1. Introduction to the Theory on Research and Development	9
1.1 Firms' incentives to innovate	13
1.1.1 The extent of innovation	18
1.1.2 The timing of innovation	23
1.1.3 Asymmetric incentives	30
1.2 Cooperative incentives to innovate	35
1.2.1 Internalization of externalities	36
1.2.2 The extent of cooperation	38
1.3 Conclusions concerning the welfare implications of cooperative research	46
2. Simultaneous Choice of Timing and Quality of Innovation	53
2.1 Introduction	53
2.2 The model	56
2.3 Strategic timing and quality of innovation	58
2.3.1 The pure strategy equilibria	58
2.3.2 The mixed strategy equilibrium	62
2.4 R&D cooperation	70
2.5 Welfare	73
2.6 Conclusion	75
Appendix A	78

3. Simultaneous Choice of Process and Product Innovation	84
3.1 Introduction	84
3.2 The model	87
3.3 Quantity decisions	89
3.4 The innovation decisions under R&D competition	90
3.5 The innovation decisions under R&D cooperation	92
3.5.1 Firms maximize joint profit but do not share R&D costs	93
3.5.2 Firms maximize joint profit and share R&D costs	97
3.6 Changes in the market size	100
3.7 Welfare	103
3.8 Conclusion	105
Appendix B	107
4. Asymmetric Incentives for Quality Improvement and Cooperation	108
4.1 Introduction	108
4.2 The model	111
4.3 Strategic quality improvements	113
4.3.1 Pure strategy equilibria	115
4.3.2 A comparison of firms' incentives	117
4.4 R&D cooperation	125
4.5 Conclusion	127
Appendix C	129
5. Conclusion	132
Bibliography	135
