Preface xi

Image Modeling During the 1980s: A Brief Overview 1

A. Rosenfeld

Compound Gauss-Markov Random Fields for Parallel Image Processing 11

F. -C. Jeng, J. W. Woods, and S. Rastogi

Stochastic Algorithms for Restricted Image Spaces and Experiments in Deblurring 39

D. Geman, G. Reynolds, and C. Yang

A Continuation Method for Image Estimation Using the Adiabatic Approximation 69

A. Rangarajan and R. Chellappa

A Comprehensive Statistical Model for Single-Photon Emission Tomography 93

S. Geman, K. M. Manbeck, and D. E. McClure

Gaussian Markov Random Fields at Multiple Resolutions 131

S. Lakshmanan and H. Derin

Classification of Natural Textures Using Gaussian Markov Random Field Models 159

S. Chatterjee

Spectral Estimation for Random Fields with Applications to Markov Modelling and Texture Classification 179

J. Yuan and T. Subba Rao

Probabilistic Network Inference for Cooperative High and Low Level Vision 211

P. B. Chou, P. R. Cooper, M. J. Swain, C. M. Brown, and L. E. Wixson

Stereo Matching 245*S. Barnard***3-D Analysis of A Shaded and Textural Surface Image 273***R. L. Kashyap and Y. Choe***Shape from Texture using Gaussian Markov Random Fields 307***F. S. Cohen and M. A. S. Patel***The Use of Markov Random Fields in Estimating and Recognizing Objects in 3D Space 335***D. B. Cooper, J. Subrahmonia, Y. -P. Hung, and B. Cernuschi-Frias***A Markov Random Field Model-Based Approach to Image Interpretation 369***J. W. Modestino and J. Zhang***A Markov Random Field Restoration of Image Sequences 409***T. J. Hainsworth and K. V. Mardia***The MIT Vision Machine: Progress in the Integration of Vision Modules 447***T. Poggio and D. Weinshall***Parameter Estimation for Gibbs Distributions from Fully Observed Data 471***B. Gidas***On Sampling Methods and Annealing Algorithms 499***S. B. Gelfand and S. K. Mitter***Adaptive Gibbsian Automata 517***J. L. Marroquin and A. Ramirez***Range Image Segmentation Using MRF Models 543***A. K. Jain and S. G. Nadabar***Index 573**
