

INHALTSVERZEICHNIS

Seite

J. Frehse & J. Naumann

Existence of weak solutions to the stationary semiconductor equations with avalanche generation

3

H. Gajewski & U. Krause

The drift-diffusion model for carrier transport in semiconductors — some open questions and numerical experiments

17

J. Galley

The semiconductor equations with non-standard boundary conditions

32

A. Glitzky & K. Gröger & R. Hünlich

Existence, uniqueness and asymptotic behaviour of solutions to equations modelling transport of dopants in semiconductors

49
