Acknowledgments	xv
Preface	xvi
<b>PART I</b>	<b>1</b>
1. Choosing the Right Type of Forecasting Model	3
Introduction	3
1.1 Statistics, Econometrics, and Forecasting	4
1.2 The Concept of Forecasting Accuracy: Compared to What?	5
1.2.1 <i>Structural Shifts in Parameters</i>	8
1.2.2 <i>Model Misspecification</i>	9
1.2.3 <i>Missing, Smoothed, Preliminary, or Inaccurate                 Data</i>	10
1.2.4 <i>Changing Expectations by Economic Agents</i>	13
1.2.5 <i>Policy Shifts</i>	14
1.2.6 <i>Unexpected Changes in Exogenous Variables</i>	15
1.2.7 <i>Incorrect Assumptions about Exogeneity</i>	17
1.2.8 <i>Error Buildup in Multi-period Forecasts</i>	17
1.3 Alternative Types of Forecasts	18
1.3.1 <i>Point or Interval</i>	18
1.3.2 <i>Absolute or Conditional</i>	19
1.3.3 <i>Alternative Scenarios Weighed by Probabilities</i>	19
1.3.4 <i>Asymmetric Gains and Losses</i>	20
1.3.5 <i>Single-period or Multi-period</i>	21
1.3.6 <i>Short Run or Long Range</i>	21
1.3.7 <i>Forecasting Single or Multiple Variables</i>	22
1.4 Some Common Pitfalls in Building Forecasting Equations	22
Problems and Questions	25

---

<b>2. Useful Tools for Practical Business Forecasting</b>	<b>29</b>
Introduction	29
2.1 Types and Sources of Data	30
2.1.1 <i>Time-series, Cross-section, and Panel Data</i>	30
2.1.2 <i>Basic Sources of US Government Data</i>	32
2.1.3 <i>Major Sources of International Government Data</i>	34
2.1.4 <i>Principal Sources of Key Private Sector Data</i>	35
2.2 Collecting Data from the Internet	37
2.3 Forecasting Under Uncertainty	38
2.4 Mean and Variance	40
2.5 Goodness-of-Fit Statistics	42
2.5.1 <i>Covariance and Correlation Coefficients</i>	42
2.5.2 <i>Standard Errors and t-ratios</i>	43
2.5.3 <i>F-ratios and Adjusted R-squared</i>	44
2.6 Using the EViews Statistical Package	46
2.7 Utilizing Graphs and Charts	49
2.8 Checklist Before Analyzing Data	55
2.8.1 <i>Adjusting for Seasonal Factors</i>	56
2.8.2 <i>Checking for Outlying Values</i>	56
2.9 Using Logarithms and Elasticities	58
Problems and Questions	60
 <b>PART II</b>	 <b>65</b>
 <b>3. The General Linear Regression Model</b>	 <b>67</b>
Introduction	67
3.1 The General Linear Model	68
3.1.1 <i>The Bivariate Case</i>	68
3.1.2 <i>Desirable Properties of Estimators</i>	69
3.1.3 <i>Expanding to the Multivariate Case</i>	70
3.2 Uses and Misuses of $\bar{R}^2$	70
3.2.1 <i>Differences Between <math>R^2</math> and <math>\bar{R}^2</math></i>	71
3.2.2 <i>Pitfalls in Trying to Maximize <math>\bar{R}^2</math></i>	71
3.2.3 <i>An Example: The Simple Consumption Function</i>	72
3.3 Measuring and Understanding Partial Correlation	75
3.3.1 <i>Covariance and the Correlation Matrix</i>	75
3.3.2 <i>Partial Correlation Coefficients</i>	76
3.3.3 <i>Pitfalls of Stepwise Regression</i>	77
3.4 Testing and Adjusting for Autocorrelation	77
3.4.1 <i>Why Autocorrelation Occurs and What it Means</i>	78
3.4.2 <i>Durbin–Watson Statistic to Measure Autocorrelation</i>	79

---

3.4.3	<i>Autocorrelation Adjustments: Cochrane–Orcutt and Hildreth–Lu</i>	80
3.4.4	<i>Higher-order Autocorrelation</i>	81
3.4.5	<i>Overstatement of t-ratios when Autocorrelation is Present</i>	81
3.4.6	<i>Pitfalls of Using the Lagged Dependent Variable</i>	82
3.5	Testing and Adjusting for Heteroscedasticity	84
3.5.1	<i>Causes of Heteroscedasticity in Cross-section and Time-series Data</i>	84
3.5.2	<i>Measuring and Testing for Heteroscedasticity</i>	85
3.6	Getting Started: An Example in EViews	88
Case Study 1:	Predicting Retail Sales for Hardware Stores	90
Case Study 2:	German Short-term Interest Rates	91
Case Study 3:	Lumber Prices	93
Problems and Questions		96
<b>4.</b>	<b>Additional Topics for Single-equation Regression Models</b>	<b>100</b>
	Introduction	100
4.1	Problems Caused by Multicollinearity	100
4.2	Eliminating or Reducing Spurious Trends	103
Case Study 4:	Demand for Airline Travel	103
4.2.1	<i>Log-linear Transformation</i>	104
4.2.2	<i>Percentage First Differences</i>	106
4.2.3	<i>Ratios</i>	107
4.2.4	<i>Deviations Around Trends</i>	108
4.2.5	<i>Weighted Least Squares</i>	109
4.2.6	<i>Summary and Comparison of Methods</i>	110
4.3	Distributed Lags	111
4.3.1	<i>General Discussion of Distributed Lags</i>	111
4.3.2	<i>Polynomial Distributed Lags</i>	113
4.3.3	<i>General Guidelines for Using PDLs</i>	116
4.4	Treatment of Outliers and Issues of Data Adequacy	117
4.4.1	<i>Outliers</i>	117
4.4.2	<i>Missing Observations</i>	120
4.4.3	<i>General Comments on Data Adequacy</i>	121
4.5	Uses and Misuses of Dummy Variables	122
4.5.1	<i>Single-event Dummy Variables</i>	124
4.5.2	<i>Changes in Dummy Variables for Institutional Structure</i>	125
4.5.3	<i>Changes in Slope Coefficients</i>	126
4.6	Nonlinear Regressions	127
4.6.1	<i>Log-linear Equations</i>	127

---

4.6.2	<i>Quadratic and Other Powers, Including Inverse</i>	130
4.6.3	<i>Ceilings, Floors, and Kronecker Deltas: Linearizing with Dummy Variables</i>	131
4.7	General Steps for Formulating a Multivariate Regression Equation	133
	Case Study 5: The Consumption Function	134
	Case Study 6: Capital Spending	137
	Problems and Questions	142
<b>5.</b>	<b>Forecasting with a Single-equation Regression Model</b>	<b>145</b>
	Introduction	145
5.1	Checking for Normally Distributed Residuals	145
5.1.1	<i>Higher-order Tests for Autocorrelation</i>	146
5.1.2	<i>Tests For Heteroscedasticity</i>	148
5.2	Testing for Equation Stability and Robustness	149
5.2.1	<i>Chow Test for Equation Stability</i>	149
5.2.2	<i>Ramsey RESET Test to Detect Misspecification</i>	150
5.2.3	<i>Recursive Least Squares – Testing Outside The Sample Period</i>	152
5.2.4	<i>Additional Comments on Multicollinearity</i>	153
	Case Study 7: Demand for Motor Vehicles	154
5.3	Evaluating Forecast Accuracy	159
5.4	The Effect of Forecasting Errors in the Independent Variables	162
	Case Study 8: Housing Starts	164
5.5	Comparison with Naive Models	170
5.5.1	<i>Same Level or Percentage Change</i>	170
5.5.2	<i>Naive Models Using Lagged Values of the Dependent Variables</i>	174
5.6	Buildup of Forecast Error Outside the Sample Period	175
5.6.1	<i>Increased Distance from the Mean Value</i>	175
5.6.2	<i>Unknown Values of Independent Variables</i>	176
5.6.3	<i>Error Buildup in Multi-period Forecasting</i>	177
	Case Study 9: The Yen/Dollar Cross-rate	177
	Problems and Questions	180
<b>PART III</b>		<b>185</b>
<b>6.</b>	<b>Elements of Univariate Time-series Methods</b>	<b>187</b>
	Introduction	187

---

6.1	The Basic Time-series Decomposition Model	188
	Case Study 10: General Merchandise Sales	189
	6.1.1 <i>Identifying the Trend</i>	190
	6.1.2 <i>Measuring the Seasonal Factor</i>	190
	6.1.3 <i>Separating the Cyclical and Irregular Components</i>	192
6.2	Linear and Nonlinear Trends	193
6.3	Methods of Smoothing Data	197
	6.3.1 <i>Arithmetic Moving Averages</i>	198
	6.3.2 <i>Exponential Moving Averages</i>	200
	6.3.3 <i>Holt–Winters Method for Exponential Smoothing</i>	201
	6.3.4 <i>Hodrick–Prescott Filter</i>	203
6.4	Methods of Seasonal Adjustment	205
	6.4.1 <i>Arithmetic and Multiplicative Fixed Weights</i>	208
	6.4.2 <i>Variable Weights</i>	209
	6.4.3 <i>Treatment of Outlying Observations</i>	210
	6.4.4 <i>Seasonal Adjustment Factors with the Census Bureau X-11 Program</i>	212
	Case Study 11: Manufacturing Inventory Stocks for Textile Mill Products	215
	Case Study 12: Seasonally Adjusted Gasoline Prices	217
	Problems and Questions	221
7.	Univariate Time-series Modeling and Forecasting	225
	Introduction	225
	7.1 The Box–Jenkins Approach to Non-structural Models	226
	7.2 Estimating ARMA Models	227
	7.2.1 <i>First-order Autoregressive Models – AR(1)</i>	228
	7.2.2 <i>AR(2) Models</i>	230
	7.2.3 <i>AR(N) Models</i>	231
	7.2.4 <i>Moving-average (MA) Models</i>	233
	7.2.5 <i>ARMA Procedures</i>	236
	7.3 Stationary and Integrated Series	238
	7.4 Identification	246
	7.5 Seasonal Factors in ARMA Modeling	249
	7.6 Estimation of ARMA Models	254
	7.7 Diagnostic Checking and Forecasting	255
	Case Study 13: New Orders for Machine Tools	258
	Case Study 14: Inventory/Sales (I/S) Ratio for SIC 37 (Transportation Equipment)	261
	Case Study 15: Non-farm Payroll Employment	262
	Summary	263
	Problems and Questions	265

---

<b>PART IV</b>	271
<b>8. Combining Forecasts</b>	273
Introduction	273
8.1 Outline of the Theory of Forecast Combination	275
8.2 Major Sources of Forecast Error	276
8.3 Combining Methods of Non-structural Estimation	280
8.4 Combining Structural and Non-structural Methods	283
Case Study 16: Purchases of Consumer Durables	285
8.5 The Role of Judgment in Forecasting	290
8.5.1 <i>Surveys of Sentiment and Buying Plans</i>	290
8.5.2 <i>Sentiment Index for Prospective Home Buyers</i>	291
8.6 The Role of Consensus Forecasts	292
Case Study 17: Predicting Interest Rates by Combining Structural and Consensus Forecasts	294
8.7 Adjusting Constant Terms and Slope Coefficients	297
8.7.1 <i>Advantages and Pitfalls of Adjusting the                 Constant Term</i>	297
8.7.2 <i>Estimating Shifting Parameters</i>	299
8.8 Combining Forecasts: Summary	302
Case Study 18: Improving the Forecasting Record for Inflation	303
Summary	306
Problems and Questions	306
<b>9. Building and Presenting Short-term Sales Forecasting Models</b>	311
Introduction	311
9.1 Organizing the Sales Forecasting Procedure	312
9.2 Endogenous and Exogenous Variables in Sales Forecasting	315
9.2.1 <i>Macroeconomic Variables</i>	316
9.2.2 <i>Variables Controlled by the Firm</i>	316
9.2.3 <i>Variables Reflecting Competitive Response</i>	318
9.3 The Role of Judgment	319
9.3.1 <i>Deflecting Excess Optimism</i>	320
9.3.2 <i>The Importance of Accurate Macroeconomic                 Forecasts</i>	321
9.3.3 <i>Assessing Judgmental Inputs</i>	322

---

9.4	Presenting Sales Forecasts	324
9.4.1	<i>Purchases of Construction Equipment</i>	326
9.4.2	<i>Retail Furniture Sales</i>	333
	Case Study 19: The Demand for Bicycles	338
	Case Study 20: New Orders for Machine Tools	343
	Case Study 21: Purchases of Farm Equipment	346
	Problems and Questions	352
10.	Methods of Long-term Forecasting	355
	Introduction	355
10.1	Non-parametric Methods of Long-term Forecasting	357
10.1.1	<i>Survey Methods</i>	357
10.1.2	<i>Analogy and Precursor Methods</i>	359
10.1.3	<i>Scenario Analysis</i>	361
10.1.4	<i>Delphi Analysis</i>	364
10.2	Statistical Methods of Determining Nonlinear Trends: Nonlinear Growth and Decline, Logistics, and Saturation Curves	368
10.2.1	<i>Nonlinear Growth and Decline Curves</i>	368
10.2.2	<i>Logistics Curves (S-curves)</i>	369
10.2.3	<i>Saturation Curves</i>	377
	Case Study 22: Growth in E-commerce	379
10.3	Predicting Trends Where Cyclical Influences are Important	382
	Case Study 23: Sales of Personal Computers	382
10.4	Projecting Long-run Trends in Real Growth	386
	Case Study 24: Projecting Long-term Growth Rates in Japan and Korea	387
10.5	Forecasting Very Long-range Trends: Population and Natural Resource Trends	390
10.5.1	<i>Predicting Long-term Trends in Population Growth</i>	390
10.5.2	<i>Predicting Long-term Trends in Natural Resource Prices</i>	392
	Problems and Questions	396
<b>PART V</b>		<b>401</b>
11.	Simultaneous-equation Models	403
	Introduction	403

---

11.1	Simultaneity Bias in a Single Equation	404
11.2	Estimating Simultaneous-equation Models	409
	Case Study 25: Submodel for Prices and Wages	409
11.3	Further Issues in Simultaneous-equation Model Forecasting	417
	Case Study 26: Simultaneous Determination of Inflation, Short-term and Long-term Interest Rates, and Stock Prices	418
	Case Study 27: Simultaneous Determination of Industrial Production, Producers Durable Equipment, Inventory Investment, and Imports	433
11.4	Summary	438
	Problems and Questions	439
<b>12.</b>	<b>Alternative Methods of Macroeconomic Forecasting</b>	<b>443</b>
	Introduction	443
12.1	Structural versus VAR Models	444
12.2	Solving Structural Macroeconomic Models	446
	12.2.1 <i>Outlining the Equilibrium Structure</i>	447
	12.2.2 <i>Newton–Raphson Method and the Gauss– Seidel Algorithm</i>	448
	12.2.3 <i>The Triangular Structure</i>	449
12.3	A Prototype Macroeconomic Model	450
	12.3.1 <i>Summary of Macroeconomic Model Equations</i>	451
	12.3.2 <i>Treatment of Trends and Autocorrelation</i>	453
12.4	Simulating the Model	455
12.5	Preparing the Model for Forecasting	462
	12.5.1 <i>Forecasting with AR(1) Adjustments</i>	462
	12.5.2 <i>Forecasting with Constant Adjustments</i>	463
	12.5.3 <i>Comparison of Alternative Forecasts</i>	463
12.6	Using the Leading Indicators for Macroeconomic Forecasting	470
12.7	Using Indexes of Consumer and Business Sentiment for Forecasting	474
12.8	Conclusion	478
	Problems and Questions	479
	Index	485

---
