prof. J Knight, R Lawrence, Prof. A Vlase and I Pelinescu</i>	87
Photo elastic stress analysis of compression piston ring assembly <i>Ian R McAndrew, Dr James O'Sullivan and Dr George Harland</i>	92
An investigation into the design/manufacture of micro-rollers for cold roll forming <i>Mr J Heard, Dr D J Grive and Dr M N Polkinghorne</i>	97
Textile yarn regain control <i>S A Down, T Cassidy and R J Harwood</i>	102
Integrated system for prediction of accuracy of metal-formed components <i>R Balendra, T Wanheim, K Chodnikiewicz</i>	107
Vibration attenuation of hand-held tools <i>Dr P Lawrence and Mr S Raw</i>	112
 DESIGN	
FE simulation of the elastic characteristics of screw presses <i>H Ou, X Lu, R Balendra and K Chodnikiewicz</i>	119
Reconstruction of surface models using data collected by CMM and rapid scanning machines <i>S Rockliffe, Dr G Smith, T M Hill, J Harris</i>	124
Modularisation as a means of product and process integration <i>Mr R Marshall and Dr P G Leaney</i>	129
Feature-based representation for assembly modelling <i>Wan Abdul Rahman Wan Harun and Professor Keith Case</i>	134
Information integration of CAD/CAM Using IDEF ₄ <i>Dr Zhengxu Zhao, Prof. Ray W Baines and Gary Colquhoun</i>	139
A strategy for the vibrational analysis of electronic packaging <i>C A Haslett and A E U Lees</i>	144
Car seat and occupant modelling using CAD <i>Professor Keith Case, Dr Di-Chen Xiao and Dr J Mark Porter</i>	149
Contact force CAD input device <i>Mr W S Hamilton, Dr B K Hinds and Dr J McCartney</i>	154
A methodology for identifying features for prismatic components from CAD files <i>Mr S Linardakis and Dr A R Mileham</i>	159
Adaptive search for design to cost <i>T M Hill</i>	164
A design system for the generation of turbomachine blading <i>Dr Udai Singh</i>	169
A graphical approach to extract machining information based on engineering drawings <i>Y Wang, P Myler, D K Harrison and M H Wu</i>	174
Efficient product definition through computer-aided-prototyping <i>Jonathan Haston and Neil C Hay</i>	179
Part orientation optimisation and direct slicing of 3D solid models for RP systems <i>H Tsang and Prof. A J Medland</i>	184

Automated inspection planner using an object-orientated feature-based representation of a part	189
<i>Jason Harris, Terry Hill, Dr Gordon Smith and Stephen Rockcliffe</i>	
An intelligent CAD system for automating fixture design	194
<i>Y C Jeng and K F Gill</i>	
CAMSD: computer integrated design framework for computer aided manufacturing systems design	199
<i>Stefan Fritz and Bin Wu</i>	
Die-elasticity errors during nett-forming of engineering components	204
<i>Raj Balendra and Yi Qin</i>	
The role of solid modelling in an integrated environment for machine design and control	209
<i>Christopher Wright and Dr Robert Harrison</i>	
Application of hypermedia technology to engineering design and manufacturing	214
<i>Dr Kai Cheng and Professor W Brian Rowe</i>	
Automation of design and order processing	219
<i>H Pancholi and J M Stamp</i>	
JUST IN TIME	
Introducing JIT methods to a steel drum manufacturer	227
<i>Mr Stephen J Soal and Professor John M Kay</i>	
Set up reduction within the flexographic industry: a case study	232
<i>Nick Greville, Steve Culley, Dr Tony Mileham</i>	
Implementing cell technology at cable accessories machine shop floor area	237
<i>Miss Roukia Kamugisha, Dr Val Vitanov and Mr Nick Bennett</i>	
Development of a decision aid for operations management at cell level: a case study	242
<i>K Scott, C Murray and K Vinodrai Pandya</i>	
Cellular manufacturing: integrating people into the cell design process	247
<i>Jane Goodyer, Prof. Peter Foyer and Stuart Spraggett</i>	
Penetration of Japanese manufacturing methods into UK automotive companies	252
<i>Mr Christopher Da Cruz and Professor John M Kay</i>	
Genetic algorithms for assembly line balancing	257
<i>L Quinn and D Stockton</i>	
Measuring supplier performance in a JIT environment	262
<i>Jeremy Ford, Peter Gillespie, Dr A R Mileham, Dr L Newnes, Andrew W Jeffries</i>	
ROBOTICS, FMS AND VISION	
Computer aided visual inspection of manufactured components utilising CAD data	269
<i>Melvyn Smith, Terry Hill, Gordon Smith, Frank Meyer</i>	
A modular approach to CIM in the woodworking industry	274
<i>Brian Dalay and Professor Robert Parkin</i>	
Effect of viewing angle of a vision system on component image capture and analysis	279
<i>Mr Asok Roy, Dr George Burns and Mr Ramesh Champaneri</i>	
Towards real time dynamic control of an industrial robot using a neural network based controller	284
<i>P J Breedon, V Balendran, K Sivayoganathan</i>	
Some considerations of the part transport system in the operations of FMS	289
<i>Dr Alan Boyle and Dr Andrew Kaldos</i>	
Automated surface inspection by vision system	294
<i>R Marsh, R J Stamp</i>	

Template routing using a robot equipped with force feedback <i>Richard Greenough</i>	299
A methodology for improving the reliability of computer-based robot selection systems <i>T J Walker and S J Steiner</i>	304
PLANNING AND CONTROL	
Data bases and product coding in an open systems environment <i>Mr John Ward and Mr Ian Staniforth</i>	311
Finite capacity scheduling tools challenging planning and scheduling logic <i>J K Porter, J G Kenworthy, D Little, P C Jarvis</i>	316
A neural network approach to short-term load forecasting <i>Dr Valentin Vitanov and Mr Tsvetelin Minkov</i>	321
A production manager's desktop: identifying the requirements for a transportable user interface for production management <i>D N Halsall, A P Muhlemann, D H R Price and F P Wheeler</i>	326
Implementation of a business control system in a divisionalised manufacturing company – a case study <i>Dr David J Petty and Professor David K Harrison</i>	331
Measuring mix response flexibility: the ability to change between existing products <i>Nicola Bateman and David Stockton</i>	336
Manufacturing scheduling systems: optimal vs adaptive <i>M A S Monfared and S J Steiner</i>	341
Real-time routing decisions in FMSs with full routing flexibility and failure-prone machines <i>Mike Byrne and Parames Chutima</i>	346
The role of planning and control systems in achieving customer/supplier satisfaction <i>Alan Muhlemann and Chris Witt</i>	351
The case for technological advancement in the potteries <i>Nicky Shaw, Prof. Keith Ridgway and Paul Deighton</i>	356
Optimal project control for make-to-order capital plant <i>Jyh-Hong Lai, Michael H Tompsett, Raymond Leonard</i>	361
Manufacturing flexibility – a case for excess capacity <i>Dr G W Owen, R I McIntosh, Dr A R Mileham, S J Culley, G Gest</i>	366
Improving responsiveness through DMRP <i>Doug Love</i>	371
Extension of manufacturing resource planning (MRPII) to meet future business needs <i>David Little and Yaha Y Yusuf</i>	376
An object oriented approach to graphical scheduling systems <i>Dr Graham Tranfield and Mikel Eguiazu</i>	381
An introduction of a production control system into a growing company <i>W Garner and D Watson</i>	386
SIMULATION	
Manufacturing process, interaction and cost modelling using persistent object oriented programming <i>Murdo J S McLeod and Dr George R Burns</i>	393
An approach for multiple-objective optimisation using simulation <i>Dr Mike D Byrne and Dr Sameh M Saad</i>	398
Embedding simulation into the manufacturing system design process <i>Peter Ball</i>	403

Develop a systematic methodology to aid simulation modelling	408
<i>Dr Andy Lung</i>	
Simulation metamodelling and its application to a flexible hybrid assembly system	413
<i>Dr Sameh M Saad and Dr Mike D Byrne</i>	
A methodology for the selection of simulation packages for the food industry	418
<i>Mr Luis A Ormazabal and Prof. John M Kay</i>	
Simulation of a cellular manufacturing plant and a satellite finishing plant	423
<i>Pete Cameron-MacDonald and Dr Lindsay Scotland</i>	
Using expert algorithm in a manufacturing simulator for continuous scheduling optimisation	428
<i>Dr Andy Lung and Mr Habtom Mebrahtu</i>	
Modelling of dynamics of package cushioning	433
<i>Mr J Y Sun and Dr H Newlyn</i>	

INFORMATION TECHNOLOGY AND DATABASES

Design of a manufacturing based management information system	441
<i>Mr Z Qurashi, Mr T Biss and Dr M N Polkinghorne</i>	
Data communication in industrial management information systems	446
<i>Professor R Ziarati, Dr A Khataee and Miss B Onifade</i>	
Encouraging efficient manufacturing of functional components	451
<i>B Parkinson and Prof. D Spurgeon</i>	
Developing an agile applications portfolio for manufacturing industry through client/server architecture	457
<i>Mr D Little and Mr N Hodgson</i>	
A low cost control strategy for integration in manufacturing systems	462
<i>D A G Starr, Mr M Mavromihales and P Robinson</i>	
Issues of users' perception in performance assessment of manufacturing information systems	467
<i>Jean-Noel Ezingear and Bob Grieve</i>	
Discrete event dynamic system models and their application to cell control	472
<i>P A Shiner and M Loftus</i>	

QUALITY

Maintaining continuous improvement	479
<i>Sarah Caffyn, John Gilbert and John Bessant</i>	
Investigating auditing practices in quality systems by third party certification bodies	484
<i>David Webster</i>	
Application of Taguchi methods to a complex manufacturing process	489
<i>Fiona Mallock and Phil Lewis</i>	
The relationship between quality planning and quality development	494
<i>D Kehoe and A Bagheri</i>	
Factors affecting quality culture development	499
<i>Dennis Kehoe and Dotun Adebajo</i>	
Joshua's new agenda: breaking the barriers between design, engineering and manufacture	504
<i>Ray Holland, Jonathan Ivins</i>	
Applications of Taguchi for the design of manufacturing machines	509
<i>Mr A North, Dr M N Polkinghorne and Dr R S Burns</i>	
Shop-floor teams – fact or fiction?	514
<i>George Squires and Peter Darwin</i>	

Developing integrated supply chain for manufacturing business <i>A Daghbandan</i>	519
The implementation and operation of continuous improvement in manufacturing <i>Unai Elorza Inurritegui, Mrs Gwyn Groves and Dr Keith Bridge</i>	524
TQM at Betts Plastics <i>A Ghobadian, D Gallear, J Liu, D Bamford</i>	529
Application of Taguchi for the optimisation of machine tool settings <i>Mr J Heard, Dr D J Grieve and Dr M N Polkinghorne</i>	534
Organizational culture: its importance to manufacturing technology <i>Dr Brian Trought</i>	539
KNOWLEDGE BASED SYSTEMS	
HIPPOCRATES : the orthopaedics information and engineering systems package <i>Philimon Skittides, Rodney Marsh, Jos Vander Sloten and Stephan Stathopoulos</i>	547
An investigation of reactive scheduling policies within an FMS using a knowledge-based system approach <i>J F Kane, D K Harrison and C E R Wainwright</i>	552
An expert system for cutting-off process selection <i>Prof. C S Syan, Prof. M Sarwar and Mr K L Chow</i>	557
From speech recognition to language understanding: an engineering perspective <i>N Chandler, V Balendran, L Evett and K Sivayoganathan</i>	562
A knowledge-based tool for conducting design for manufacture in a surface mount technology environment <i>Tom Page and Dr J Beamish</i>	567
A flexible and robust knowledge base control system for robotics assembly cells <i>H Najjari and S J Steiner</i>	572
PERFORMANCE MEASUREMENT AND COSTING	
Multiple linear regression as a basis for cost oriented decision support <i>P F Kelly, J C Drury, W Weston and N Devine</i>	579
Costing for small and medium sized enterprises (SMEs) <i>Dr K McQueen, Mr P Ray and Prof. R Ziarati</i>	584
Performance measures: the way forward <i>David Medori, Dr Derek Steeple, Trevor Pye and Ray Wood</i>	589
Tools and techniques for designing integrated performance measurement systems <i>Dr Umit S Bititci</i>	594
Performance indicators applied to manufacturing systems <i>Dr Alan Boyle and Dr Andrew Kaldos</i>	599
Generation of business oriented performance measures from manufacturing system simulation <i>P F Kelly, W Weston, S Howe and K D Barber</i>	604
Product manufacturing cost calculation at the concept design stage <i>Dr Algirdas Bargelis, Rasa Mankute, David Stockton</i>	609
The design and operation of a cell generated performance measurement system <i>Robin C Daniels and Professor N D Burns</i>	613
MANUFACTURING STRATEGY	
Manufacturing strategy theory and practice <i>Anmoal Thethi and Dr Charles Wainwright</i>	621

Implementing a manufacturing strategy in a small semiochemical company – a case study	626
<i>A C Bates, A J Griffiths and H Littlejohn</i>	
Development of a manufacturing strategy evaluation tool	631
<i>Dr T S Baines, Prof. J M Kay, Prof. D J Hamblin and Prof. D K Harrison</i>	
A multi-level technique for the modelling and evaluation of business strategies	636
<i>Mr Mark Fernihough, Dr Tony Mileham and Mr Steve Culley</i>	
Management related issues which restrict the benefits of CAD/CAM being fully realised	641
<i>David L South and Ray Leonard</i>	
A process for developing the capacity of manufacturing management information systems to support strategic change	646
<i>R Beach, A P Muhlemann, A Paterson, D H R Price, J A Sharp</i>	
A computer aided maintenance strategy for power companies	651
<i>Dr M Molrecht and Mr P Cameron-MacDonald</i>	
Linking manufacturing strategy to process improvement	656
<i>Tammy Greswell, Steve Childe, Roger Maull and Jan Bennett</i>	
A definition of 'excellent' manufacturing	661
<i>Dr David J Woodcock</i>	
The application of systems thinking to small company management	666
<i>Mr S Senior, Mr T Bliss, Dr M N Polkinghorne and Mr J Bennett</i>	
Impedance methodology: two cases of its use	671
<i>Dr Vic Gilgeous</i>	
Assessment of a manufacturing strategy evaluation tool – a case study	676
<i>Dr T S Baines, Prof. J M Kay, Prof. D J Hamblin and Prof. D K Harrison</i>	
 CONCURRENT ENGINEERING	
A design environment for concurrent engineering	683
<i>Hassan Adballa and J A G Knight</i>	
Modelling and analysis of communication structure in a CE environment	688
<i>Hamid R Riahi and Dr Kulwant S Pawar</i>	
A review of conceptual design research and industrial practice in concurrent engineering	693
<i>Mr Michael Betteridge and Dr Paul G Maropoulos</i>	
The front end design team: the half way house for SMEs	698
<i>Mr P R Barber and Mr B Attewell</i>	
Organisational structures and manufacturing processes: a concurrent engineering perspective	703
<i>S E Owen and Peter Hills</i>	
Developing CAD/CAM tools for concurrent engineering	708
<i>Dr J X Gao</i>	
Sharing knowledge when creating product specifications	713
<i>Neil Allen, John s Gilliatt and Dr John M Lewis</i>	
 DECISION SUPPORT SYSTEMS	
A generic model for the design of a manufacturing decision support system	721
<i>Frederick P Wheeler, David H R Price and Alan P Muhlemann</i>	
Applicability of DSS for fault diagnostics within electronic assembly	726
<i>L B Newnes and J K Chambers</i>	
The development of a computer based GRAI modelling tool	731
<i>Dr Charles Wainwright, David Tucker and Prof. Raymond Leonard</i>	

TECHNOLOGY TRANSFER AND MANAGEMENT

Implementing technology transfer from academia into manufacturing industry <i>Professor Peter Hogarth and Andrew Chisholm</i>	739
New technology management: the selection of development partners <i>William J Bailey, Ron Masson, Robert Raeside</i>	744
A study of the use of cost effective multimedia in a manufacturing environment <i>Martin Smith and Cham Athwal</i>	749

ENVIRONMENT

The impact of environmentally conscious corporate strategies upon manufacturing management <i>Prof. Abby Ghobadian, Howard Viney and Jonathan Liu</i>	757
The impact of priority waste streams upon vehicle design and manufacture <i>Ms Nicola Mann, Ms Linda Warrick, Mrs Brenda Sanders, Ms Nicolette Lawson</i>	762

MICROTECHNOLOGY

The manufacture of microstructures <i>Mr A E U Lees</i>	769
Calibration in the nanometrology field <i>Howard McQuoid and John Salt</i>	774
Case study research in operational measurement in an advanced manufacturing technology environment <i>M A Fowler, J C Beamish and D S Spurgeon</i>	779

MECHATRONICS

The introduction of a mechatronic system to improve the production of dry cured hams <i>Stuart J Yaxley, Liam Quinn, Jeffrey A G Knight</i>	787
Working with natural products <i>Dr Barbara M Savage</i>	792
A comparative study of approaches for building intelligent machine control systems <i>Dr Jun-Sheng Pu and Prof. Philip Moore</i>	797

BUSINESS PROCESS RE-ENGINEERING

Ensuring competitive manufacture by product re-engineering <i>Mr S J May, Dr M N Polkinhorne, Mr G Roberts and Dr R S Burns</i>	805
Re-engineering using decision centre process modelling <i>Mr Ian McCarthy and Professor Keith Ridgway</i>	810
Implementation of holistic business systems within a re-engineering process <i>Lee Duffy, Jon Green, Prof. Martyn Paradise and Dr Charles Wainwright</i>	815
