PART ONE

CONFLICTING VALUES

1. VIEWS OF TECHNOLOGY	3
I. TECHNOLOGY AS LIBERATOR	4
1. The Benefits of Technology	4
2. Optimistic Views of Technology	5
3. A Reply to the Optimists	8
II. TECHNOLOGY AS THREAT	10
1. The Human Costs of Technology	10
2. Recent Critics of Technology	12
3. A Reply to the Pessimists	14
III. TECHNOLOGY AS INSTRUMENT OF POWER	15
1. Technology and Political Power	15
2. The Redirection of Technology	16
3. The Social Construction of Technology	20
IV. CONCLUSIONS	23
2. HUMAN VALUES	26
I. SCIENCE AND HUMAN VALUES	27
1. Values Intrinsic to Science	28
2. Evolutionary Ethics	29
3. The Contribution of Science to Ethics	32
II. PHILOSOPHY AND HUMAN VALUES	33
1. Utilitarianism and Its Critics	33
2. The Concept of Justice	36
3. Freedom as Participation	38
III. RELIGION AND HUMAN VALUES	41
1. Christian Ethics	42
2. Individual Values	45
3. Social Values	49
4. Human Nature	53
IV. CONCLUSIONS	55

3. ENVIRONMENTAL VALUES	57
I. SCIENCE AND ENVIRONMENTAL VALUES	57
1. New Views of Nature	57
2. Biocentric Ethics	61
II. PHILOSOPHY AND ENVIRONMENTAL VALUES	63
1. Human Benefits from the Environment	64
2. Duties to Future Generations	66
3. Respect for All Forms of Life	69
III. RELIGION AND ENVIRONMENTAL VALUES	72
1. Eastern Religions	72
2. Historical Christianity	74
3. Contemporary Theology	77
IV. CONCLUSIONS	80

PART TWO

CRITICAL TECHNOLOGIES

4. AGRICULTURE	85
I. FOOD AND HUNGER	85
1. Causes of Hunger	86
2. Environmental Constraints	88
II. WESTERN AGRICULTURE	91
1. Family Farms and Rural Life	93
2. Agribusiness and Research Priorities	96
3. Sustainable Agriculture	99
III. AGRICULTURE IN THE THIRD WORLD	103
1. The Green Revolution and Malnutrition	103
2. Sustainable Development	106
IV. FOOD AND GLOBAL JUSTICE	109
1. Ethical Principles	110
2. National Policies	112
V. CONCLUSIONS	114
5. ENERGY	116
I. FOSSIL FUELS	116
1. Oil and Global Justice	117
2. Coal and the Environment	118
II. NUCLEAR POWER	122
1. Reactor Safety and Risk Acceptability	122
2. Radioactive Wastes and Future Generations	125
3. The Future of Nuclear Power	128

III.	RENEWABLE SOURCES	131
1.	Solar Energy and Sustainability	131
2.	Decentralization and Participation	135
IV.	CONSERVATION	137
1.	Energy and Economic Development	137
2.	Life-styles and Personal Fulfillment	140
3.	Energy in the Third World	142
V.	CONCLUSIONS	143
6.	COMPUTERS	146
I.	COMPUTERS AND WORK	147
1.	Automation and Human Skills	147
2.	The Electronic Office	151
3.	Centralization and Decentralization	153
II.	COMPUTERS AND CITIZENS	155
1.	Access to Information	156
2.	Computer Programmers and Users	158
3.	Data Banks and Privacy	160
III.	COMPUTERS FOR WAR AND PEACE	162
1.	Military Computers	163
2.	Computers in the Third World	165
IV.	ARTIFICIAL INTELLIGENCE	168
1.	Progress in Artificial Intelligence	168
2.	Artificial Intelligence and Human Nature	171
3.	Prospects for the Future	173
V.	CONCLUSIONS	175

PART THREE
TECHNOLOGY AND THE FUTURE

7.	UNPRECEDENTED POWERS	179
I.	ENVIRONMENTAL DEGRADATION	179
1.	Air and Water Pollution	179
2.	Global Threats: An Endangered Planet	183
3.	The "Limits to Growth" Debate	187
II.	GENETIC ENGINEERING	190
1.	Modifying Microbes, Plants, and Animals	190
2.	Human Genetic Engineering	194
3.	The Social Context of Research	198

III.	NUCLEAR WEAPONS	200
1.	The Arms Race	201
2.	Ethical and Theological Issues	205
3.	Arms Control Treaties	207
4.	Global Security	209
IV.	CONCLUSIONS	211
8.	CONTROLLING TECHNOLOGY	213
I.	GOVERNING TECHNOLOGY	213
1.	The Diverse Roles of Government	213
2.	Technical Experts and Policy Decisions	217
3.	Citizens and Political Participation	220
II.	ASSESSING TECHNOLOGY	223
1.	Cost-Benefit Analysis	223
2.	Risk Assessment	226
3.	Technology Assessment Methods	229
III.	REDIRECTING TECHNOLOGY	231
1.	Regulatory Strategies	232
2.	Justice, Employment, and the Environment	235
3.	The Social Responsibility of Scientists and Engineers	237
IV.	CONCLUSIONS	240
9.	NEW DIRECTIONS	242
I.	TECHNOLOGY AND HUMAN VALUES	243
1.	Policy Priorities	243
2.	Appropriate Technology	244
3.	Scale, Efficiency, and Participation	248
II.	SUSTAINABLE CONSUMPTION	251
1.	A Conserver Society	251
2.	Individual Life-styles	255
III.	CHANGING VALUES	258
1.	A New Social Paradigm	258
2.	A Biblical Perspective	261
3.	Sources of Change	264
Notes		269
Index of Names		303
