

Contents

Preface

Global Dynamics of Driven Oscillators: Fractal Basins and Indeterminate Bifurcations J.M.T. Thompson	1
An Introduction to the Mechanisms and Methods for the Detection of Chaos S. Wiggins	49
Some Recent Developments in Nonlinear Elasticity and its Applications to Materials Science J.M. Ball	93
Analysis of the $2d$ and $3d$ Navier-Stokes Equations J.D. Gibbon	121
Organised Chaos in Fluid Dynamics T. Mullin and J.J. Koblitz	147
Weak and Strong Nonlinearity in Boundary Layer Transition F.T. Smith	179
Recent Developments on Wave Instability T.J. Bridges	205
Non-Smooth Dynamical Systems and the Grazing Bifurcation C.J. Budd	219
Solid Tumour Growth: A Case Study in Mathematical Biology B.D. Sleeman	237
