

CONTENTS

Preface	vii
Notation	ix
Introductory Remarks	1
Notes at the End of Introductory Remarks	6
Chapter I. Some Preliminaries	7
§ 1.1. Some Convexity Principles	7
§ 1.2. A Lemma in Complex Function Theory	13
§ 1.3. Gabriel's Convexity Theorem (Assuming Riemann Mapping Theorem)	17
§ 1.4. A Theorem of Montgomery and Vaughan	21
§ 1.5. Hadamard's Three Circles Theorem	25
§ 1.6. Borel-Carathéodory Theorem	26
§ 1.7. A lemma in Complex Function Theory (continued)	27
Notes at the End of Chapter I	35
Chapter II. Some Fundamental Theorems on Titchmarsh Series and Applications	37
§ 2.1. Introduction	37
§ 2.2. Main Lemma	37
§ 2.3. First Main Theorem	44
§ 2.4. Second Main Theorem	49

§ 2.5. Third Main Theorem	51
Notes at the End of Chapter II	57
Chapter III. Titchmarsh's Phenomenon	59
§ 3.1. Introduction	59
§ 3.2. On the Line $\sigma = \frac{1}{2}$	61
§ 3.3. On the Line σ with $\frac{1}{2} < \sigma < 1$	64
§ 3.4. Weak Titchmarsh Series and Titchmarsh Phenomenon on the Line $\sigma = 1$	76
Notes at the End of Chapter III	90
Chapter IV. Mean-value Theorems for the Fractional Powers of $\zeta(\frac{1}{2} + it)$	93
§ 4.1. Introduction	93
§ 4.2. Lower Bounds	94
§ 4.3. Upper Bounds	110
Notes at the End of Chapter IV	114
Chapter V. Zeros of $\zeta(s)$	118
§ 5.1. Introduction	118
§ 5.2. Infinitude of Zeros in $t \geq 1$	118
§ 5.3. On Some Theorems of Littlewood and Selberg	123
§ 5.4. Infinitude of Simple Zeros in $t \geq 1$	125

Notes at the End of Chapter V	132
Chapter VI. Some Recent Progress (Statements Without Proofs of Some Difficult Results Mentioned in the Introduction)	134
§ 6.1. Introduction	134
§ 6.2. Hardy's Theorem and Further Developments	134
§ 6.3. Deeper Problems on Mean-value Theorems on $\sigma = \frac{1}{2}$	135
§ 6.4. Deeper Problems on Mean-value Theorems in $\frac{1}{2} < \sigma < 1$	137
§ 6.5. On the Line $\sigma = 1$	138
Chapter VII. Appendix. (Asymptotic Formulae for the Gamma Function and so on)	140
§ 7.1. Introduction	140
§ 7.2. A Fourier Expansion	140
§ 7.3. Functional Equation	141
§ 7.4. Asymptotics of $\Gamma(s)$	143
§ 7.5. Estimate for $\frac{\zeta'(s)}{\zeta(s)}$ On Certain Lines in the Critical Strip	149
§ 7.6. Asymptotics of $ d_k(n) ^2$	152
§ 7.7. Some Useful Reciprocal Relations Involving Certain Kernels	157
References	159
