

# Table of Contents

## KEYNOTE ADDRESS

- The Network Computer** .....1  
Andy Hopper, University of Cambridge and Olivetti Research Laboratory

## EXPERIMENTAL STUDIES

- Query Expansion Using Local and Global Document Analysis**.....4  
Jinxi Xu and W. Bruce Croft, *University of Massachusetts*
- The Design of a High Performance Information Filtering System** ..... 12  
Timothy A.H. Bell and Alistair Moffat, *The University of Melbourne*
- Pivoted Document Length Normalization**..... 21  
Amit Singhal, Chris Buckley, Mandar Mitra, *Cornell University*
- Retrieving Spoken Documents by Combining Multiple Index Sources** ..... 30  
G.J.F. Jones, J.T. Foote, K. Spärck Jones, S.J. Young, *University of Cambridge*

## LANGUAGE

- Viewing Stemming as Recall Enhancement**..... 40  
Wessel Kraaij, *Netherlands Organisation for Applied Scientific Research*  
Renée Pohlmann, *Utrecht University*
- Querying Across Languages: A Dictionary-based Approach to Multilingual Information Retrieval**..... 49  
David A. Hull, Gregory Grefenstette, *Rank Xerox Research Centre*
- Experiments in Multilingual Information Retrieval using the SPIDER system**..... 58  
Páraic Sheridan, Jean Paul Ballerini, *Swiss Federal Institute of Technology, Zurich*

## VISUALIZATION

- Visualizing Search Results: Some Alternatives To Query-document Similarity** ..... 67  
Lucy Terry Nowell, Robert K. France, Deborah Hix, Lenwood S. Heath, and Edward A. Fox, *Virginia Tech*
- Reexamining the Cluster Hypothesis: Scatter/Gather on Retrieval Results** ..... 76  
Marti A. Hearst, Jan O. Pedersen, *Xerox Palo Alto Research Center*
- Evaluation of a Tool for Visualization of Information Retrieval Results** ..... 85  
Aravindan Veerasamy, *Georgia Tech*  
Nicholas J. Belkin, *Rutgers University*

## ARCHITECTURE

|                                                                                                |            |
|------------------------------------------------------------------------------------------------|------------|
| <b>An Architecture for Implementing Extensible Information-seeking Environments.....</b>       | <b>94</b>  |
| David G. Hendry, David J. Harper, <i>The Robert Gordon University</i>                          |            |
| <b>Document Retrieval Facilities for Repository-based System Development Environments.....</b> | <b>101</b> |
| Andreas Henrich, <i>Universität Siegen</i>                                                     |            |
| <b>Performance Evaluation of a Distributed Architecture for Information Retrieval .....</b>    | <b>110</b> |
| Brendon Cahoon, Kathryn S. McKinley, <i>University of Massachusetts</i>                        |            |

## USER STUDIES

|                                                                                                                                    |            |
|------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Elicitations during Information Retrieval: Implications for IR System Design.....</b>                                           | <b>120</b> |
| Amanda Spink, Abby Goodrum, David Robins, <i>University of North Texas</i><br>Mei Mei Wu, <i>National Taiwan Normal University</i> |            |
| <b>Evaluating User Interfaces to Informations Retrieval Systems: A Case Study on User Support.....</b>                             | <b>128</b> |
| Giorgio Brajnik, Stefano Mizzaro, Carlo Tasso, <i>University of Udine</i>                                                          |            |

## EFFICIENCY

|                                                                                                                                                                              |            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Efficient Processing of One- and Two-dimensional Proximity Queries in Associative Memory.....</b>                                                                         | <b>138</b> |
