

Contents

C.T.C. Wall

Real rational quartic curves 1

J. Sotomayor

Stability properties of the inverse mapping domain 33

M.A.S. Ruas & M.J. Saia

The polyhedron of equisingularity of germs of hypersurfaces 37

J.J. Nuño Ballesteros & O. Saeki

Singular surfaces in 3-manifolds, the tangent developable of a space
curve and the dual of an immersed surface in 3-space 49

D. Mond & D. Ratcliffe

An infinite number of counter-examples to a conjecture on stems 65

T. Kawakami

Nash structures of equivariant smooth manifolds and equivariant
smooth vector bundles 75

S. Izumiya

Local classifications of multi-valued solutions of quasilinear first order
partial differential equations 84

T. Gaffney

Equisingularity of plane sections, t_1 condition and the integral
closure of modules 95

J. S. Carter & M. Saito

Knot diagrams and braid theories in dimension 4 112

J. W. Bruce P. Giblin F. Tari

Families of surfaces: height functions, Gauss maps and duals 148

S. Bromberg & S. López de Medrano

C^r -sufficiency of quasihomogeneous functions 179

J.-P. Brasselet

Poincaré morphism and divisors of compact toric varieties 189

J. Basto Gonçalves

Singularities of Euler equations and implicit Hamilton equations 203
