

## TABLE OF CONTENTS

|                                                                                          |               |
|------------------------------------------------------------------------------------------|---------------|
| <b>EXECUTIVE SUMMARY</b> .....                                                           | <b>7</b>      |
| <br><b>1. INTRODUCTION</b> .....                                                         | <br><b>11</b> |
| 1. The OECD programme of Environmental Performance Reviews .....                         | 11            |
| 2. Domestic and international commitments .....                                          | 11            |
| 3. A wide diversity of conditions .....                                                  | 12            |
| <br><b>2. REDUCING THE POLLUTION BURDEN AND CONSERVING NATURE</b> .....                  | <br><b>13</b> |
| 1. Water resources .....                                                                 | 13            |
| 2. Air .....                                                                             | 15            |
| 3. Waste and contaminated sites .....                                                    | 18            |
| 4. Nature conservation .....                                                             | 19            |
| 5. Cost-effectiveness of environmental policies .....                                    | 21            |
| <br><b>3. INTEGRATING ENVIRONMENTAL CONCERNS IN ECONOMIC AND SECTORAL DECISIONS</b> .... | <br><b>25</b> |
| 1. Towards sustainable development .....                                                 | 25            |
| 2. Institutional integration .....                                                       | 28            |
| 3. The role of the market and the use of economic instruments .....                      | 30            |
| 4. The use of societal instruments .....                                                 | 32            |
| <br><b>4. INTERNATIONAL CO-OPERATION</b> .....                                           | <br><b>35</b> |
| 1. Principles and commitments .....                                                      | 35            |
| 2. Regional issues .....                                                                 | 37            |
| 3. Global issues .....                                                                   | 39            |
| <br><b>Annexes</b>                                                                       |               |
| I. Selected environmental indicators and trends .....                                    | 44            |
| II. Selected environmental data .....                                                    | 62            |
| III. Selected economic data and trends .....                                             | 64            |
| IV. Country responses to OECD Environmental Performance Reviews .....                    | 66            |

## LIST OF FIGURES\*

*Pollution Control and Nature Conservation*

|                                                                                      |    |
|--------------------------------------------------------------------------------------|----|
| Water management: Water withdrawn .....                                              | 45 |
| Water management: Waste water treatment .....                                        | 45 |
| Air management: Emissions of SO <sub>x</sub> and NO <sub>x</sub> .....               | 46 |
| Air management: SO <sub>2</sub> concentrations, NO <sub>2</sub> concentrations ..... | 46 |
| Waste management: Municipal waste generation .....                                   | 47 |
| Waste management: Recycling rate .....                                               | 47 |
| Nature conservation: Major protected areas .....                                     | 48 |
| Pollution abatement and control expenditure .....                                    | 49 |

*Sectoral Integration*

|                   |    |
|-------------------|----|
| Industry .....    | 50 |
| Energy .....      | 51 |
| Transport .....   | 52 |
| Agriculture ..... | 53 |
| Forestry .....    | 54 |
| Fisheries .....   | 54 |

*International Co-operation*

|                                             |    |
|---------------------------------------------|----|
| Multilateral environmental agreements ..... | 55 |
| Regional issues: Acidification .....        | 56 |
| Global issues: Climate change .....         | 57 |
| Global issues: Ozone layer .....            | 58 |
| Official development assistance .....       | 59 |

## LIST OF TABLES

|                                                     |    |
|-----------------------------------------------------|----|
| Selected environmental data (Annex II) .....        | 62 |
| Selected economic data and trends (Annex III) ..... | 64 |

## LIST OF INSETS

|                                                                |    |
|----------------------------------------------------------------|----|
| Waste water charges: Germany .....                             | 14 |
| Emissions trading (SO <sub>2</sub> ): United States .....      | 16 |
| Protecting the national heritage: United Kingdom .....         | 20 |
| Transferable fishing quotas: Iceland .....                     | 20 |
| Decoupling air emissions from GDP: Japan .....                 | 26 |
| Environmental planning: Netherlands .....                      | 27 |
| Greening of government: Canada .....                           | 27 |
| Energy pricing and intensity: Italy .....                      | 29 |
| Pollution charges and fines: Poland .....                      | 31 |
| Public environmental information and education: Portugal ..... | 33 |
| Environmental assistance: Norway .....                         | 36 |
| Controlling CO <sub>2</sub> emissions: Austria .....           | 40 |
