

Contents

(Volume 1)

Preface VII

Plenary Sessions 1

Human Aspects in Computing: Design and Use of Interactive Systems and Work with Terminals

Congress I: Work with Terminals

Input and Display Devices73

Work Place and Work Environment..... 129

Health Aspects: Workload, Stress and Strain and Irregular Working Hours 173

Psychological and Physiological Measurement215

Congress II: Design and Implementation of Interactive Systems

Dialogue Management/UIMS251

Hypertext and Hypermedia315

Distributed Information Systems357

Cognitive Engineering401

Speech Research and Technology461

Standardisation531

Software Engineering - Methods, Techniques and Tools549

Usability Evaluation607

Interface Design671

Computerized Work and the Improvement of Working Conditions739

Author Index xxi

Subject Index.....xxvii

Human Aspects in Computing:
Design and Use of Interactive Systems and Information Management
(Volume 2)

Intelligent Front Ends789

Knowledge Engineering for Expert Systems849

Intelligent Support and Help Systems887

Intelligent Training951

HCI - the Future989

Congress III: Management of Information Systems

Strategic Planning of IT Systems1019

Uptake Strategies and User Involvement1057

Cooperative Work and Desktop Integration.....1091

Methods and Tools for Improving Information Systems.....1133

Application of IT Systems in Business Environments1173

Training and Qualification.....1217

Implication of IT for the Quality of Life1247

Workshops

Customer-Computer Interaction - A Challenge for HCI1283

VDT - A Tool for a more Healthy Life1305

Poster Sessions1311

Supplement1341

Author Index xiii

Subject Index..... xix

CONTENTS

Human Aspects in Computing: Design and Use of Interactive Systems and Information Management (Volume 2)

Congress II (cntd.): Design and Implementation of Interactive Systems

INTELLIGENT FRONT ENDS	789
Knowledge-Based Front-Ends: Concepts and Requirements	
The changing face of scientific computation	
<i>S. J. Hague and I. Reid</i>	<i>791</i>
Knowledge-based system requirements	
<i>R. Jones, L. Candy and E. Edmonds</i>	<i>796</i>
How can knowledge-based systems solve large scale problems - decomposition and distribution of problem solving	
<i>S. Ohsuga</i>	<i>801</i>
Changing the user interface is changing the world	
<i>H. J. van Zuylen</i>	<i>807</i>
Knowledge-Based Front-Ends in Practice	
Front-ends for scientific programs	
<i>H. J. van Zuylen</i>	<i>813</i>
How to revitalize complex conventional programs	
<i>J. Hensgens and P. Letanoux</i>	<i>820</i>
Using the focus architecture for developing knowledge-based front-ends: KAFTS - a KBFE for forecasting	
<i>E. A. Edmonds, R. Southwick, A. Prat, J. M. Catot, J. Lorés and P. Fletcher</i>	<i>825</i>
MOCAD - an intelligent front end for design for assembly	
<i>J. Warschat</i>	<i>830</i>
Intelligent Interaction	
Multi-viewpoint perspective display methods: formulation and application to compound graphs	
<i>K. Misue and K. Sugiyama</i>	<i>834</i>
The design of an intelligent interface to standard PC applications which maximises the ability of the disabled user	
<i>J. A. Hewitt and P. G. R. Halford</i>	<i>839</i>
Konex+ An interactive design expert	
<i>A. Negele and C. Rathke</i>	<i>844</i>
KNOWLEDGE ENGINEERING FOR EXPERT SYSTEMS	849
Methodological aspects of knowledge elicitation	
Direct and indirect elicitation of knowledge engineering expertise	
<i>A. J. Slade</i>	<i>851</i>
Managing the bottleneck: knowledge acquisition under organizational aspects	
<i>R. Sandner</i>	<i>856</i>
Knowledge elicitation: a comparison of models and of methods	
<i>W. Hacker, N. Großmann and S. Teske</i>	<i>861</i>

Using KADS for generating explanations in environmental impact assessment <i>A. Baumewerd-Ahlmann, P. Jaschek, J. Kalinski and H. Lehmkuhl</i>	866
Application of Knowledge Engineering Techniques	
Database integration with the knowledge based-system KÜSBER <i>M. Leppert, A. Wolf and J. Hofer-Alfeis</i>	871
The graphical quering environment of the KIWIS system <i>F. Staes, L. Tarantino and A. Tiems</i>	876
Towards automatic production of interview plans <i>A. Bonarini, M. C. Gallo and M. Guida</i>	881
INTELLIGENT SUPPORT AND HELP SYSTEMS	887
Intelligent Support Systems	
Can hypermedia improve the acceptance of knowledge-based systems? <i>F. Yetim and P. Dambon</i>	889
Automatic reasoning for creativeness decision support: the CIM case <i>S. Klaczko-Ryndziun and M. Göller</i>	894
Dialogue support at the customer interface <i>T. Houghton, M. Gardner and N. Millard</i>	899
InCome: a system to navigate through interactions and plans <i>T. Fehrlé and M. A. Thies</i>	905
Advance Help Systems	
A highly efficient situation dependent natural language help system for the domain of text processing <i>G. Heyer and R. Kese</i>	910
Empirical investigation of different explanatory dialogue styles <i>H. Johnson and P. Johnson</i>	915
A customizable direct manipulation user interface with automatic generation of help information <i>C. Bach</i>	920
Explanations in an intelligent help system <i>A. Cesta and G. Romano</i>	925
Methods and Tools	
Interacting with hybrid knowledge representation systems <i>M. Migliorati and C. Bognasco</i>	930
An automatic debugging method of logic programs by using static and dynamic analyses <i>M. Nagata and T. Mishuku</i>	935
A framework for modelling dialogues in interactive systems <i>T. Schwab</i>	940
Knowledge acquisition in inductive learning <i>P. Gerensky, V. Lefterov, V. Popov, G. Proykov and E. Tzolov</i>	946
INTELLIGENT TRAINING	951
Intelligent Training I	
Computer-based learning with distributed Multimedia Systems <i>M. Mühlhäuser</i>	953
A multimedia intelligent tutoring system for Human-Computer Interaction procedures <i>P. Brooks, A. Schmeling and P. F. Byerley</i>	959

The effect of alternative interface techniques on the automated teaching of pseudocode <i>R. C. MacGregor and H. Hasan</i>	964
Intelligent Training II	
An explorative tutoring system based on a dynamic critic-expert model <i>A. Zimmermann</i>	969
A tutoring system architecture to support the design process <i>U. Dumschlaff and D. Meyerhoff</i>	974
Towards a didactical computer-aided design <i>R. Ahmed-Ouamer and P. Prevot</i>	979
Computer-based learning of working demands <i>B. Bergmann, B. Werner and J. Wiedemann</i>	984
HCI - the Future	989
Knowledge-Based Systems	
Technology and the construction of authoritative knowledge <i>B. Jordan</i>	991
Task-based discretionary security considerations <i>G. Steinke</i>	996
GAIN an integrated expert system for investment consulting <i>C. Donalisio, F. Resta and M. R. Spada</i>	1002
Advances in Human-Computer Interaction	
Remote direct manipulation: a case study of a telemedicine workstation <i>R. Keil-Slawik, C. Plaisant and B. Shneiderman</i>	1006
Functional allocation in computerized citrus quality inspection <i>A. Lidror, I. Prigojin and Z. Eilam</i>	1012
 Congress III: Management of Information Systems	
STRATEGIC PLANNING OF IT SYSTEMS	1019
Planning Approaches	
Information technology planning systems: forms and contexts <i>R. W. Zmud, V. Sambamurthy and T. A. Byrd</i>	1021
Information management is the method: combining computer-controlled with human-controlled functions in CIM <i>D. M. Weber</i>	1026
Autonomous manufacturing islands in Chinese industry <i>S. Zhang</i>	1031
Application and Cases	
Towards the design of a translator's workstation - organisational background and user implications <i>M. Hôge and E. Kroupa</i>	1036
Development of an incident and accident management support system for BWR nuclear power plants <i>Y. Hattori, Y. Takizawa, T. Hayashi and J. Ikeda</i>	1041
A human-supervised control architecture for a flexible manufacturing system <i>N. Nakamura</i>	1046
Diagnosis strategies of maintenance personnel in flexible advanced manufacturing structures <i>B. Zimolong and U. Konradt</i>	1051

UPTAKE STRATEGIES AND USER INVOLVEMENT	1057
Uptake Strategies and User Involvement I	
Human and organizational factors in IT uptake processes: ESPRIT project 1030: IT uptake <i>G. Ryan</i>	1059
Linked planning groups for implementing CIM <i>R. Bartels, H. Eisel and A.-W. Scheer</i>	1064
User acceptance of computer aided design (CAD) <i>P. Knauth, J. Joseph and H. G. Gemünden</i>	1070
Uptake Strategies and User Involvement II	
Changes in mastery of computer applications and endusers' evaluations of the implementation process and psychological well-being: a follow-up study in financial firms <i>P. Huuhtanen and J. Seitsamo</i>	1075
An empirical study of assessing human performance in a computer aided managerial planning task <i>M. Giannacourou and L. Laios</i>	1080
Organisational design for secretaries <i>B. Klein</i>	1085
COOPERATIVE WORK AND DESKTOP INTEGRATION	1091
Design and Modelling of CSCW-Systems	
Usability, change, adaptable systems and community computing <i>J. Brooke</i>	1093
Advanced task allocation in ProMInanD <i>B. Karbe and N. Ramsperger</i>	1098
IPSE technology as a basis for implementing CSCW systems <i>P. R. White and D. G. Wastell</i>	1103
Corporate information management with aDIS - an engineering approach <i>L. Kayalar and K. I. Wilkinson</i>	1108
Practical Experiences with CSCW-Systems	
Computer supported cooperative work - state of the art <i>H. Krcmar</i>	1113
Broadband based cooperative work <i>A. Kindt, V. Reible and K. H. Vöge</i>	1118
The effect of computer conferences on joint decision making <i>B. Freisleben, G. Aschemann and S. Schramme</i>	1123
Development and runtime support for collaborative applications <i>T. D. Rüdebusch</i>	1128
METHODS AND TOOLS FOR IMPROVING INFORMATION SYSTEMS	1133
Overview and Trends	
Comparison analysis of design methodologies and reference frameworks for information system design <i>V. Savolainen</i>	1135
Designing information systems for cooperating agents <i>V. De Antonellis, B. Pernici and P. Samarati</i>	1140
Development opportunities for methods and tools <i>E. Pulst, J. Hawgood and J. Niemeier</i>	1145

Dedicated Methods and Tools

Selecting methods and tools for information system improvement projects <i>J. Niemeier and A. Kieback</i>	1151
Computer aided strategy audit (CASA) - knowledge based strategy consulting <i>H. Krallmann, M. Müller-Wünsch and A. Woltering</i>	1160
Intelligent support tools for “organizational learning” about IT uptake: ESPRIT project 2144: IT-USE <i>G. Ryan and A. Aboulafia</i>	1167

APPLICATION OF IT SYSTEMS IN BUSINESS ENVIRONMENTS 1173

Architectures and Concepts

Information systems architectures in business environment <i>D. Seibt</i>	1175
Barriers to office automation and their countermeasures <i>L. Diawati and Y. Hayashi</i>	1191
CIM in Switzerland: the use of computer integrated production systems <i>J. K. Kuark, T. Moll, H. Schüpbach, O. Strohm and E. Ulich</i>	1196
Information systems formation of island structures in manufacturing <i>V. Hornung</i>	1201

IT Systems in Business Environments

Application model for designing human-computer interfaces <i>T. Hattori</i>	1202
AI as a computer support for the manager - an integrated concept <i>R. Marzi</i>	1208
Towards designing knowledge acquisition tools for business planning <i>G. Valiris and L. Laios</i>	1212

TRAINING AND QUALIFICATION 1217

Qualification concepts

Qualification requirements for the organized use of CIM in the operational shere of personel systems <i>K. Betzl and K. Kornwachs</i>	(Supplement) 1353
The hard life of the unskilled workers in new technologies: data-entry clerks in Brazil - a case study <i>A. Soares</i>	1219
Application of multimedia systems for qualification in business environments <i>M. Schäfer and J. Hofmann</i>	1224

Training Concepts

Causal reasoning in learning to use a command device: discovery of procedural schemas <i>F. P. Aschéhoug</i>	1229
Learning and authoring on the basis of an adaptive system <i>A. Knierriem and J. A. C. Muñoz</i>	1236
Integrated software solutions for production control in job shops: a teaching project <i>G. Schmidt, P. Sokolowsky and W. Dilger</i>	1242

IMPLICATION OF IT FOR THE QUALITY OF LIFE	1247
Four Perspectives on Understanding, Modelling and Improving Quality of Live in Relation to IT	
Information systems in cultural institutions: Lessons for tomorrow`s business organizations <i>D. Te`eni and K. Sengupta</i>	1249
Troubleshooting strategies - the constraints imposed by the telephone <i>E. A. M. de Medeiros</i>	1255
Managing complex connectivity: outlines of general network management <i>J. Erhardt</i>	1260
Workshop: Future Implications of IT for the Quality of Life	
Software scenario models for “quality of life” in the “information society”: ESPRIT project 5374: QLIS <i>G. Ryan and A. Aboulafia</i>	1265
Quality of life criteria for assessing information technology in the home environment <i>W. Hesse, S. Goll, T. Biedassek and J. Remington</i>	1270
Modelling scenarios for the impact on quality of life <i>D. Bronisz, D. Cordelle and T. Grossi</i>	1276
WORKSHOPS	
Customer-Computer Interaction - A Challenge for HCI	1283
VDT - A Tool for a more Healthy Life	1305
POSTER SESSIONS	1311
SUPPLEMENT	1341
