Acknowledgments	v
Chapter 1. Introduction	1
1.1. Phonetics and phonology in recent approaches to positional neutralization.....	3
1.1.1. Pure Prominence	3
1.1.1.1. Phonetic arbitrariness in Pure Prominence models.....	5
1.1.2. Phonetically-driven Phonology	6
1.1.3. Integrated Phonetics and Phonology	7
1.1.4. Neo-Founded Phonology	8
1.2. Goals.....	8
1.3. Phonetics and phonology in the Phonologization Approach.....	9
1.4. Categories, neutralization and the phonologization process	11
1.5. Organization.....	16
Chapter 2. Stressed syllables and unstressed vowel reduction	19
2.1. Unstressed vowel reduction: patterns of neutralization.....	20
2.1.1. Vowel height contrasts.....	20
2.1.2. Nasalization.....	27
2.1.3. Quantity	28
2.2. The phonetics of vowel reduction	29
2.3. Case studies	32
2.3.1. The phonologization of phonetic vowel reduction: Bulgarian	32
2.3.2. Categorical vowel reduction: Belarusian	36
2.3.3. A mixed system: Brazilian Portuguese	37
2.4. UG-based approaches to UVR typology	39
2.5. Vowel reduction in Russian.....	47
2.5.1. Facts.....	48
2.5.2. Experimental investigation of Russian UVR	52
2.5.2.1. Subjects	52
2.5.2.2. Materials.....	52
2.5.2.3. Methods	53
2.5.2.4. Results	55
2.5.2.5. Discussion	63

2.6.	Phonetic determinism in UVR systems.....	67
2.6.1.	Vowel reduction in Seediq.....	68
2.7.	Summary	71

Chapter 3. Final syllables 73

3.1.	Final syllable prominence.....	74
3.1.1.	Phonetic prominence.....	74
3.1.2.	Psycholinguistic prominence.....	77
3.2.	Phonological strength effects in final position.....	78
3.2.1.	Tone in final position.....	78
3.2.2.	Vocalic strength effects in final position	79
3.2.2.1.	Hausa	79
3.2.2.2.	Pasiego Spanish.....	82
3.2.3.	Final syllable resistance to assimilation and reduction.....	86
3.2.3.1.	The phonetic roots of final resistance	93
3.2.3.2.	Syllable structure effects on final resistance.....	97
3.2.3.3.	Final strength and psycholinguistic prominence.....	98
3.3.	Why final strength is different from stressed syllable strength....	100
3.4.	Categorical and gradient effects in final strength systems	103
3.5.	On assumptions concerning licensing capacity and phonetic prominence.....	108
3.6.	Final Weakening	114
3.6.1.	Devoicing	115
3.6.2.	Glottalization.....	125
3.6.3.	Mixed systems.....	132
3.6.4.	Nasalization.....	134
3.6.5.	Final vowel reduction and loss of contrasts.....	141
3.6.5.1.	Lowering	141
3.6.5.2.	Final reduction	143
3.6.5.3.	The phonetics of final syllable reduction.....	146
3.7.	Vowel quantity in final syllables.....	151
3.7.1.	Neutralization of quantity contrasts in final position.....	151
3.7.2.	Final short vowel avoidance	157
3.8.	Summary	158

Chapter 4. Initial syllables..... 161

4.1.	Recent work on initial syllable phonology.....	162
4.1.1.	Functional motivations for PN in stressed and initial syllables ...	163

4.1.2.	Agenda for this chapter.....	165
4.2.	Licensing asymmetries in initial position	165
4.3.	The phonetics of initial position.....	168
4.4.	Initial-syllable strength effects	173
4.4.1.	Initial syllables in languages with fixed initial stress	174
4.4.2.	Other sources of duration in initial syllables	177
4.5.	Vowel harmony and initial syllables.....	179
4.5.1.	Initial syllables in English	179
4.5.1.1.	Subjects	180
4.5.1.2.	Materials.....	180
4.5.1.3.	Methods.....	181
4.5.1.4.	Results	182
4.5.2.	Initial syllables in Turkish	184
4.5.2.1.	Subjects	186
4.5.2.2.	Materials.....	186
4.5.2.3.	Methods	187
4.5.2.4.	Results	188
4.5.3.	Initial strengthening and Turkic Palatal Harmony.....	193
4.5.3.1.	Does vowel harmony come from vowel reduction?.....	193
4.5.4.	Bantu.....	200
4.6.	Summary	203
Chapter 5.	Conclusions	206
5.1.	Phonologization and Universal Grammar in typology	206
5.2.	On the integration of phonetics and phonology.....	209
5.3.	Does “anything go” in phonology?	220
5.4.	Further challenges: incomplete neutralization	223
	Notes	239
	References.....	256
	Index.....	285
