

Table of Contents

Introduction	1
§1. The operator Hilbert space	10
§2. Complex interpolation	21
§3. The oh tensor product	39
§4. Weights on partially ordered vector spaces.....	50
§5. $(2, w)$ -summing operators	57
§6. The gamma-norms and their dual norms	67
§7. Operators factoring through OH	75
§8. Factorization through a Hilbertian operator space	80
§9. On the “local theory” of operator spaces	88
§10. Open questions	95
References	98
