

Contents

1. Introduction	1
2. Tidal Sedimentary Structure Process-Response Models	16
Simple Tidal Bedload Transport Model	18
Time-Velocity Asymmetry Model	23
Late-Stage Emergence Runoff Model	31
Alternation of Bedload and Suspension Depositional Model	39
Suspension Depositional Model	48
Tidal Scour Model	48
Exposure Model	49
Soft-Sediment Deformation and Compaction Model	57
Deep-Water Marine Tidal Sedimentary Structures	60
3. Tidal Paleocurrent Models	66
4. Textural Depositional Models	72
5. Facies Models	79
Tidal Flat Facies Model	79
Intertidal Sand Body and Associated Macrotidal Coastal Model	87
Shallow, Subtidal, Tide-Dominated Sand Body Model	89
6. Occurrence of Energy Minerals in Clastic Tidal Facies	97
Petroleum Occurrences	98
Uranium Occurrences	105
7. Clastic Tidal Facies and Geological History	108
Quartz Arenite Environments	109
The Quartz Arenite-Carbonate Epeiric and Mioclinal Shelf Sea Sedimentary Tectonic Association	120
Rotation of the Earth	128
