

CONTENTS

PREFACE	xi
INTRODUCTION	1
1. NUMBER OF LIGANDED MOLECULES	3
1.1. Experimental Determination / 3	
1.1.1. Determination of Concentration of Free Ligand / 3	
1.1.2. Perturbation of Properties of Bound Ligand / 8	
1.1.3. Perturbation of Properties of Receptor / 11	
1.2. Conventional Notation / 11	
2. AFFINITIES: FROM A SITE PERSPECTIVE	13
2.1. Single Binding Site: Univalent Receptor / 13	
2.2. Multivalent Uniform Receptor: Many Identical Binding Sites with Invariant Identical Affinities / 16	
2.2.1. Algebraic Representation of Binding / 16	
2.2.2. Graphical Representations / 18	

2.3.	Multivalent Receptor: Sites with Different but Invariant Affinities / 21	
2.4.	Multivalent Receptor: Site Affinities Change with Extent of Occupancy by Ligands / 23	
2.4.1.	Divalent Systems / 23	
2.4.2.	Multivalent Systems / 25	
3.	AFFINITIES: FROM A STOICHIOMETRIC PERSPECTIVE	27
3.1.	Divalent Receptor / 27	
3.2.	Tetravalent Receptor / 28	
3.3.	Multivalent Receptor / 30	
4.	AFFINITIES: FROM A GHOST-SITE PERSPECTIVE	33
4.1.	Ghost-Site Binding Constants / 33	
4.2.	Alternative Ghost-Site Binding Equation / 35	
5.	FACTS AND FANTASIES FROM GRAPHICAL ANALYSES	38
5.1.	Direct Scales / 38	
5.2.	Linear Transform Graphs / 41	
5.3.	Semilogarithmic Graphs / 49	
6.	NUMERICAL EVALUATIONS OF STOICHIOMETRIC BINDING CONSTANTS	53
6.1.	Divalent Receptors / 53	
6.2.	Multivalent Receptors / 58	
6.3.	Simple Graphical Evaluations of K_1 / 63	
7.	AFFINITY PROFILES	66
8.	THERMODYNAMIC PERSPECTIVES	74
8.1.	Variation of ΔG° in a Series of Related Ligands / 74	
8.2.	Change in ΔG° in Successive Stoichiometric Steps / 80	

- 8.3. Variation of ΔG° with the Nature of the Receptor / 82
- 8.4. Enthalpies and Entropies of Binding / 84

9. FORCES OF INTERACTION 89

- 9.1. Nonpolar Interactions: van der Waals, London, Hydrophobic / 89
- 9.2. Ionic and Electrostatic Interactions / 91
- 9.3. Hydrogen Bonding / 96
- 9.4. Clathrate Hydrates / 100
- 9.5. Integrating Perspective / 104

10. MOLECULAR SCENARIOS 109

- 10.1. Initially Identical Sites, Affinities Changing with Occupancy / 110
- 10.2. Conformational Equilibria: Allosteric Interactions / 113

APPENDICES

- A1. EXPERIMENTAL PROCEDURES IN EQUILIBRIUM DIALYSIS 121**
- A2. PROPERTIES OF GRAPHICAL REPRESENTATIONS OF MULTIPLE CLASSES OF INDEPENDENT BINDING SITES 131**
- A3. RELATIONSHIPS BETWEEN STOICHIOMETRIC BINDING CONSTANTS AND SITE-BINDING CONSTANTS 143**
- A4. RELATIONSHIPS BETWEEN STOICHIOMETRIC BINDING CONSTANTS AND GHOST-SITE BINDING CONSTANTS 154**

INDEX 161
