Preface	xiii
<b>Part I The Re-emergence of the Domain</b>	<b>1</b>
<b>1. The Human Contribution to Planning, Scheduling and Control in Manufacturing Industry - Background and Context</b> Bart MacCarthy and John Wilson, University of Nottingham, UK	<b>3</b>
<b>2. From Anecdotes to Theory: A Review of Existing Knowledge on Human Factors of Planning and Scheduling</b> Sarah Crawford, University of Nottingham, UK and Vincent C.S. Wiers, CMG, The Netherlands	<b>15</b>
<b>3. Lessons from the Factory Floor</b> Kenneth N. McKay, Memorial University of Newfoundland, Canada	<b>45</b>
<b>Part II Field Studies of Planners, Schedulers and Industrial Practice</b>	<b>65</b>
<b>4. A Case Study of Scheduling Practice at a Machine Tool Manufacturer</b> Scott Webster, Syracuse University, USA	<b>67</b>
<b>5. Making Sense of Scheduling: The Realities of Scheduling Practice in an Engineering Firm</b> Sarah Crawford, University of Nottingham, UK	<b>83</b>
<b>6. Boundaries of the Supervisory Role and their Impact on Planning and Control</b> Howarth Harvey, University of Sunderland, UK	<b>105</b>
<b>7. Lingering Amongst the Lingerie: An Observation-based Study into Support for Scheduling at a Garment Manufacturer</b> Caroline Vernon, University of Nottingham, UK	<b>135</b>
<b>8. Decision Support for Production Scheduling Tasks in Shops with Much Uncertainty and Little Autonomous Flexibility</b> Kenneth N. McKay, Memorial University of Newfoundland, Canada and Vincent C.S. Wiers, CMG, The Netherlands	<b>165</b>

<b>9. Human Factors in the Planning and Scheduling of Flexible Manufacturing Systems</b>	<b>179</b>
Jannes Slomp, University of Groningen, The Netherlands	
<b>Part III Plans, Schedules and Computer Systems</b>	<b>199</b>
<b>10. Design of a Knowledge-based Scheduling System for a Sheet Material Manufacturer</b>	<b>201</b>
Vincent C.S.Wiers, CMG, The Netherlands	
<b>11. Design and Implementation of an Effective Decision Support System: A Case Study in Steel Hot Rolling Mill Scheduling</b>	<b>217</b>
Peter Cowling, University of Nottingham, UK	
<b>12. A Field Test of a Prototype Scheduling System</b>	<b>231</b>
Scott Webster, Syracuse University, USA	
<b>13. Architecture and Interface Aspects of Scheduling Decision Support</b>	<b>245</b>
Peter G. Higgins, Swinburne University of Technology, Australia	
<b>14. Designing and Using an Interactive MRP-CRP System Based on Human Responsibility</b>	<b>281</b>
Nobuto Nakamura, Higashi-Hiroshima University, Japan	
<b>Part IV Context and Environment for Planning, Scheduling and Control</b>	<b>309</b>
<b>15. Assessing the Effectiveness of Manufacturing Information Systems</b>	<b>311</b>
Janet Efstathiou, Anisoara Calinescu, John Schirn, University of Oxford, UK, Lars Fjeldsøe-Nielsen, BizzAdvice, London, UK, Suja Sivasadan, University of Oxford, UK, Julita Bermejo-Alonso, Universidad Alfonso X el Sabio, Spain and Colin J. Neill, Pennsylvania State University, USA	
<b>16. Planning and Scheduling in the Batch Chemical Industry</b>	<b>339</b>
Jan C. Fransoo and Wenny H.M. Raaymakers, Eindhoven University of Technology, The Netherlands	
<b>17. Engineering a Vehicle for World Class Logistics: From Paradox to Paradigm Shift on the Rover 75</b>	<b>355</b>
Joy Batchelor, Warwick Business School, UK	
<b>18. A Socio-technical Approach to the Design of a Production Control System: Towards Controllable Production Units</b>	<b>383</b>
Jannes Slomp and Gwenny C. Ruël, University of Groningen, The Netherlands	

<i>Contents</i>	<i>vii</i>
<b>19. Planning and Scheduling in Secondary Work Systems</b>	<b>411</b>
Toni Wäfler, Swiss Federal Institute of Technology, Switzerland	
<b>Part V Defining the Future Research Domain</b>	<b>449</b>
<b>20. Influencing Industrial Practice in Planning, Scheduling and Control</b>	<b>451</b>
Bart MacCarthy and John Wilson, University of Nottingham, UK	
Index	463
