

## Contents

|     |                                                     |        |
|-----|-----------------------------------------------------|--------|
| §1  | Basic definitions and facts                         | Pg. 4  |
| §2  | Decomposition of induced characters, Hecke algebras | Pg. 6  |
| §3  | The Hecke algebra $\mathcal{H}(G, B)$               | Pg. 13 |
| §4  | Explicit representations of $\mathcal{H}$           | Pg. 17 |
| §5  | Generic Hecke algebras                              | Pg. 27 |
| §6  | Parametrization of characters in $({}^1B(q))^G(q)$  | Pg. 37 |
| §7  | Rationality of characters                           | Pg. 40 |
| §8  | Degrees of $(\zeta_{\varphi, q})$                   | Pg. 44 |
| §9  | Groups with split BN-pairs                          | Pg. 51 |
| §10 | Harish-Chandra theory                               | Pg. 60 |
| §11 | Modular Hecke algebras                              | Pg. 75 |
