## Part I Dissertation Award of the GOR

---

|                                                                                                                                                          |           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Zeitkontinuität in zeitdiskreten Modellen – Neue Ansätze<br/>für die Produktionsplanung in der Prozessindustrie</b><br><i>Christopher Sürle</i> ..... | <b>3</b>  |
| <b>A Hierarchical Production Planning Approach for<br/>Multiprocessor Flow Shops</b><br><i>Daniel Quadt</i> .....                                        | <b>9</b>  |
| <b>Representing Labor Demands in Airport Ground Staff<br/>Scheduling</b><br><i>Jörg Herbers</i> .....                                                    | <b>15</b> |
| <b>Rapid Mathematical Programming or How to Solve Sudoku<br/>Puzzles in a Few Seconds</b><br><i>Thorsten Koch</i> .....                                  | <b>21</b> |

---

## Part II Diploma Award of the GOR

---

|                                                                                              |           |
|----------------------------------------------------------------------------------------------|-----------|
| <b>Standortplanung von Einsatzkräften bei Großereignissen</b><br><i>Julia Drechsel</i> ..... | <b>29</b> |
|----------------------------------------------------------------------------------------------|-----------|

---

## Part III Logistics

---

|                                                                                                                            |           |
|----------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Customer Selection and Profit Maximization in Vehicle<br/>Routing Problems</b><br><i>Deniz Aksen, Necati Aras</i> ..... | <b>37</b> |
|----------------------------------------------------------------------------------------------------------------------------|-----------|

|                                                                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>A Decision Support System for Strategic and Operational Planning of Road Feeder Services</b><br><i>Paul Bartodziej, Ulrich Derigs, Boris Grein</i> .....                                          | 43  |
| <b>Mehrdepot-Umlaufplanung: Berücksichtigung von Verschiebeintervallen für Fahrten in einem Time-Space-Netzwerk-basierten Modell</b><br><i>Stefan Bunte, Natalia Kliewer, Leena Suhl</i> .....       | 49  |
| <b>Adaptive Dienst- und Umlaufplanung im ÖPNV</b><br><i>Vitali Gintner, Stefan Kramkowski, Ingmar Steinzen, Leena Suhl</i> .....                                                                     | 55  |
| <b>Timber Transport Vehicle Routing Problems: Formulation and Heuristic Solution</b><br><i>Manfred Gronalt, Patrick Hirsch</i> .....                                                                 | 61  |
| <b>Robustness in the Context of Autonomous Cooperating Logistic Processes: A Sustainability Perspective</b><br><i>Lars Arndt, Georg Müller-Christ</i> .....                                          | 67  |
| <b>Open Vehicle Routing Problem with Time Deadlines: Solution Methods and an Application</b><br><i>Zeynep Özyurt, Deniz Aksen, Necati Aras</i> .....                                                 | 73  |
| <b>An Optimal Control Policy for Crossdocking Terminals</b><br><i>Matthias Stickel, Kai Furmans</i> .....                                                                                            | 79  |
| <b>An Enumerative Approach to Rail-Truck Intermodal Transportation of Mixed Shipments</b><br><i>Manish Verma, Vedat Verter</i> .....                                                                 | 85  |
| <b>Some Remarks on the Stability of Production Networks</b><br><i>Bernd Scholz-Reiter, Fabian Wirth, Michael Freitag, Sergey Dashkovskiy, Thomas Jagalski, Christoph de Beer, Björn Rüffer</i> ..... | 91  |
| <b>Simulating Dispatching Strategies for Automated Container Terminals</b><br><i>Dirk Briskorn, Sönke Hartmann</i> .....                                                                             | 97  |
| <hr/>                                                                                                                                                                                                |     |
| <b>Part IV New Maritime Businesses</b>                                                                                                                                                               |     |
| <hr/>                                                                                                                                                                                                |     |
