

Contents

1 Introduction	1
2 Origin of the Solar System	7
2.1 General Properties of Galaxies, Stars, and Sun	7
2.2 The Solar System	9
2.3 Development of Thought About the Origin	10
2.4 Modern Concepts About the Origin	12
2.4.1 Sun, Planets, and Moons	12
2.4.2 The Meteoritic Complex	20
2.4.2.1 Meteorites	20
2.4.2.2 Asteroids	23
2.4.2.3 Comets	27
2.4.3 Companion Star and the Tenth Planet	29
3 Morphology of Planets and Satellites	33
4 Earth.	37
4.1 Early History, Structure, and Hydrosphere	37
4.2 Atmosphere and Biosphere	45
4.3 Hypsometry	48
4.4 Morphology	53
4.4.1 Endogenic	53
4.4.2 Exogenic	69
4.4.3 Exotic	79
5 Moon	93
5.1 Origin	93
5.2 Composition	96
5.3 Hypsometry	99
5.4 Morphology	101
5.4.1 Exotic	101
5.4.2 Endogenic and Exogenic	108
5.5 Chronology	115

6 Mercury	121
6.1 Observations	121
6.2 Hypsometry	123
6.3 Morphology	124
6.3.1 Exotic	124
6.3.2 Endogenic	130
6.4 Chronology	135
7 Venus	137
7.1 Early History and Structure	137
7.1.1 Planetary Setting	137
7.1.2 Hydrosphere	142
7.1.3 Core, Mantle, and Lithosphere	143
7.1.4 Tectonic Models	145
7.2 Hypsometry	150
7.3 Morphology	151
7.3.1 Exotic	151
7.3.1.1 Impact Craters	151
7.3.2 Endogenic	157
7.3.2.1 Plains	157
7.3.2.2 Tesserae	163
7.3.2.3 Highlands	165
7.3.2.4 Volcanoes and Intrusives	171
7.3.3 Exogenic	183
7.3.4 Summary	185
8 Mars	187
8.1 Planetary Setting	187
8.2 Satellites	197
8.3 Hypsometry	199
8.4 Morphology	202
8.4.1 General	202
8.4.2 Chronology	205
8.4.3 Exotic	207
8.4.4 Endogenic	213
8.4.4.1 Densely Cratered Terrains	213
8.4.4.2 Sparsely Cratered Plains	215
8.4.4.3 Flow and Ridged Plains	217
8.4.4.4 High-Latitude Plains	218
8.4.4.5 Volcanoes	219
8.4.4.6 Tectonism	226
8.4.5 Exogenic	228
8.4.5.1 Erosional Features	228
8.4.5.2 Chaotic, Fretted, Grooved, and Knobby Terrains	230

8.4.5.3 Depositional Features	249
8.4.6 Summary	255
9 Outer Planets and Satellites	259
9.1 Exploration	259
9.2 Jupiter and Satellites	260
9.2.1 Planetary Setting.	260
9.2.2 Inner Satellites	260
9.2.2.1 General	260
9.2.2.2 Amalthea	261
9.2.3 Galilean Satellites	263
9.2.3.1 General	263
9.2.3.2 Io	263
9.2.3.3 Europa	268
9.2.3.4 Ganymede	273
9.2.3.5 Callisto	280
9.2.4 Outer Satellites	283
9.2.5 Summary	283
9.3 Saturn and Satellites	284
9.3.1 Planetary Setting.	284
9.3.2 Satellites	285
9.3.3. Summary	296
9.4 Uranus and Satellites.	297
9.4.1 Planetary Setting.	297
9.4.2 Satellites	299
9.4.2.1 General	299
9.4.2.2 Puck	300
9.4.2.3 Miranda.	300
9.4.2.4 Ariel	303
9.4.2.5 Umbriel	304
9.4.2.6 Titania	306
9.4.2.7 Oberon	307
9.4.3 Summary	307
9.5 Neptune and Satellites	310
9.5.1 Planetary Setting.	310
9.5.2 Satellites	310
9.5.2.1 General	310
9.5.2.2 Triton	311
9.6 Pluto and Charon	316
10 Summary and Conclusions	319
10.1 Introductory Statement.	319
10.2 Properties Inherited From the Origin of the Solar System	320

10.3 Morphologies Developed After Separation of the Planets	324
10.3.1 Exotic	324
10.3.2 Endogenic	325
10.3.3 Exogenic	330
10.3.4 Summary	331
10.4 Oceans of Magma and Other Non-Water Liquids. . .	332
10.5 Ocean Basins and Water Oceans	333
10.6 Atmospheres	335
10.7 Life and Its Role in Structure and Morphology	338
10.8 The Improbability of an Earth	341
