

CONTENTS

L. A. Aizenberg, O. V. Karepov, and A. A. Shlapunov , On the property of uniqueness and existence of a limit in Carleman's formulas	1
Yu. Yu. Arkhipov and V. V. Vedenyapin , On the classification and stability of steady-state solutions of Vlasov's equation on a torus and in a boundary value problem	11
N. S. Bakhvalov and M. È. Èglit , Energy estimates in the case of nonapplicability of the Korn inequality, and orthogonal decompositions in spaces of matrices	19
A. A. Bolibrukh , On analytic transformation to Birkhoff standard form	29
I. V. Volovich , From p -adic strings to étale strings	37
A. V. Voronin and S. S. Khoruzhii , BRST quantization as a problem in the representation theory of Lie superalgebras	43
I. Kh. Dimovski , Nonlocal operational calculi	53
Yu. N. Drozhzhinov and B. I. Zav'yalov , A theorem on the division of generalized functions by a homogeneous function with preservation of quasi-asymptotics, and its application	67
Yu. A. Dubinskii , On well-posedness of the Cauchy problem in the complex domain	79
A. N. Kazakov and V. I. Lebedev , Gauss-type quadrature formulas for the sphere, invariant with respect to the dihedral group	89
V. N. Kolokol'tsov , Estimates of accuracy for the asymptotics of the Laplace integral	101
A. N. Kochubei , On the asymptotics of p -adic Green functions	105
G. I. Marchuk , On some approaches to the construction of adjoint operators in nonlinear problems	115
V. P. Maslov and A. M. Chebotarev , Cluster expansions and second quantization	123
V. V. Napalkov and I. Kh. Musin , On a functional equation in ρ -convex domains	137
A. G. Sergeev and Shchan'yui Chzhou [Zhou Xiangyu] , On invariant domains of holomorphy	145
S. A. Telyakovskii , Weighted integral estimates for lacunary trigonometric series	157
A. Yu. Khrennikov , Non-Archimedean probability	167
P. Antosik , On composition of distributions	175
I. Ya. Aref'eva and G. E. Arutyunov , On $*$ -representations of the $\mathbb{Z}_2$ -graded extension of the quantum group $U_q(2)$	181
R. D. Carmichael , Representation of holomorphic functions in tubes and boundary values	191
R. D. Carmichael and S. Pilipović , Elements of $\mathcal{D}'_L(\mathbb{R}^n)$ as boundary values ..	205
S. Dierolf and S. Müller , Some remarks on weak acyclicity	217
B. G. Dragović , On p -adic series in mathematical physics	221
B. Fisher and A. Kaminski , The neutrix convolution product of the distributions $\ln x_-$ and $x_+^\dagger$	233
P. H. Frampton , Retrospective on p -adic string theory	245
E. M. Jäger and A. Sevink , A prolongation structure for the nonlinear Schrödinger equation	249

A. Kaminski, D. Kovačević, and S. Pilipović, The equivalence of various definitions of the convolution of ultradistributions	259
H. Komatsu, Multipliers for Laplace hyperfunctions —a justification of Heaviside's rules	271
M. Morimoto, Entire functions of exponential type on the complex sphere ...	281
N. Ortner and P. Wagner, Feynman integral formulae and fundamental solutions of decomposable evolution operators	305
W. Schempp, Phase coherent wavelets, Fourier transform magnetic resonance imaging, and synchronized time-domain neural networks	323
V. Schmidt and P. Dierolf, A pre-dual for the convolution algebra $\mathcal{D}'(\Gamma_+)$...	353
J. Siciak, Compact sets in $\mathbb{R}^n$ admitting polynomial inequalities	361
B. Stanković, Asymptotic almost periodic distributions, application to partial differential equations	367
D. Vogt, Kernels of power series matrices	377
J. Voigt, Stability of the essential type of strongly continuous semigroups	383
V. V. Zharinov, Low-dimensional conservation laws of PDE	391
