

## CONTENTS

Introduction	xi
Aharon Atzmon	1
<i>Spaces of entire functions with no proper translation invariant subspaces</i>	
John J. Benedetto	9
<i>Gabor representations and wavelets</i>	
Ron C. Blei	29
<i>Measurements of interdependencies of stochastic increments</i>	
Yngve Domar	37
<i>Translation-invariant subspaces of weighted <math>L^p</math></i>	
S. W. Drury	43
<i>A survey of <math>k</math>-plane transforms</i>	
Ron C. Blei and John J. F. Fournier	57
<i>Mixed-norm conditions and Lorentz norms</i>	
Colin C. Graham	79
<i>Summary of some results on <math>L^p</math>-improving measures</i>	
Håkan Hedenmalm	89
<i>On the <math>f</math>- and <math>K</math>-properties of certain function spaces</i>	
Hans P. Heinig and Gordon J. Sinnamon	93
<i>Laplace representation of functions in mixed weighted Bergman spaces</i>	
Shelby Kilmer	101
<i>Equivalence of Riesz products</i>	

T. W. Körner	115
<i>Universal trigonometric series with rapidly decreasing coefficients</i>	
W. Christopher Lang	151
<i>A hypergroup measure algebra that admits no analogue of the structure theorem of J.L. Taylor</i>	
Colin C. Graham, Anthony To-Ming Lau and Michael Leinert	157
<i>Continuity of translation and separable invariant subspaces of Banach spaces associated to locally compact groups</i>	
Yong-Zhuo Chen and Ka-Sing Lau	165
<i>Harmonic analysis on functions with bounded means</i>	
O. Carruth McGehee	177
<i>Gaussian sums and harmonic analysis on finite fields</i>	
Jean-François Méla	193
<i>Quasi-invariant measures and Fourier properties</i>	
L. Thomas Ramsey	217
<i>Stability of (deterministic) adaptive auto-regressive filters</i>	
Sadahiro Saeki	247
<i>Some applications of Khintchin's inequalities</i>	
Enji Sato	273
<i>Certain measures on locally compact abelian groups</i>	
Richard Vrem	281
<i>Torsion and torsion-free hypergroups</i>	
C. Robert Warner	291
<i>Weak <math>S</math>-sets and Helson sets</i>	
Yitzhak Weit	295
<i>An asymptotic characterization of harmonic functions</i>	
J. Michael Wilson	299
<i>Weighted inequalities for the square function</i>
