<i>List of Tables</i>	vii
<i>List of Figures</i>	ix
Preface	xii
Acknowledgements	xiii

PART I THE ELEMENTS OF COST

1 Cost and Management Accounting – Definitions	3
2 Cost Classification and the Elements of Cost	6
3 The Elements of Cost: Materials	17
4 The Elements of Cost: Labour	36
5 Factory Overheads – Allocation and Apportionment	52
6 Factory Overheads – Absorption into Products	64
7 Distribution, Selling and Administrative Overheads	74
8 Cost Bookkeeping	90

PART II COST ACCOUNTING METHODS

9 Cost Accounting Methods Overview	109
10 Job and Batch Costing	113
11 Contract Costing	123
12 Process Costing	137
13 Joint Products and By-products	158
14 Service Costing	168
15 Activity-based Costing	177

PART III PLANNING AND CONTROL

16 Planning and Control – Definitions and Overview	185
17 Marginal Costing and CVP Analysis	189

18	Standard Costing and Variance Analysis	231
19	Budgetary Control	270
20	Investment Appraisal Techniques	304
21	Other Control Techniques	323

PART IV MANAGEMENT ACCOUNTS

22	Management Accounts for a Manufacturing Company	353
23	Management Accounts of a Retail Company	387

PART V REVISION AND MODEL ANSWERS

24	Revision and Conclusion	417
25	Model Answers	422

<i>Index</i>		570
--------------	--	-----

List of

2.1	Profit and loss layout	11
4.1	A payroll analysis	38
4.2	A payroll analysis: distribution, selling and administration	44
4.3	Staff turnover report	47
4.4	Holiday pay provision account	48
5.1	Apportioning costs: elimination method	58
5.2	Apportioning costs: repeated distribution method	59
7.1	Profit or loss from various redemption rates	81
7.2	Sales representatives' contribution report	83
7.3	Aged debtors' analysis	85
8.1	Comparison of presentation of the profit and loss account	100
13.1	Summary of profit and loss results	160
14.1	Out-patient costs comparison statement	173
14.2	Examples of unit costs for various businesses	174
15.1	Traditional and present-day cost mix percentages	178
17.1	Typical manufacturing, trading and profit and loss account structure	191
17.2	Total costs split between variable and fixed costs	192
17.3	Validity of data in high/low method	194
18.1	Separation of profit variances	248

Tables

18.2	Raw materials control account	251
18.3	Work-in-progress control account	252
18.4	Production wages control account	253
18.5	Variable production overheads control account	254
18.6	Fixed production overheads control account	254
18.7	Finished goods control account	255
18.8	Cost of goods sold account	255
18.9	Production variances account	256
19.1	A typical sales budget	278
19.2	Fixed assets budget	279
20.1	Investment at 5% p.a. compound interest	306
20.2	Net present value discount table	307
20.3	Weighted average cost of capital	308
20.4	Average profits for both projects	314
20.5	Average investment in projects	315
21.1	Trading results over a four-year period	325
21.2	Operations management capital	325
21.3	Assessing working capital position	328
21.4	Period sales and cumulative sales	335
21.5	Moving annual totals (MATs)	336
22.1	Management accounts index (manufacturing company)	354
22.2	Profit and loss account, fixed budget	356
22.3	Profit and loss account, flexible budget	357

22.4	Profit and loss account, variance report	358
22.5	Balance sheet as at 31 July	359
22.6	Cash flow statement	360
22.7	Sales analysis	361
22.8	Production costs analysis	362
22.9	Gross profit analysis	363
22.10	Distribution costs – warehouse costs	365
22.11	Distribution costs – packing and despatch costs	366
22.12	Selling costs	367
22.13	Marketing costs	368
22.14	Managing Director's Department costs	369
22.15	Accounts Department costs	370
22.16	Personnel Department (Human Resources) costs	372
22.17	Other income and expenses	373
22.18	Occupation costs analysis	374
22.19	Capital expenditure spend analysis	375
22.20	Fixed assets analysis	376
22.21	Stockholding analysis	377
22.22	Trade debtors' aged analysis	378
22.23	Other debtors' analysis	379
22.24	Trade creditors' aged analysis	380
22.25	Other creditors' analysis	381
22.26	Accruals and prepayments	381
22.27	Analysis of borrowings	382
22.28	Key ratios and statistics	383

23.1	Management accounts index (retail company)	388
23.2	Profit and loss account – the company as a whole	389
23.3	Profit and loss account – by branch	390
23.4	Balance sheet as at 31 July	392
23.5	Cash flow statement	393
23.6	Sales analysis	394
23.7	Gross profit and variances analysis	395
23.8	Branch costs analysis	396
23.9	Central warehouse costs	397
23.10	Central selling costs	398
23.11	Managing Director's Department expenses	400
23.12	Accounts Department expenses	401
23.13	Personnel Department expenses	402
23.14	Other income and expenses	403
23.15	Central occupation costs	404
23.16	Capital expenditure spend analysis	405
23.17	Fixed assets analysis	406
23.18	Stockholding analysis	407
23.19	Debtors' analysis	408
23.20	Trade creditors' aged analysis	408
23.21	Other creditor's analysis	409
23.22	Accruals and prepayments	409
23.23	Analysis of borrowings	410
23.24	Key ratios and statistics	411

List of F

1.1	An organisation chart for an accounts department of a typical manufacturing company	5
2.1	The structure of the ledgers	7
2.2	Chart of accounts	9
2.3	Factory layout	12
2.4	Cost classification	15
3.1	Raw materials flow chart	18
3.2	Goods received note	20
3.3	Stock control record	21
3.4	Economic order quantity formula	23
3.5	Stock control levels	24
3.6	Stock ledger account	25
3.7	Stock ledger account using FIFO	26
3.8	Stock ledger account using LIFO	27
3.9	Stock ledger account using AVCO	29
3.10	Periodic valuation methods	29
5.1	Examples of overhead costs	53
5.2	Production area chart of accounts	54
5.3	Apportionment of costs to manufacturing areas	56
5.4	Spreadsheet: repeated distribution method	60
6.1	Factors causing overheads to be over- or underabsorbed	68
7.1	Sources of period costs	75
7.2	Finished goods area staff organisation	75
7.3	Distribution staff organisation chart	76
7.4	Warehouse and distribution cost report	78

Figures

7.5	Sales department organisation chart	80
7.6	Mailshot redemption rate calculation	80
7.7	Marketing and selling cost report	82
7.8	General ledger	87
7.9	Types of research and development	88
8.1	Bookkeeping methods	91
8.2	Control accounts concept	92
8.3	Ledger entry examples	93
8.4	An integrated accounting system (integrated ledger)	94
8.5	Interlocking accounts overview	95
8.6	Examples of an interlocking accounts system in use	96
8.7	Notional rent entries in the cost ledger	97
8.8	Accounts maintained in the cost ledger	98
8.9	Manufacturing account	101
9.1	Two major cost accounting systems	110
10.1	A cost estimate	114
10.2	A job account	117
11.1	Costs section of typical contract account	124
11.2	Contract account extract showing notional profit	128
11.3	Formula A	130
11.4	Formula B	130
11.5	Completed section two of the accounts	131
11.6	Accounts for the whole life of the project	132
11.7	Examples of balance sheet entries	134

12.1	Flow diagram of a processing factory	138
12.2	Process accounts for factory	139
12.3	Production losses	140
12.4	Position in each account showing normal losses	141
12.5	Revenue credited to the Finishing Department	141
12.6	Process accounts example	142
12.7	Abnormal gains and losses account	143
12.8	Trading results statement	143
12.9	Sale of extra scrap reflected in abnormal gains and losses account	144
12.10	Equivalent units (EU) Table 1	144
12.11	Equivalent units (EU) Table 2	145
12.12	Process account, Department 1	146
12.13	Incomplete process account, Department 1 – next accounting period	146
12.14	Equivalent units tables – AVCO method	147
12.15	Completed progress account, Department 1 – next accounting period	148
12.16	Equivalent units tables – FIFO method	149
12.17	Process account, Department 1 – FIFO method	150
13.1	Common process account 1	159
13.2	Common process account 2	162
13.3	Common process accounts	163
13.4	By-product trading account 1	164
13.5	By-product trading account 2	164
14.1	The service departments in a factory	169
14.2	A canteen operating statement	170
14.3	Examples of appropriate service unit costs	171
14.4	Examples of service cost units used in service industries	171
14.5	Example of service unit costs for a hospital	172
15.1	Activity-based costing overview	178
15.2	Cross-departmental activity and the cost pool	179
15.3	Charge to the product	180
16.1	GAP analysis – objective 10% market share	186
16.2	GAP analysis – filling the gap	186
17.1	Fixed costs and variable costs	190
17.2	Profit statement in marginal costing format	192
17.3	Scattergraph to establish fixed and variable cost elements	195
17.4	Conventional break-even chart	204

17.5	Conventional break-even chart, fixed costs section	205
17.6	Conventional break-even chart, variable costs section	206
17.7	Conventional break-even chart, sales line	207
17.8	Conventional break-even chart, completed	208
17.9	Contribution break-even chart, variable costs line	209
17.10	Contribution break-even chart, fixed costs line	210
17.11	Contribution break-even chart, sales line	211
17.12	Contribution break-even chart, completed	212
17.13	Profit-Volume chart, outline	213
17.14	Profit-Volume chart, completed	214
17.15	Margin of safety	215
17.16	Economists' model	215
17.17	Area of relevance example	216
18.1	Standard cost card	233
18.2	Graphical presentation of material price changes	235
18.3	Standard costs for three products	236
18.4	Actual production details and costs incurred	237
18.5	Standard costs of units made	238
18.6	Calculation table for each product	238
18.7	Product B calculation table	239
18.8	Product B: splitting labour subvariances	240
18.9	Calculation of variable overheads variances	242
18.10	Calculation table identifying five fixed overhead variances	243
18.11	Product C: computation of variances	244
18.12	Comparison of two forms of data presentation	249
18.13	Linking of cost accounts in a standard costing system	257
19.1	Aspects of a business quantifiable in terms of money	271
19.2	Financial aspects controlled by budgets	271
19.3	A typical sales budget	272
19.4	Budget seasonality test – sales	274
19.5	Quantity of product to be made in the budget year	275
19.6	Production budget, Product A	276
19.7	Trading budgeted trading account narrative	277

19.8	Budgeted administration costs	278
19.9	An overview of the master budget	284
20.1	Investment funds available	305
20.2	Capital expenditure request form	309
20.3	Capital expenditure authorisation form	310
20.4	Net present value (NPV) table	311
20.5	Spreadsheet for calculating internal rate of return	312
20.6	A report on capital expenditure	315
21.1	Sales per employee, statistics and graph	327
21.2	Trade debtors' aged analysis report	331
21.3	MAT figures and budgeted MAT amounts	337
21.4	Graph for the current year	338

21.5	Periodic management account figures	338
21.6	Calculation table for fixed and variable figures	339
21.7	Regression output of computer calculation (Lotus 1-2-3)	340
21.8	Profit projection as at Period 7	341
21.9	Pie chart showing shares of value added	342
22.1	Sales and profitability trends	384
22.2	Working capital trends	385
22.3	Profit projections	386
23.1	Sales trends, all branches	412
23.2	Profitability, whole company	413
23.3	Stockholding, whole company	414
