

Sommaire - Contents

C 3.1. Les grands types de marges continentales passives. *The main types of passive margins.*

O. Eldholm, L. Montadert The main types of passive margins : an introduction	7
J. A. Grow, R. E. Sheridan Structure and evolution of the US Atlantic continental margin	11
K. Hinz, H. Dostmann, J. Fritsch The continental margin of Morocco : seismic sequences, structural elements and the geological development	21
M. Talwani, J. Mutter, O. Eldholm The initiation of opening of the Norwegian Sea	23

C 3.2. Le paléoenvironnement des marges continentales passives (Paléocirculation - Mouvements eustatiques - Paléoclimatologie). *The palaeoenvironment of passive continental margins (Palaeocirculation - Eustatic movements - Palaeoclimatology).*

P. R. Vail Introduction	31
J. Hardenbol, P. R. Vail, J. Ferrer Interpreting paleoenvironments, subsidence history and sea level changes of passive margins from seismic and biostratigraphy	33
T. S. Loutit, J. P. Kennett Australasian Cenozoic sedimentary cycles, global sea level changes and the deep-sea sedimentary record	45
J. Thiede Late Mesozoic and Cenozoic sedimentation along oceanic island margins : analog to continental margins	65
J. S. Schlee, L. F. Jansa The paleoenvironment and development of the eastern North American continental margin	71
S. W. Petters Paleoenvironments of the Gulf of Guinea	81

C 3.3. Les mécanismes de formation des marges continentales passives. *The mechanisms of formation of passive continental margins.*

A. W. Bally, D. Bernoulli, G. A. Davis, L. Montadert Listric normal faults	87
D. A. Falvey, M. F. Middleton Passive continental margins : evidence for a prebreakup deep crustal metamorphic subsidence mechanism	103
R. Meissner Passive margin development. A consequence of specific convection patterns in a variable viscosity upper mantle	115
C. E. Keen, C. Beaumont, R. Boutilier Preliminary results from a thermo-mechanical model for the evolution of Atlantic-type continental margins	123
R. T. Buffler, F. J. Shaub, R. Huerta, A. B. Ibrahim, J. S. Watkins A model for the early evolution of the Gulf of Mexico Basin	129
J. C. Crowell Juncture of San Andreas transform system and Gulf of California rift	137
A. B. Watts, M. S. Steckler Subsidence and tectonics of Atlantic-type continental margins	143
J. R. Cochran Simple models of diffuse extension and the pre-seafloor spreading development of the continental margin of the northeastern Gulf of Aden	155

E. V. Artyushkov Physical origin of crustal movements on passive margins	167
 C 3.4. Évolution des marges à la lumière des forages profonds dans le Pacifique. <i>Evolution of active margins in the light of deep boreholes in the Pacific.</i>	
R. von Huene Introduction to papers presented at the active margins section	171
M. G. Langseth, R. von Huene, N. Nasu, H. Okada Subsidence of the Japan Trench forearc region of northern Honshu	173
G. deV. Klein, K. Kobayashi Geological summary of the Shikoku Basin and northwestern Philippine Sea, Leg 58, DSDP/IPOD drilling results	181
R. B. Scott, L. W. Kroenke Periodicity of remnant arcs and back-arc basins of the South Philippine Sea	193
D. M. Hussong, S. Uyeda Tectonics in the Mariana arc : results of recent studies, including DSDP Leg 60	203
J. S. Watkins, J. C. Moore, T. H. Shipley, S. B. Bachman, F. W. Beghtel, A. Butt, B. M. Didyk, J. K. Leggett, N. Lundberg, K. J. McMillen, N. Niitsuma, L. E. Shepherd, J. F. Stephan, H. Stradner Accretion, underplating, subduction and tectonic evolution, Middle America Trench, Southern Mexico : results from DSDP Leg 66	213
J. Aubouin, R. von Huene, J. Azema, G. Blackinton, J. A. Carter, W. T. Coulbourn, D. S. Cowan, J. A. Curiale, C. A. Dengo, R. W. Faas, W. Harrison, R. Hesse, D. M. Hussong, J. W. Ladd, N. Muzylov, T. Shiki, P. R. Thompson, J. Westberg A summary of Deep Sea Drilling Project Leg 67. Shipboard results from the Mid-America Trench transect off Guatemala	225
R. von Huene, S. Uyeda A summary of results from the IPOD transects across the Japan, Mariana, and Middle-America convergent margins	233
 C 3.5. Dynamique de la subduction. <i>Dynamics of subduction.</i>	
Y. Ida Thermal circulation of partial melt and volcanism behind trenches	241
E. V. Artyushkov Mechanism of formation of active margins	245
 C 3.6. Modèles actuels et géodynamique des chaînes : subduction et paléosubductions. <i>Current models and the geodynamics of chains : subduction and palaeosubductions.</i>	
E. Honza Subduction and accretion in the Japan Trench	251
R. C. Speed Geology of Barbados : implications for an accretionary origin	259
M. C. Blake Jr., A. S. Jayko, D. G. Howell Geology of a subduction complex in the franciscan assemblage of northern California	267
X. Le Pichon, P. Huchon, J. Angelier, N. Lybérès, J. Boulín, D. Bureau, J.-P. Cadet, J. Dercourt, G. Glaçon, H. Got, D. Karig, J. Mascle, L.-E. Ricou, F. Thiébaud Active tectonics in the Hellenic Trench	273
J. Aubouin, R. Blanchet Subduction and tectonics : discussion of the results of the IPOD program in active margins	283
