

Contents

1	Elements of Differential Geometry	11
1.1	Vector Bundles	11
1.2	Characteristic Classes	17
1.2.1	Connections on Vector Bundles	17
1.2.2	The Chern–Weyl Theory of Characteristic Classes	24
1.3	Riemannian Manifolds	30
1.3.1	The Riemannian Connection	30
1.3.2	Homotopy Formulas	34
1.4	K-Theory	37
1.4.1	K-Functor with Compact Supports	37
1.4.2	The Thom Isomorphisms	43
1.5	Localization Formula	49
2	Symplectic Manifolds	52
2.1	Symplectic Spaces	52
2.2	The Hamiltonian Mechanics	56
2.3	The Darboux Theorem	60
2.4	The Generating Function	63
2.5	Symplectic Connections	66
2.6	Examples	70
3	The Weyl Quantization	76
3.1	Pseudodifferential Operators	76
3.1.1	Gaussian Integrals	76
3.1.2	Symbol Classes	80
3.2	The Composition Formula	84
3.3	Gaussian Symbols and Wave Packets	87
3.4	Operators in $L^2(\mathbb{R}^n)$	94
3.5	Linear Canonical Transformations	101
4	Introduction to Index Theory	110
4.1	Fredholm Operators and Families	110
4.2	Elliptic Operators	120
4.3	The Harmonic Oscillator	126

4.4	The Weyl Algebras Bundle	131
4.5	The Bott Generator	135
5	Deformation Quantization	138
5.1	The Formal Weyl Algebras Bundle	139
5.2	Abelian Connections and Quantization	143
5.3	Generalizations	149
5.4	The Heisenberg Equation	155
5.5	Isomorphisms of Quantum Algebras	162
5.6	Traces on Quantum Algebras	171
5.7	Poisson Manifolds	178
5.8	A Group Action	180
6	The Index Theorem for Quantum Algebras	184
6.1	Properties of the Index	184
6.2	The Thom Isomorphism for Quantum Algebras	189
6.3	Operator-Valued Coefficients	193
6.4	Formal Coefficients	201
6.5	Reordering Procedure	208
6.6	Quantum Algebras on the Total Space	221
6.7	The Case of $\mathbb{R}^{2n}$	227
6.8	The Completion of the Proof	236
7	The Asymptotic Operator Representation	240
7.1	Necessary Conditions	240
7.2	Examples	245
7.2.1	The Flag Manifold	246
7.2.2	The Projective Space	250
7.3	The Construction of the AOR	251
7.3.1	An Obstructing Cocycle	252
7.3.2	The Construction of Transition Operators	255
7.3.3	The Calculation of the Obstructing Cocycle	259
8	Symplectic Reduction	267
8.1	The Marsden-Weinstein Reduction	267
8.2	Quantization of the Fiber Space	271
8.3	Quantum Reduction	277
8.4	Discussion	283
9	A Trace Formula for the Schrödinger Operator	289
9.1	The Wick and Anti-Wick Symbols	290
9.2	Some Estimates of Trace Norms	293
9.3	Asymptotic Solutions	295
9.4	The Wick Symbols and the AOR	299

9.5	A Trace Formula	304
9.6	Example	310
A	Complex Symplectic Geometry	315
	Bibliography	319
	Index	323
