

TABLE OF CONTENTS

Abstract	viii
Introduction.....	1
§1 Whitehead posets and symmetric Whitehead automorphisms	9
1.1 Based partitions and the Whitehead poset	9
1.2 Symmetric Whitehead automorphisms	13
1.3 Labelled bipartite trees	14
§2 The complexes $K(G)$ and $K_0(G)$	18
2.1 The complex $K(G)$	18
2.2 Symmetric automorphisms and the subcomplex $K_0(G)$	20
2.3 Examples – small values of n	22
2.4 Free products with decomposable factors	23
§3 Lemmas of reductivity	26
3.1 Refinement, disjunction and compatibility of based partitions ...	26
3.2 The factorization and existence lemmas	30
3.3 The Collins-Zieschang Lemma	32
§4 Contractibility of $K_0(G)$	34
4.1 Poset lemmas	34
4.2 Proof of contractibility	35
4.3 The subcomplexes $K_{\min}(\mathcal{W})$	45
§5 The vertex stabilizers and other subgroups of $Aut(G)$	46
5.1 Subgroups of symmetric automorphisms	47
5.2 The vertex stabilizers	48
5.3 The homomorphisms ψ and $\overline{\psi}$	53
§6 Applications to groups of automorphisms	58
6.1 The groups $L(G)$ and $\overline{L}(G)$	59
6.2 Torsion-free subgroups	61
6.3 Virtual cohomological dimension	65
6.4 Virtually geometrically finite automorphism groups	68
6.5 Euler characteristic	69
§7 Finite groups of automorphisms	72
§8 Actions on $\mathbb{R}$ -trees	81
8.1 Ideal simplicial complexes	81
8.2 A space of actions on simplicial $\mathbb{R}$ -trees	84
8.3 The Gromov topology	91
References	95
