<i>Preface</i>	<i>page vii</i>
Notation	1
Part I Calculus of tableaux	5
1 Bumping and sliding	7
1.1 Row-insertion	7
1.2 Sliding; jeu de taquin	12
2 Words; the plactic monoid	17
2.1 Words and elementary transformations	17
2.2 Schur polynomials	24
2.3 Column words	27
3 Increasing sequences; proofs of the claims	30
3.1 Increasing sequences in a word	30
3.2 Proof of the main theorem	33
4 The Robinson–Schensted–Knuth correspondence	36
4.1 The correspondence	36
4.2 Matrix-ball construction	42
4.3 Applications of the R–S–K correspondence	50
5 The Littlewood–Richardson rule	58
5.1 Correspondences between skew tableaux	58
5.2 Reverse lattice words	63
5.3 Other formulas for Littlewood–Richardson numbers	68
6 Symmetric polynomials	72
6.1 More about symmetric polynomials	72
6.2 The ring of symmetric functions	77
Part II Representation theory	79
7 Representations of the symmetric group	83
7.1 The action of S_n on tableaux	83
7.2 Specht modules	85

7.3	The ring of representations and symmetric functions	90
7.4	A dual construction and a straightening algorithm	95
8	Representations of the general linear group	104
8.1	A construction in linear algebra	104
8.2	Representations of $GL(E)$	112
8.3	Characters and representation rings	116
8.4	The ideal of quadratic relations	124
	Part III Geometry	127
9	Flag varieties	131
9.1	Projective embeddings of flag varieties	131
9.2	Invariant theory	137
9.3	Representations and line bundles	140
9.4	Schubert calculus on Grassmannians	145
10	Schubert varieties and polynomials	154
10.1	Fixed points of torus actions	154
10.2	Schubert varieties in flag manifolds	157
10.3	Relations among Schubert varieties	163
10.4	Schubert polynomials	170
10.5	The Bruhat order	173
10.6	Applications to the Grassmannian	178
	<i>Appendix A Combinatorial variations</i>	183
A.1	Dual alphabets and tableaux	183
A.2	Column bumping	186
A.3	Shape changes and Littlewood–Richardson correspondences	189
A.4	Variations on the R–S–K correspondence	197
A.4.1	The Burge correspondence	198
A.4.2	The other corners of a matrix	201
A.4.3	Matrices of 0's and 1's	203
A.5	Keys	208
	<i>Appendix B On the topology of algebraic varieties</i>	211
B.1	The basic facts	212
B.2	Borel–Moore homology	215
B.3	Class of a subvariety	219
B.4	Chern classes	222
	<i>Answers and references</i>	226
	<i>Bibliography</i>	248
	<i>Index of notation</i>	254
	<i>General Index</i>	257
