Acknowledgments xiii

CHAPTER 1 Introduction 1

- 1.1. ISO C++ 2
- 1.2. Structure of This Book 2

Section I: Introduction to Visual C++.NET 2005

CHAPTER 2 The .NET Framework 5

- 2.1. MS Visual Studio 2005 Project Structure 5
- 2.2. What is C++/CLI? 5
- 2.3. Why Visual C++.NET? 6
- 2.4. The VC++.NET Compiler 7
- 2.5. What About Speed? 7
- 2.6. The .NET Framework 7
- 2.7. Sample Code: MessageBox_Example 9
- 2.8. Sample Code: StringConcat_Example 11
- 2.9. Sample Code: Debug_Example 12
- 2.10. Versioning 14
- 2.11. Summary 14

CHAPTER 3 Tracking References 15

- 3.1. Sample Code: TrackingReference_Example 15
- 3.2. Sample Code: TemplateFunction_Example 16
- 3.3. ^Managed Handle 16
- 3.4. Sample Code: RefType_Example 17
- 3.5. Summary 17

CHAPTER 4	Classes and Objects	19
4.1.	Abstraction	19
4.2.	Encapsulation	21
4.3.	Inheritance	21
4.4.	Polymorphism	21
4.5.	Memory Management in .NET	21
4.6.	.NET Types	22
4.7.	Unmanaged Types	23
4.8.	Mixed Assemblies	23
4.9.	Summary	23
CHAPTER 5	Reference Types	25
5.1.	Sample Code: RefType_Example	26
5.2.	Delete and Dispose	27
5.3.	Finalize	28
5.4.	Sample Code: Finalize_Example	29
5.5.	Stack Semantics for Ref Types	30
5.6.	Nullptr Reference	30
5.7.	This is Important	31
5.8.	Summary	31
CHAPTER 6	Value Types	33
6.1.	Sample Code: ValueTypes_Example	34
6.2.	Sample Code: PassingValueTypes_Example	35
6.3.	Summary	36
CHAPTER 7	Unmanaged Objects	37
7.1.	Sample Code: UnmanagedObject_Example	37
7.2.	Summary	39
CHAPTER 8	Composition	41
8.1.	Sample Code: Composition_Example	41
8.2.	Sample Code: UnmanagedComposition_Example	44
8.3.	Sample Code: ManagedComposition_Example	46
8.4.	Summary	48
CHAPTER 9	Properties	49
9.1.	Sample Code: Properties_Example	49
9.2.	Summary	50
CHAPTER 10	Structures and Enumerations	51
10.1.	Sample Code: ValueStructure_Example	51
10.2.	Sample Code: ReferenceStructure_Example	52
10.3.	Sample Code: Enums_Example	53
10.4.	Summary	53

CHAPTER 11	Inheritance	55
11.1.	Access Modifiers	55
11.2.	Object Class	56
11.3.	Abstract and Sealed Classes	56
11.4.	Sample Code: Inheritance_Example	56
11.5.	Interfaces	58
11.6.	Sample Code: Interface_Example	59
11.7.	Runtime Callable Wrapper	60
11.8.	Summary	60
CHAPTER 12	Converting and Casting	61
12.1.	Converting	61
12.2.	Sample Code: Convert_Example	61
12.3.	Static Casting	62
12.4.	Sample Code: StaticCast_Example	62
12.5.	Dynamic Casting	62
12.6.	Sample Code: DynamicCast_Example	62
12.7.	Safe Casting	64
12.8.	Sample Code: SafeCast_Example	64
12.9.	Summary	65
CHAPTER 13	Operator Overloading	67
13.1.	Sample Code: OpOverload_Example	67
13.2.	Summary	69
CHAPTER 14	Delegates and Events	71
14.1.	Delegates	71
14.2.	Sample Code: Delegates_Example	72
14.3.	Multicasting	73
14.4.	Sample Code: Multicast_Example	73
14.5.	Events	75
14.6.	Sample Code: Event_Example	76
14.7.	Wrappers	78
14.8.	Sample Code: Wrapper_Example	78
14.9.	Asynchronous Method Calls	80
14.10.	Sample Code: AsynchEvent_Example	80
14.11.	Summary	82
CHAPTER 15	Arrays	83
15.1.	Sample Code: ManagedArray_Example	83
15.2.	Sample Code: PassingArrays_Example	84
15.3.	Summary	85

CHAPTER 16	Generating Random Numbers	87
16.1.	Sample Code: Random_Example	87
16.2.	Sample Code: StdNormRandom_Example	87
16.3.	Summary	89
CHAPTER 17	Time and Timers	91
17.1.	Sample Code: Milliseconds_Example	91
17.2.	Stopwatch	92
17.3.	Sample Code: Stopwatch_Example	93
17.4.	Timers	93
17.5.	Sample Code: FormsTimer_Example	93
17.6.	Sample Code: ThreadingTimer_Example	95
17.7.	Sample Code: TimersTimer_Example	96
17.8.	Summary	98
CHAPTER 18	Input and Output Streams	99
18.1.	FileStream Class	99
18.2.	StreamWriter Class	99
18.3.	File and Directory Classes	99
18.4.	Application Class	100
18.5.	FileMode Enumeration	100
18.6.	Sample Code: StreamWriter_Example	100
18.7.	Sample Code: StreamReader_Example	101
18.8.	Summary	101
CHAPTER 19	Exception Handling	103
19.1.	Sample Code: Exceptions_Example	103
19.2.	Catching Unmanaged C++ Types	104
19.3.	Summary	105
CHAPTER 20	Collections	107
20.1.	Sample Code: Hashtable_Example	107
20.2.	Sorted List Class	109
20.3.	Sample Code: SortedList_Example	109
20.4.	Thread Safety	110
20.5.	Generics	110
20.6.	Sample Code: LinkedList_Example	110
20.7.	Sample Code: Generics_Example	111
20.8.	Summary	112
CHAPTER 21	STL/STL.NET	113
21.1.	Sample Code: STL.NET_Example	113
21.2.	Sample Code: STL_Example	114
21.3.	Summary	114

CHAPTER 22	DataSets	115
22.1.	Sample Code: DataSet_Example	116
22.2.	Rows, DataRowCollections, and DataRows	116
22.3.	Summary	117
CHAPTER 23	Connecting to Databases	119
23.1.	Database Connection	119
23.2.	DataAdapter	120
23.3.	Sample Code: ADO.NET_Example	120
23.4.	Enumerating Through All the Data in a DataSet	122
23.5.	Using Excel as a Data Source	123
23.6.	Writing XML from a DataSet	123
23.7.	Updating a Database with Changes in a Dataset	123
23.8.	Retrieving Data with a DataReader	124
23.9.	Summary	124
CHAPTER 24	Structured Query Language	125
24.1.	Data Manipulation Language	125
24.2.	Updating a Database with Changes in a DataSet	138
24.3.	Data Definition Language	138
24.4.	Summary	140
CHAPTER 25	XML	141
25.1.	Well-Formed XML Documents	141
25.2.	Valid XML Documents	141
25.3.	XML Schema Documents	142
25.4.	Parsers	142
25.5.	Sample Code: Traders.xsd	142
25.6.	Sample Code: XmlWriter_Example	144
25.7.	Sample Code: XmlReader_Example	144
25.8.	Summary	146
CHAPTER 26	Financial Information Exchange Protocol	147
26.1.	XML Protocols in Financial Markets	147
26.2.	Overview of FIX	148
26.3.	Summary	151
CHAPTER 27	Serialization	153
27.1.	Serialization_Example	153
27.2.	Summary	154
CHAPTER 28	Windows Services	155
28.1.	Sample Code: WindowsService_Example	155
28.2.	Summary	159

CHAPTER 29 Setup and Installation Packages 161

- 29.1. Sample Code: Installation_Example 161
- 29.2. Summary 162

Section II: Concurrency**CHAPTER 30 Threading 165**

- 30.1. Threading Namespace 166
- 30.2. Sample Code: Thread_Example 166
- 30.3. Sample Code: ThreadAbort_Example 167
- 30.4. Thread Priority 169
- 30.5. Sample Code: ThreadPriority_Example 170
- 30.6. ThreadState Enumeration 170
- 30.7. ThreadPool Class 171
- 30.8. Sample Code: ThreadPool_Example 171
- 30.9. Updating Forms from Other Threads 172
- 30.10. Sample Code: FormUpdate_Example 172
- 30.11. Thread Safety 174
- 30.12. Summary 175

CHAPTER 31 Synchronization Classes 177

- 31.1. Sample Code: Synchronize_Example 177
- 31.2. Mutex Class 178
- 31.3. Example Code: Mutex_Example 178
- 31.4. Semaphore Class 180
- 31.5. Sample Code: Semaphore_Example 180
- 31.6. Monitor Class 182
- 31.7. Sample Code: Monitor 182
- 31.8. Summary 182

CHAPTER 32 Sockets 183

- 32.1. Sample Code: SynchronousServer_Example 184
- 32.2. Sample Code: SynchronousClient_Example 187
- 32.3. Summary 189

Section III: Interoperability and Connectivity**CHAPTER 33 Marshaling 193**

- 33.1. Marshal Class 193
- 33.2. Sample Code: StringToCharArray_Example 194
- 33.3. Summary 194

CHAPTER 34 Interior and Pinning Pointers 195

- 34.1. Sample Code: InteriorPointer_Example 195
- 34.2. Pinning Pointers 196
- 34.3. Sample Code: Pinning_Example 196
- 34.4. Summary 198

CHAPTER 35	Connecting to Managed DLLs	199
35.1.	Example Code: DLL_Example	199
35.2.	Summary	201
CHAPTER 36	Connecting to Component Object Model (COM) DLLs with COM Interop	203
36.1.	Sample Code: MyCOMLibrary	203
36.2.	Sample Code: UsingCOMDLL_Example	207
36.3.	Summary	207
CHAPTER 37	Connecting to C++ DLLs with Platform Invocation Services	209
37.1.	Calling C-Style Functions	209
37.2.	Sample Code: MyWin32Library	209
37.3.	Sample Code: UsingWin32DLL_Example	211
37.4.	Creating Objects	212
37.5.	Sample Code: MyWin32ClassLibrary	212
37.6.	Sample Code: UsingWin32Class_Example	214
37.7.	CallingConventionEnumeration	215
37.8.	Summary	216
CHAPTER 38	Connecting to Excel	217
38.1.	Sample Code: ControllingExcel_Example	217
38.2.	Sample Code: ExcelChart_Example	220
38.3.	Summary	221
CHAPTER 39	Connecting to TraderAPI	223
39.1.	TraderAPI Overview	223
39.2.	FillObj	224
39.3.	InstrObjClass	224
39.4.	InstrNotifyClass	225
39.5.	OrderObj	225
39.6.	OrderProfileClass	225
39.7.	OrderSetClass	226
39.8.	Sample Code: TraderAPIConnection_Example	227
39.9.	Summary	230
CHAPTER 40	Connecting to XTAPI	231
40.1.	Sample Code: XTAPIConnection_Example	231
40.2.	Summary	233

Section IV: Automated Trading Systems

CHAPTER 41 Building Trading Systems 237

- 41.1. Buy vs. Build 237
- 41.2. Data Mapping 239
- 41.3. Speed of Development 240
- 41.4. Ten Things that Affect the Speed of a Trading System 241
- 41.5. Getting It Right 242
- 41.6. Logic Leaks 243
- 41.7. Ten Things that Affect the Profitability of a Trading System 244
- 41.8. Summary 245

CHAPTER 42 KIV Trading System Development Methodology 247

- 42.1. The Money Document 249
- 42.2. Research and Document Calculations 249
- 42.3. Back Test 252
- 42.4. Implement 253
- 42.5. Manage Portfolio and Risk 255
- 42.6. Summary 257

CHAPTER 43 Automated Trading System Classes 259

- 43.1. Instrument Class 259
- 43.2. Order Class 263
- 43.3. Order Book 264
- 43.4. Bracket 264
- 43.5. Tick 264
- 43.6. Tick or Bar Collection 264
- 43.7. Bar 264
- 43.8. System Manager 265
- 43.9. Graphical User Interface 265
- 43.10. Summary 265

CHAPTER 44 Single-Threaded, Technical Analysis System 267

- 44.1. Sample Code: TechincalSystem_Example 268
- 44.2. Summary 277

CHAPTER 45 Producer/Consumer Design Pattern 279

- 45.1. Sample Code: ProducerConsumer_Example 279
- 45.2. Summary 287

CHAPTER 46 Multithreaded, Statistical Arbitrage System 289

- 46.1. Sample Code: Spreader_Example 291
- 46.2. Summary 304
- 46.3. Conclusion 304
