

TABLE OF CONTENTS

1. INTRODUCTION	1
1.1. The aim of this study.....	6
1.2. Scientific methodology	8
1.3. The structure of the report.....	13
2. PERCEIVED SERVICE QUALITY	14
2.1. Models of perceived service quality.....	14
2.1.1. Grönroos's model of perceived service quality.....	15
2.1.2. Bitner's model of service quality.....	16
2.1.3. Bolton och Drew's model of service quality.....	19
2.1.4. Oliver's model of service quality.....	21
2.1.5. Parasuraman, Zeithaml and Berry's models of service quality and satisfaction	23
2.1.6. A relationship service quality model.....	26
2.2. Disconfirmation of different comparison standards	39
2.2.1. Different comparison standards.....	45
2.2.1.1. Predictive expectations	46
2.2.1.2. Experience-based norms	52
2.2.1.3. Minimum tolerable or adequate service	56
2.2.1.4. Ideal and desired service	59
2.2.1.5. Needs and values	63
2.2.1.6. Normative deficit.....	64
2.2.1.7. Promises.....	65
2.2.1.8. Deserved product or value.....	66
2.2.1.9. Equity	69
2.2.1.10. Summary of comparison standards.....	79
2.3. Service performance	87
2.4. Zone of Tolerance	91
2.5. Post-purchase behavior.....	93
2.6. Summary	98

Figure 15. Elements of deserved service and equity	77
Figure 16. Types of comparison standards and levels of performance (modified from Miller 1977).....	80
Figure 17. Different levels of comparison standards on a scale where the lowest value is at the bottom and the highest at the top.....	82
Figure 18. Ladder of comparison standards (modified from Strandvik and Liljander 1995).....	84

TABLES

Table 1. Description of concepts in the relationship quality model	34
Table 2. A summary of studies in which more than one comparison standard has been quantitatively measured.	99
Table 3. Summary of time of measurement of multiple comparison standards, type of disconfirmation and main research findings.....	101
Table 4. Attributes used in the study.....	112
Table 5. List of attributes in the main study	115
Table 6. Description of the direct measures used in the study.....	118
Table 7. Number of respondents per questionnaire and restaurant.....	122
Table 8. Distribution of men and women	123
Table 9. Direct and derived measures used in the analysis	124

Table 10. Distribution of first-time visitors to the focal restaurant and first-time visitors to a restaurant within this restaurant chain.....	126
Table 11. Distribution of dis/satisfied customers in the different restaurants	127
Table 12. Distribution of dis/satisfied customers in the different questionnaire groups	128
Table 13. Means of deserved and equity	134
Table 14. Scale reliability of performance, comparison standards and inferred disconfirmation of standards	135
Table 15. Averages of 21 attributes	162
Table 16. Frequency of negative disconfirmation of comparison standards	164
Table 17. Pearson correlation matrix on all comparison standards.....	174
Table 18. Cross-table on deserved service and equity compared to restaurant	175
Table 19. Cross-table on deserved service and equity compared to friend/s.....	175
Table 20. Pearson correlation matrix on direct disconfirmation, deserved, equity, performance, satisfaction and intentions (total population)	179
Table 21. Satisfaction and deserved service	180
Table 22. Satisfaction means and equity	182
Table 23. Pearson correlation matrix on satisfaction, intentions and standards subtracted from performance. (total population).....	186
Table 24. Cross-tables on averages of inferred disconfirmation and episode satisfaction.	189
Table 25. Correlations of performance with satisfaction and intentions	193
Table 26. Correlation coefficients of episode performance, deserved service and episode satisfaction	194
Table 27. Episode satisfaction regressed on single constructs	200
Table 28. Episode satisfaction regressed on deserved service and equity	200
Table 29. Episode satisfaction regressed on episode performance, deserved service and equity.....	201
Table 30. Episode satisfaction regressed on direct disconfirmation, deserved service and equity.....	202
Table 31. Episode satisfaction regressed on episode performance, direct disconfirmation, deserved and equity	202
Table 32. Different types of bonds between customers and service providers	239
Table 33. Factor loadings for episode performance (oblique rotation).	240

Table 34. Attribute means for perceived performance of personnel, servicescapes and food.	242
Table 35. Episode satisfaction and intentions to behave regressed on perceived performance of personnel, servicescapes and food.	242
Table 36. Means and standard deviations for performance (total population)	243
Table 37. Means and standard deviations for performance at the different restaurants	244
Table 38. Means and standard deviations for all attribute-specific standards (total population)	245
Table 39. Attribute means of predictive expectations, brand norm and product norm at restaurants A, B and C.	246
Table 40. Attribute means of best brand norm, excellent and adequate service at restaurants A, B and C.	247
Table 41. Means and standard deviations for global measures used in the study	251
Table 42. Comparison standards subtracted from episode performance.	252
Table 43. Zone of tolerance dimension means for restaurant A	253
Table 44. Zone of tolerance dimension means for restaurant B	253
Table 45. Zone of tolerance dimension means for restaurant C	253
Table 46. Zone of tolerance attribute means for the three restaurants	254
Table 47. Simple regression of episode and relationship satisfaction on performance and inferred disconfirmation attributes.	255
Table 48. Pearson correlation matrix on all standards of comparison (restaurant A)	263
Table 49. Pearson correlation matrix on all standards of comparison (restaurant B)	263
Table 50. Pearson correlation matrix on all standards of comparison (restaurant C)	263
Table 51. Pearson correlation matrix on direct disconfirmation, deserved service, equity, performance, satisfaction and intentions (restaurant A)	264
Table 52. Pearson correlation matrix on direct disconfirmation, deserved service, equity, performance, satisfaction and intentions (restaurant B)	264
Table 53. Pearson correlation matrix on direct disconfirmation, deserved service, equity, performance, satisfaction and intentions (restaurant C)	265
Table 54. Pearson correlation matrix on standards, performance, satisfaction and intentions (entire population)	266

Table 55. Pearson correlation matrix on standards, performance, satisfaction and intentions (restaurant A)	267
Table 56. Pearson correlation matrix on standards, performance, satisfaction and intentions (restaurant B)	268
Table 57. Pearson correlation matrix on standards, performance, satisfaction and intentions (restaurant C)	269
Table 58. Pearson correlation matrix on satisfaction, intentions and standards subtracted from performance. (restaurant A).....	270
Table 59. Pearson correlation matrix on satisfaction, intentions and standards subtracted from performance. (restaurant B).....	271
Table 60. Pearson correlation matrix on satisfaction, intentions and standards subtracted from performance. (restaurant C).....	272
Table 61. Cross-tables on attribute specific inferred disconfirmation and episode satisfaction.....	273
Table 62. Cross-tables on attribute specific inferred disconfirmation and episode satisfaction.....	274
Table 63. Cross-tables on attribute specific inferred disconfirmation and episode satisfaction.....	275
Table 64. Cross-tables on attribute specific inferred disconfirmation and episode satisfaction.....	276
Table 65. Cross-tables on attribute specific inferred disconfirmation and episode satisfaction.....	277
Table 66. Cross-tables on attribute specific inferred disconfirmation and episode satisfaction.....	278
Table 67. Crosstables on attribute specific inferred disconfirmation and episode satisfaction.....	279
Table 68. Episode satisfaction, relationship satisfaction and intentions to revisit the restaurant regressed on inferred disconfirmation and performance	280
