Preface	xi
Chapter 0. The model	1
0.1. Introduction	1
0.2. Portfolio and consumption rules	2
0.3. Completeness	7
0.4. Hedging	10
Part 1. Complete markets	13
Chapter 1. Pricing	15
1.1. Introduction	15
1.2. European contingent claims	15
1.3. Examples	18
1.4. American contingent claims	25
Chapter 2. Optimization	33
2.1. Introduction	33
2.2. Martingale methods	35
2.3. Ramifications	40
2.4. Constant coefficients	44
2.5. Drawdown constraints	49
2.6. Goal problems	55
Chapter 3. Equilibrium	61
3.1. Introduction	61
3.2. The market model	62
3.3. Individual optimization problem	63
3.4. Equilibrium	64
3.5. Representative agent	66
3.6. Existence and uniqueness of equilibrium	67
3.7. Equilibrium prices	69
3.8. Examples	71
Part 2. Incomplete markets	73
Chapter 4. Hedging	75
4.1. The model	75
4.2. Embedding	76
4.3. Contingent claims	78

4.4. Upper hedging price	80
4.5. Attainability	83
4.6. Lower hedging price	86
Chapter 5. Optimization	91
5.1. The problem	91
5.2. Embedding	92
5.3. Optimality conditions	95
5.4. Duality	101
5.5. Existence	103
5.6. Relative entropy	105
5.7. Constant coefficients	106
Chapter 6. Pricing	111
6.1. Introduction	111
6.2. A fair price	112
6.3. Examples	114
Chapter 7. Transaction costs	117
7.1. The model	117
7.2. Contingent claims	120
7.3. Hedging	121
7.4. Optimization	126
7.5. Pricing	132
Appendix A. Historical Notes	135
A.1. Chapter 0	135
A.2. Chapter 1	136
A.3. Chapter 2	137
A.4. Chapter 3	138
A.5. Chapter 4	139
A.6. Chapter 5	139
A.7. Chapter 6	140
A.8. Chapter 7	140
Bibliography	141
