

Table of contents

1. Introduction	1
1.1 Background	1
1.2 Objectives	2
1.3 Thesis layout	2
2. Literature review	3
2.1 Importance of grain storage	3
2.2 Grain losses during storage	3
2.3 Control of stored grain insects	4
2.3.1 Chemical control	4
2.3.2 Alternatives	5
2.3.3 Thermal disinfestation	5
2.4 Solar energy as heat source	7
2.5 Effect of thermal disinfestation on grain quality	8
3. Theoretical approach	9
3.1 Hypothesis	9
3.2 Theoretical background for grain temperature prediction model	9
3.2.1 Thermodynamical approach	9
3.2.1.1 Modes of heat transfer	9
3.2.1.2 Characteristics of fluid flow	10
3.2.1.3 Calculation of entrance lengths	12
3.2.1.3.1 Hydrodynamic entrance length	12
3.2.1.3.2 Thermal entrance length	13
3.2.1.4 Convection heat transfer coefficient	14
3.2.1.5 Calculation of axial mean temperature	15
3.2.1.5.1 Constant surface heat flux	15
3.2.1.5.2 Constant surface temperature	16
3.2.1.6 Solar collectors	17
3.2.1.6.1 Construction	17
3.2.1.6.2 Collector efficiency	18
3.2.2 Mathematical approach: finite element method	19
3.3 Hypothetical heating apparatus	21
3.4 Theoretical results	21

3.4.1 Thermodynamical approach	21
3.4.1.1 Constant surface temperature.....	21
3.4.1.2 Constant surface heat flux	24
3.4.1.2.1 Temperature estimation.....	24
3.4.1.2.2 Thermal disinfestation rate	24
3.4.2 Mathematical approach: finite element method	25
3.5 Conclusions	27
4. Materials and methods.....	28
4.1 Solar thermal disinfestation of grain: static state	28
4.1.1 Collectors construction	28
4.1.2 Measurements.....	28
4.1.3 Heating procedure.....	30
4.1.4 Calculation of solar radiation on tilted surface	30
4.2 Grain thermal disinfestation in a continuous flow system	31
4.2.1 Artificial heating	31
4.2.1.1 Heating unit.....	31
4.2.1.2 Grain preparation and heating procedure	33
4.2.1.3 Temperature measurement instruments	34
4.2.2 Solar heating	35
4.2.2.1 Heating unit.....	35
4.2.2.2 Heating procedure and measurements	35
4.3 Effect of thermal disinfestation on grain quality	36
5. Results	37
5.1 Solar thermal disinfestation of grain: static state	37
5.1.1 Collector improvement.....	37
5.1.2 Thermal disinfestation	37
5.2 Grain thermal disinfestation in a continuous flow system.....	41
5.2.1 Artificial heating	41
5.2.1.1 Grain flow rate across the tunnel	41
5.2.1.2 Surface temperature control.....	42
5.2.1.3 Grain temperature measurement instruments.....	42
5.2.1.4 Grain moisture content.....	42
5.2.1.5 Factors affecting grain temperature	42
5.2.1.5.1 Surface temperature and location inside the tunnel	42
5.2.1.5.2 Grain depth.....	47

5.2.1.6 Temperature profile: x-axis.....	48
5.2.1.7 Temperature profile: y-axis.....	52
5.2.2 Solar heating	57
5.2.2.1 Factors affecting grain temperature	57
5.2.2.1.1 Collector tilting.....	57
5.2.2.1.2 Ambient temperature.....	57
5.2.2.1.3 Absorbing material	57
5.2.2.1.4 Grain depth.....	57
5.2.2.1.5 Grain flow rate	59
5.2.2.2 Collector efficiency.....	61
5.2.2.3 Temperature profile.....	62
5.3 Effect of thermal disinfestation on grain quality.....	62
6. Discussion	64
6.1 Solar thermal disinfestation of grain: static state.....	64
6.2 Grain thermal disinfestation in a continuous flow system.....	64
6.2.1 Factors affecting grain temperature.....	65
6.2.2 Comparison between measured and predicted grain temperature	66
6.2.2.1 Constant surface temperature.....	66
6.2.2.2 Constant surface heat flux	71
6.2.3 Thermal disinfestation rate	72
6.3 Effect of thermal disinfestation on grain quality.....	72
7. Conclusions and recommendations	74
7.1 Conclusions	74
7.1.1 Solar thermal disinfestation of grain: static state	74
7.1.2 Grain thermal disinfestation in a continuous flow system	74
7.1.2.1 Artificial heating.....	74
7.1.2.2 Solar heating.....	75
7.1.3 Effect of thermal disinfestation on grain quality	75
7.2 Recommendations	75
8. Summary	76
9. Appendices	78
9.1 Appendix A.....	78
9.2 Appendix B.....	79
10. References	81
